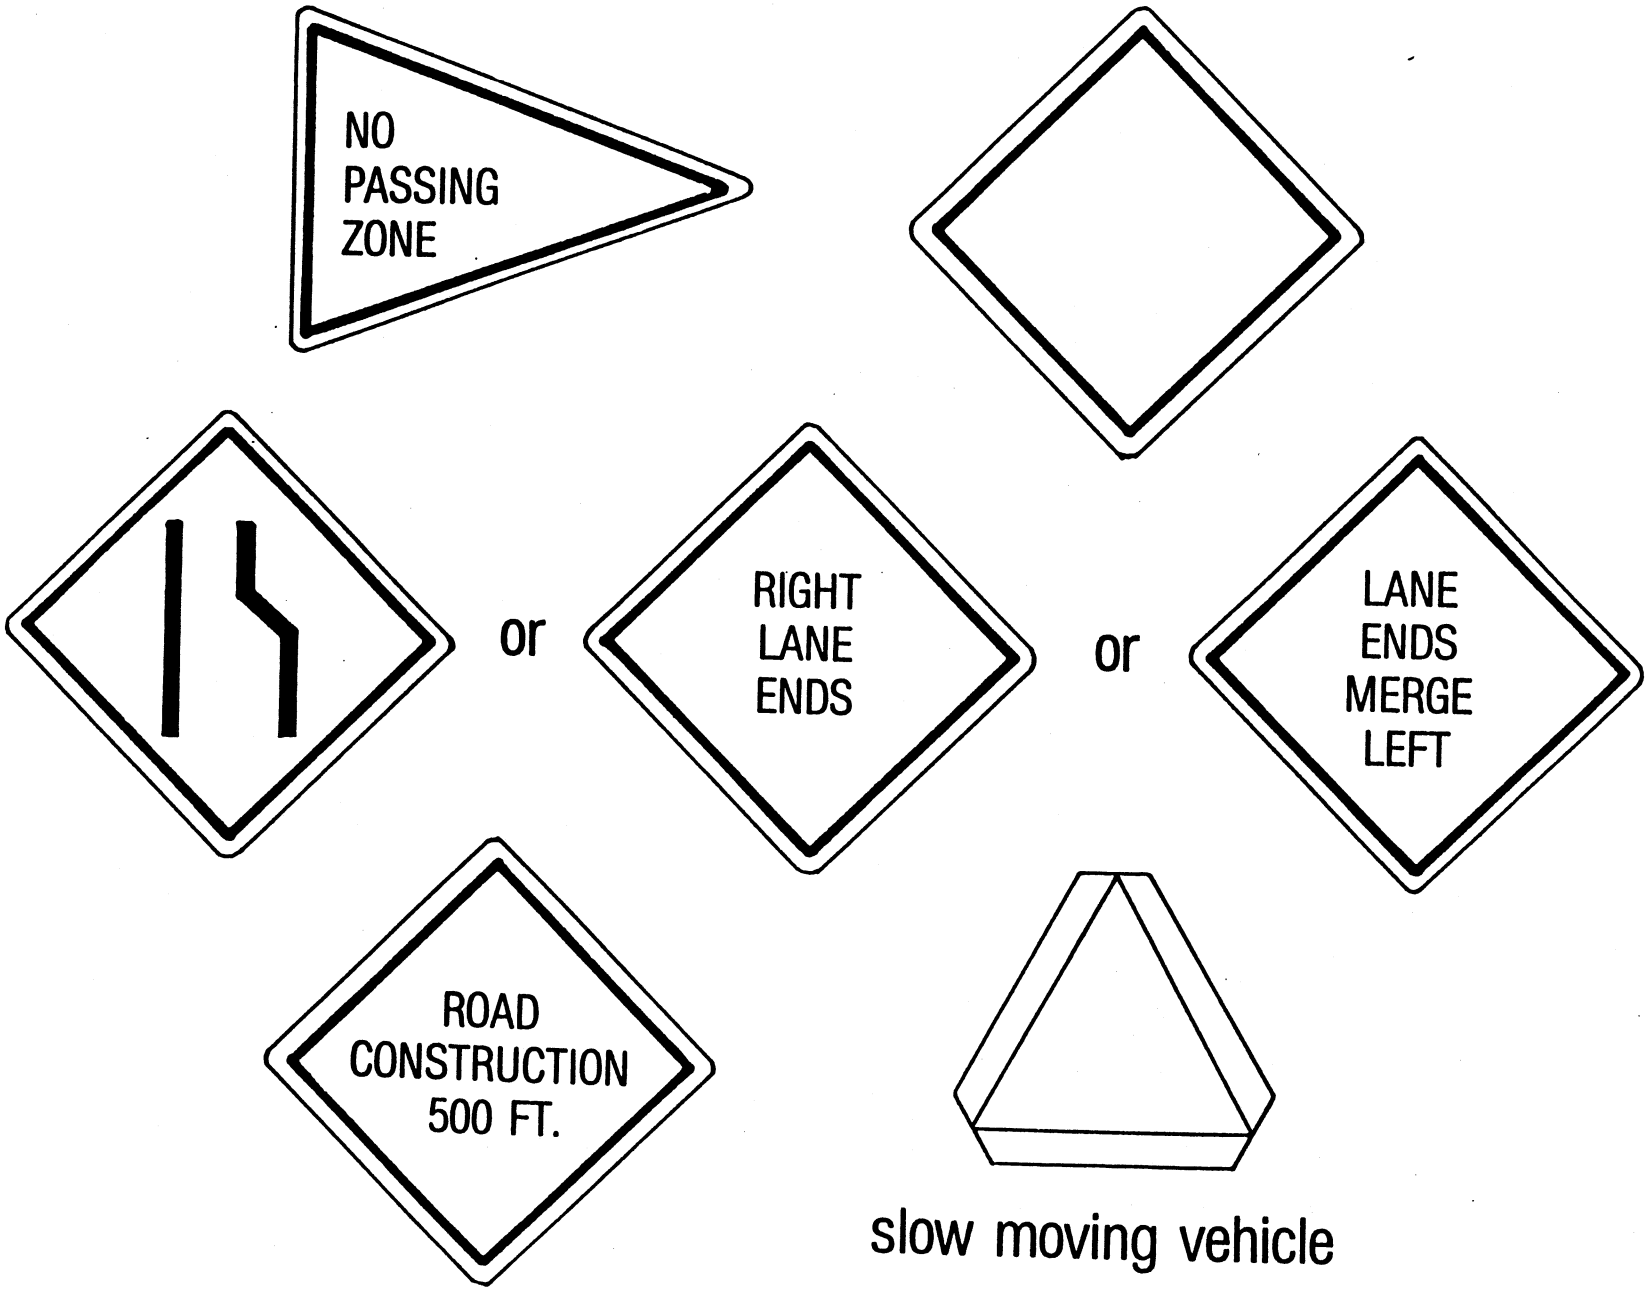
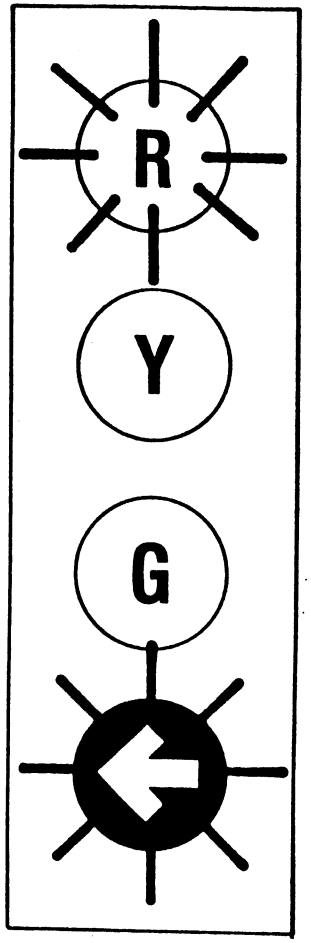
VISUALS

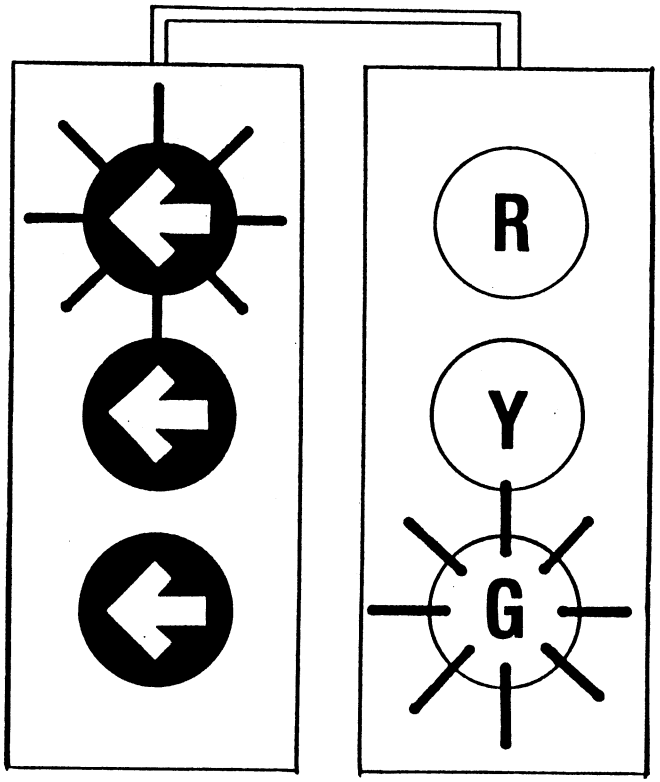
Visual 1 (Signs)

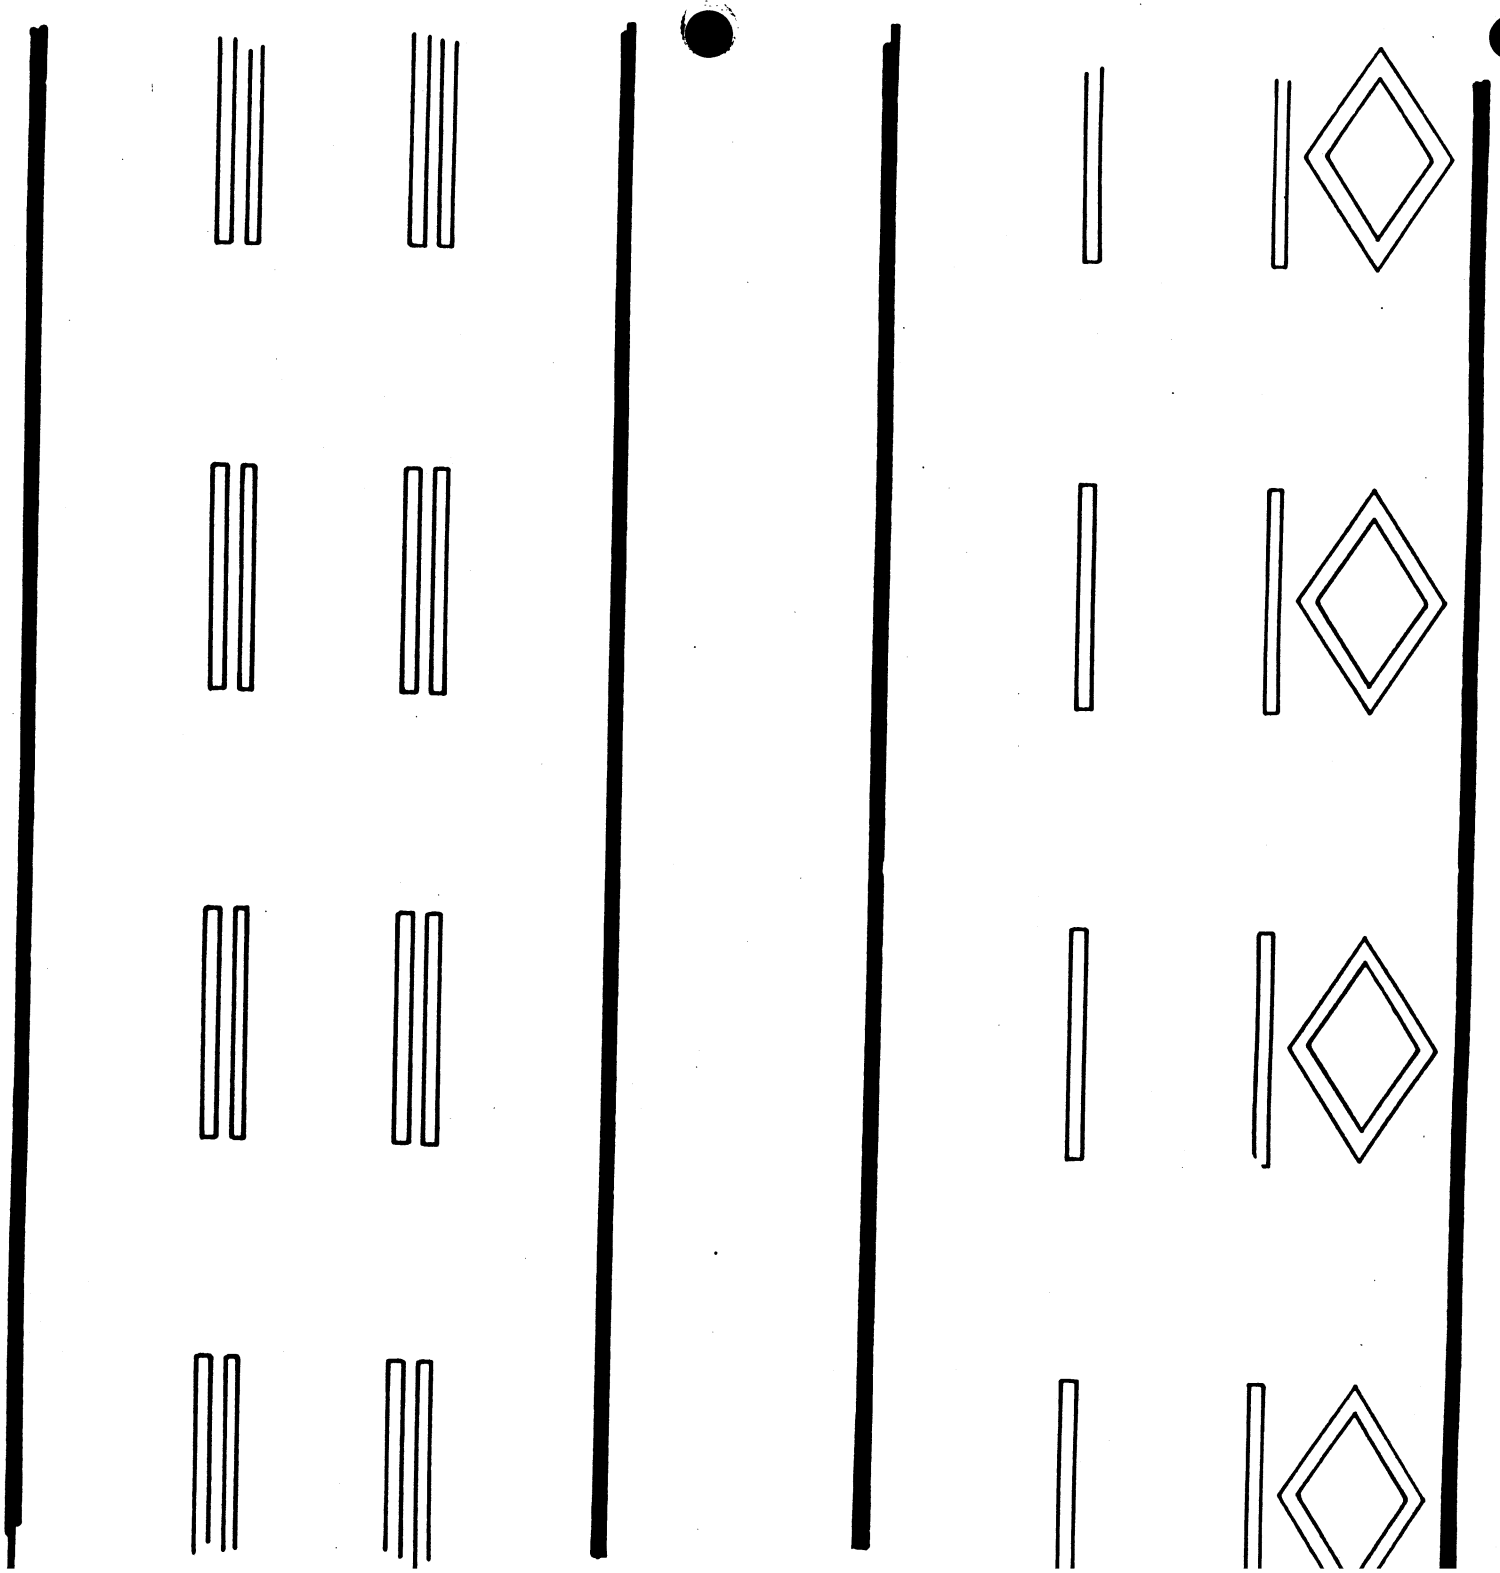




green—Go.
Do not stop.

red—Stop.
Wait for green arrow.

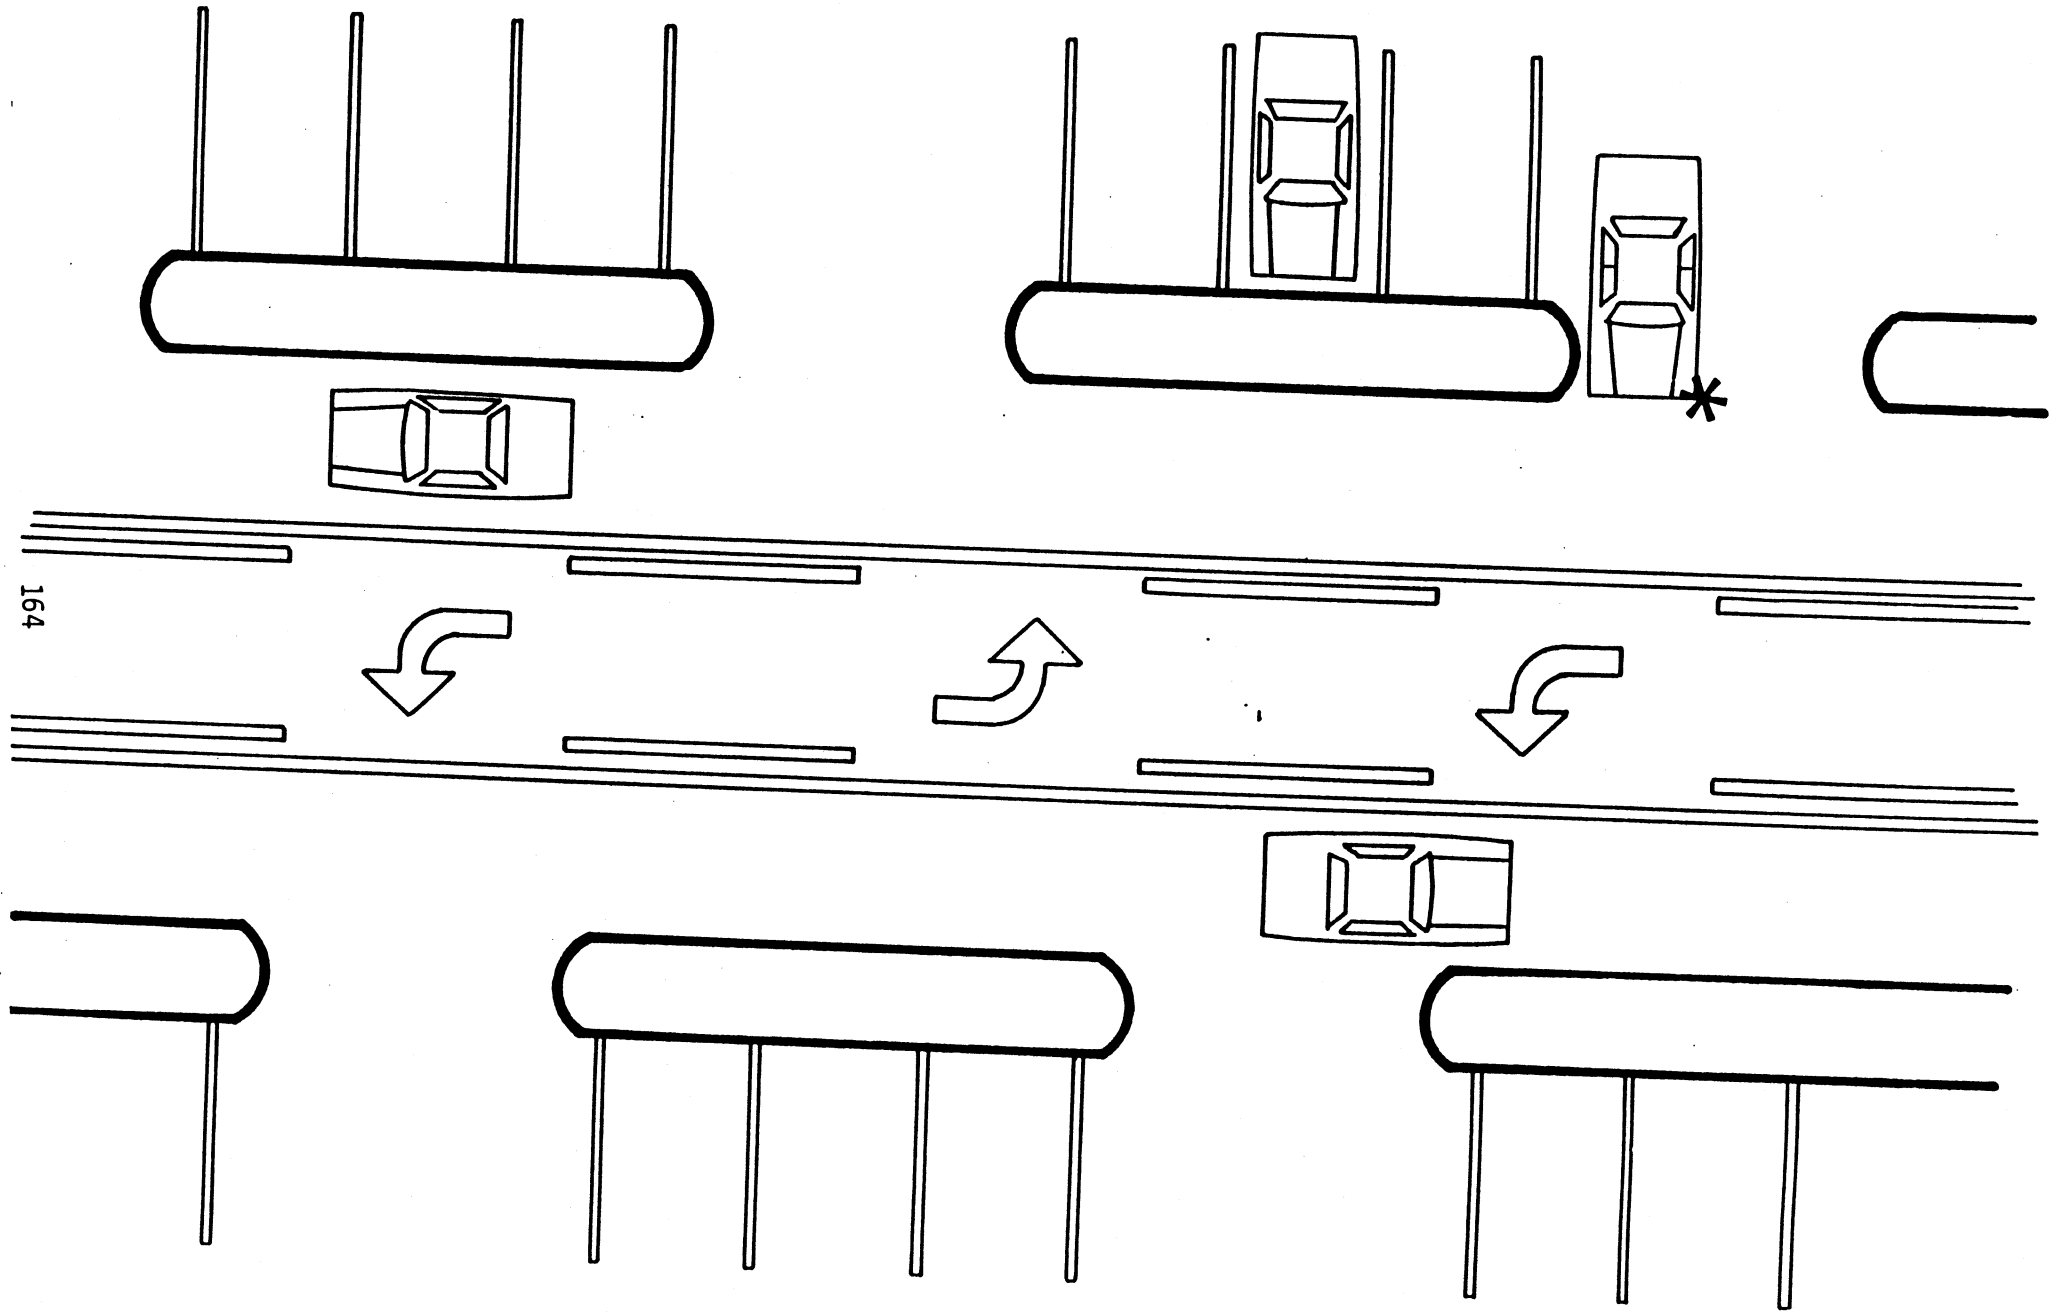




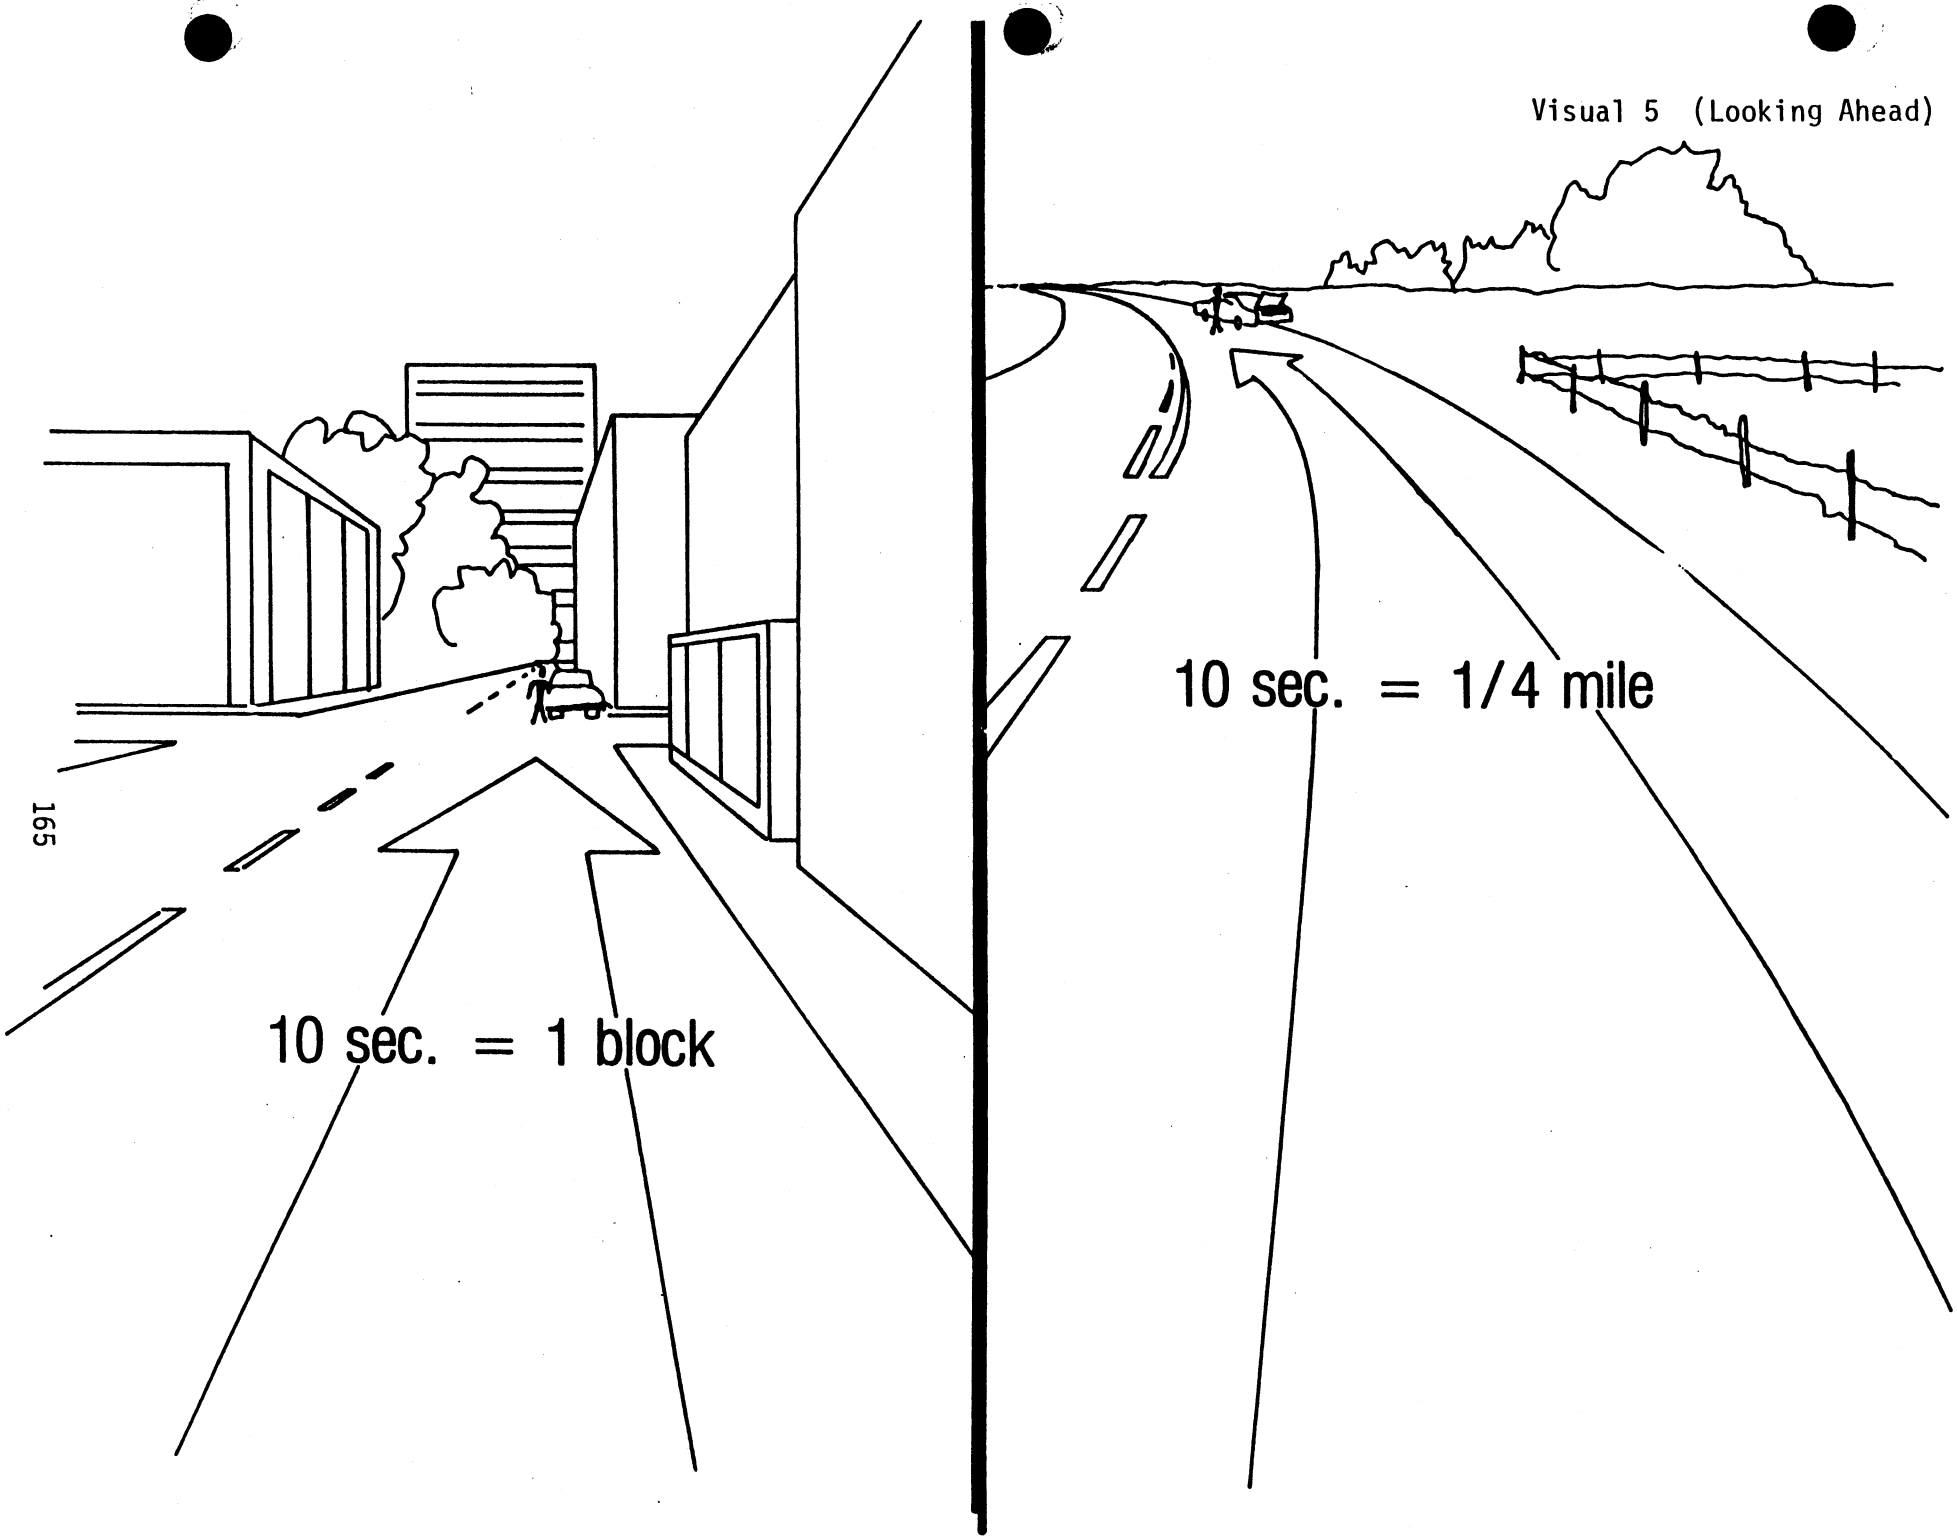
Visual 3

(Lane Markings)

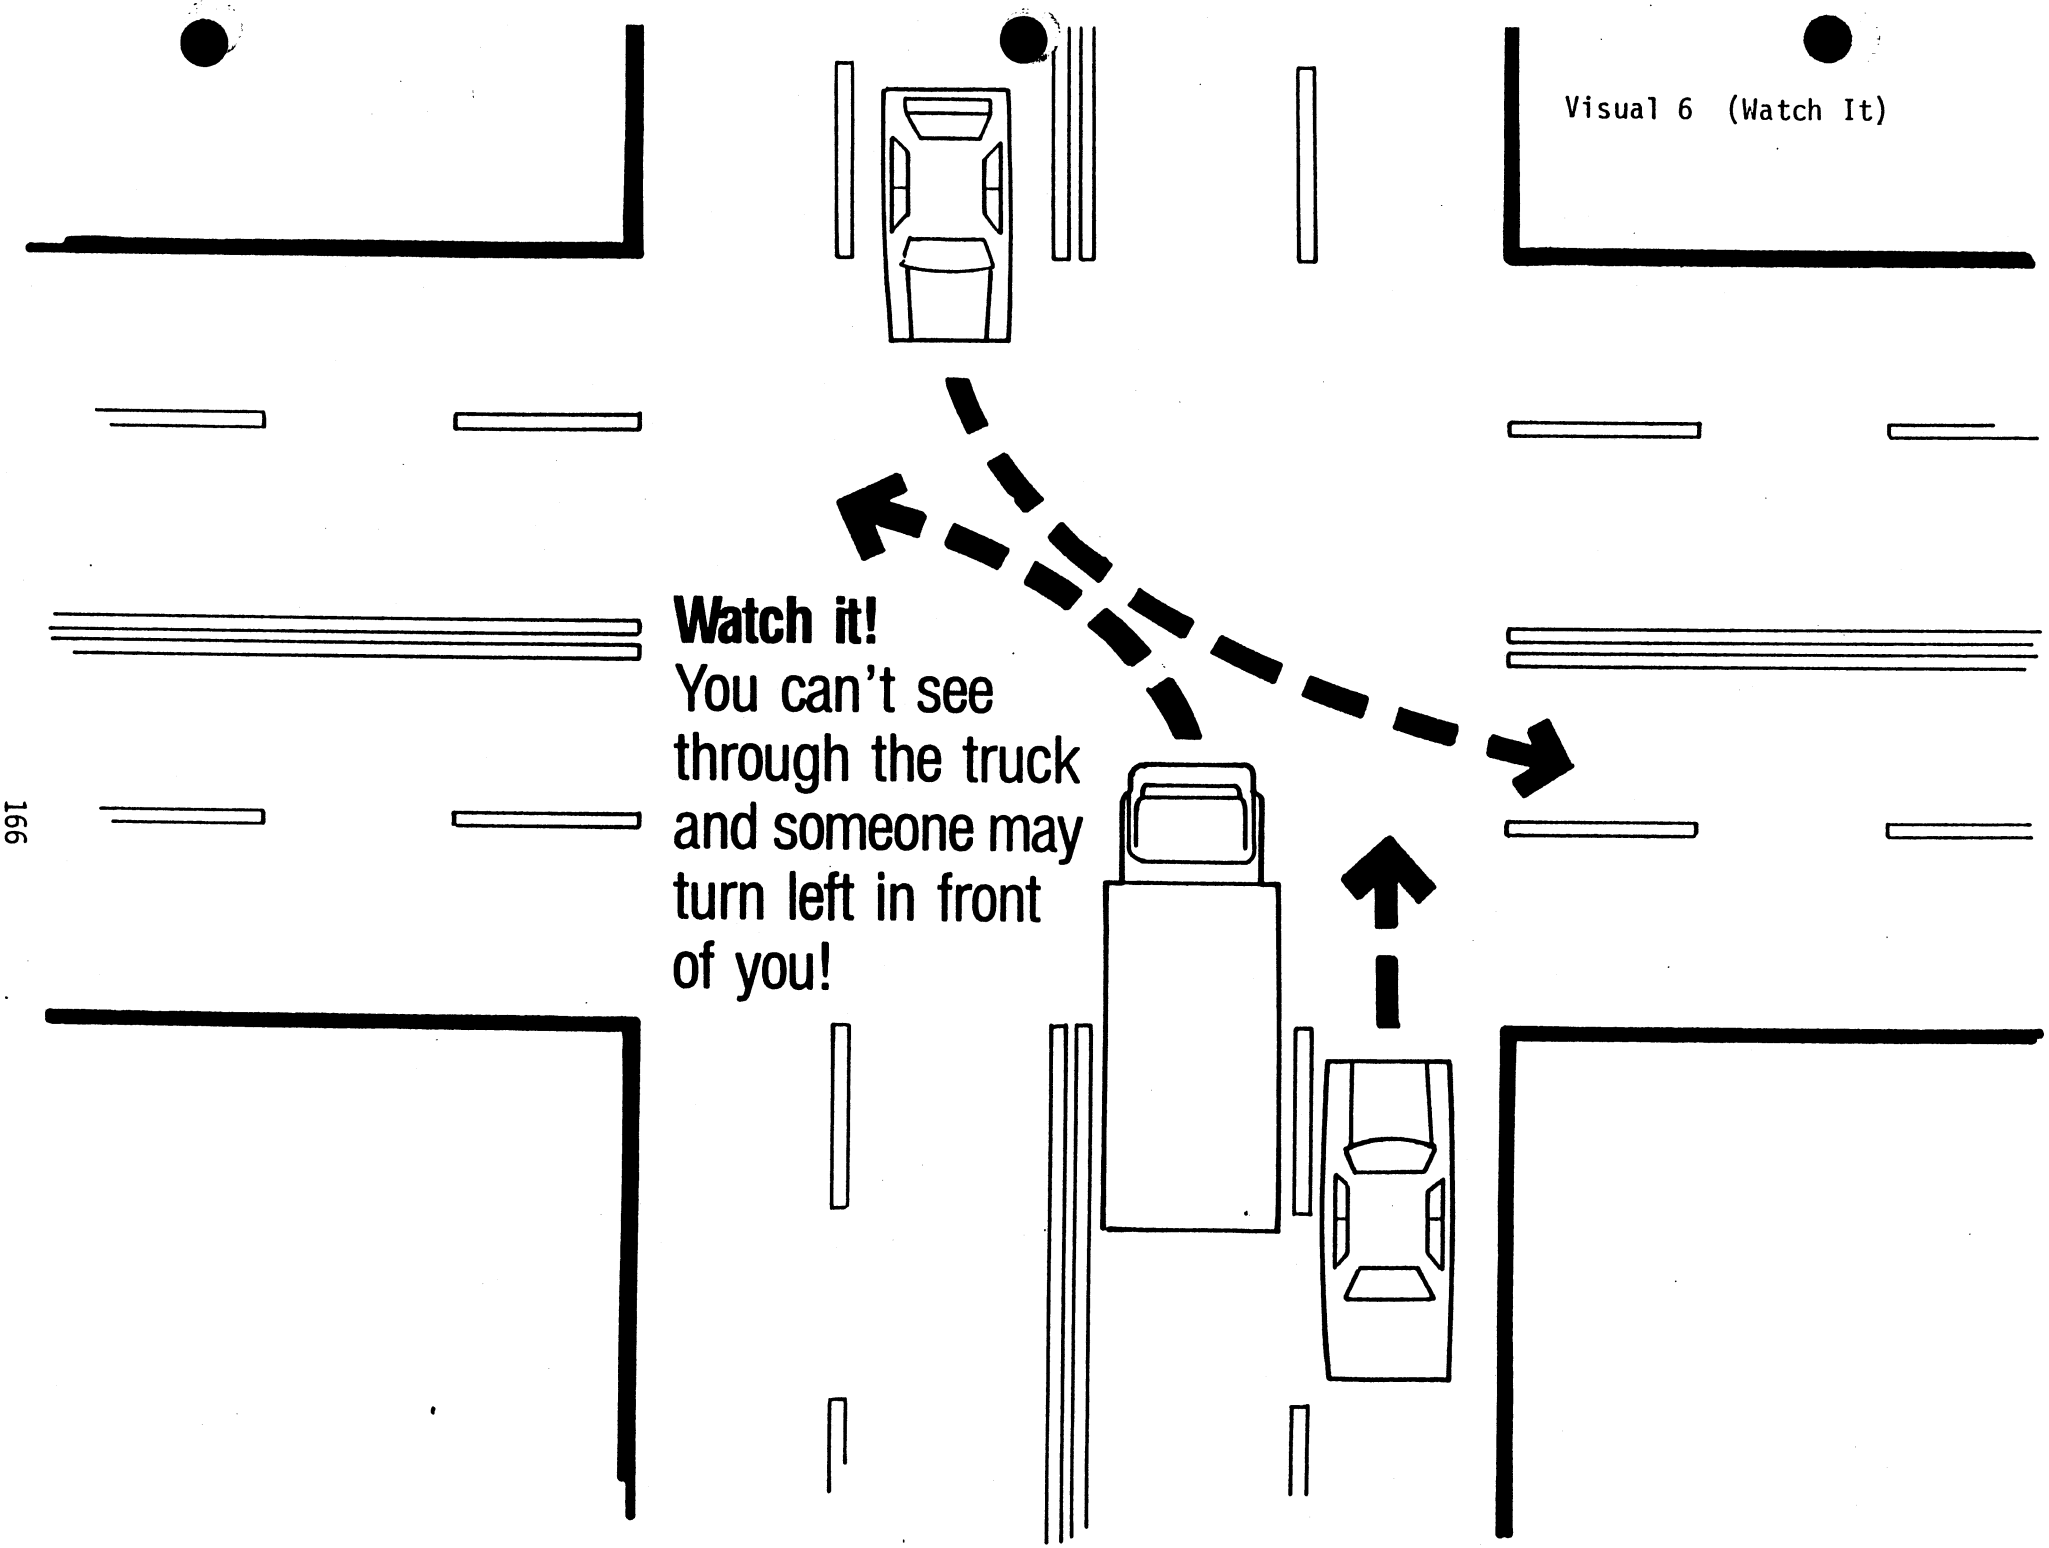
Visual 4 (Shared Left-turn Lane)



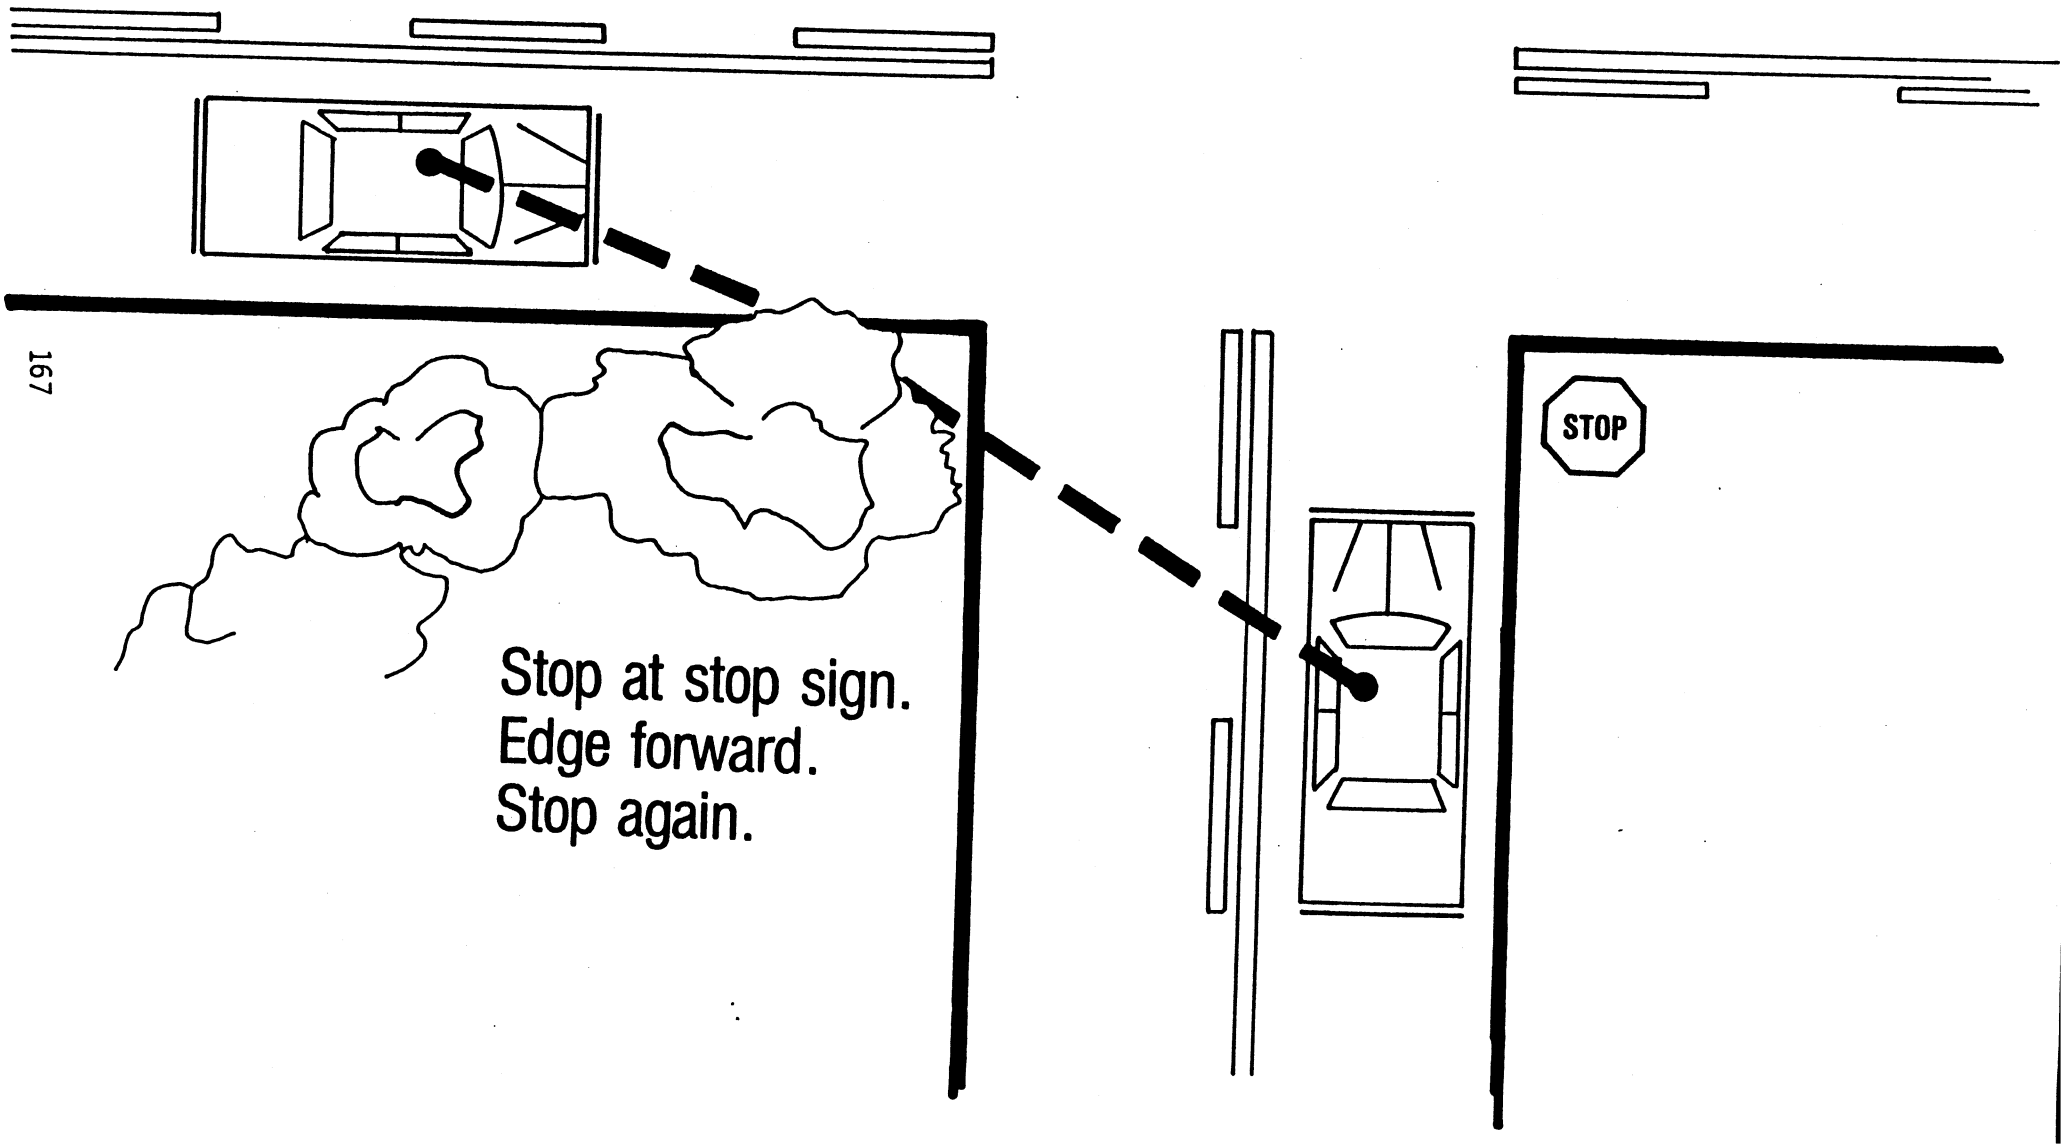
Visual 5 (Looking Ahead)



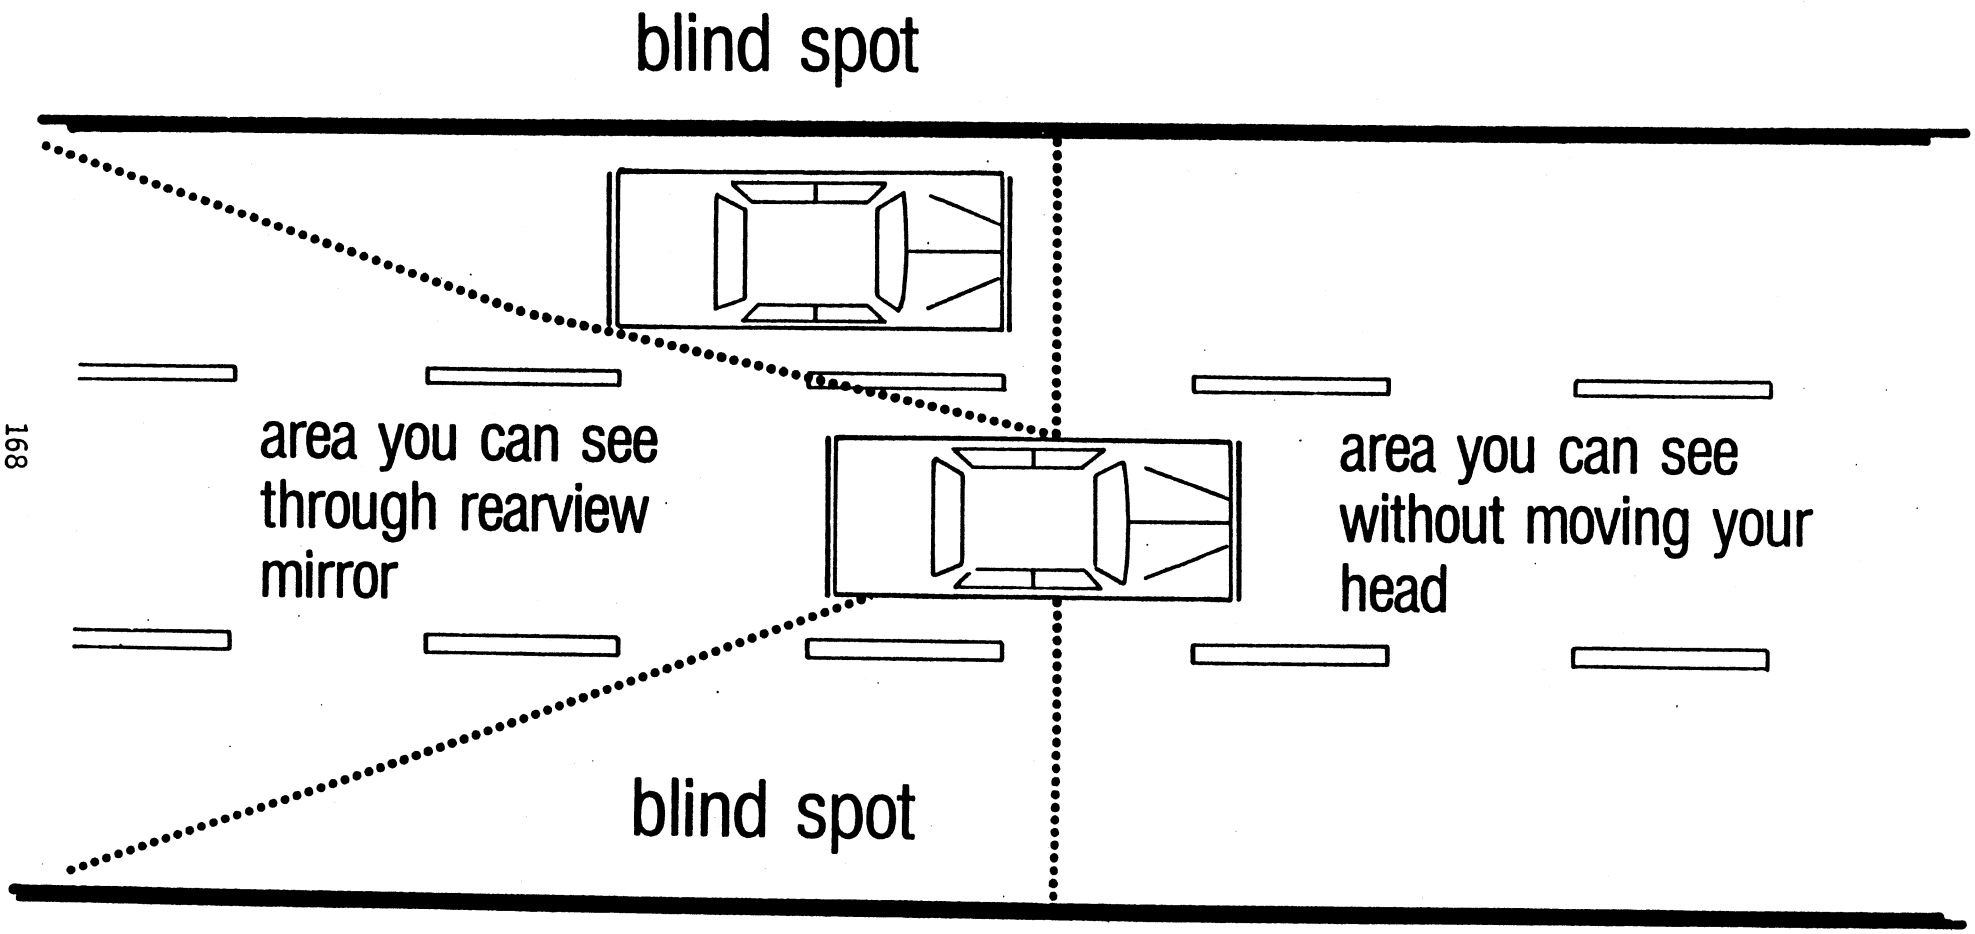
Visual 6 (Watch It)

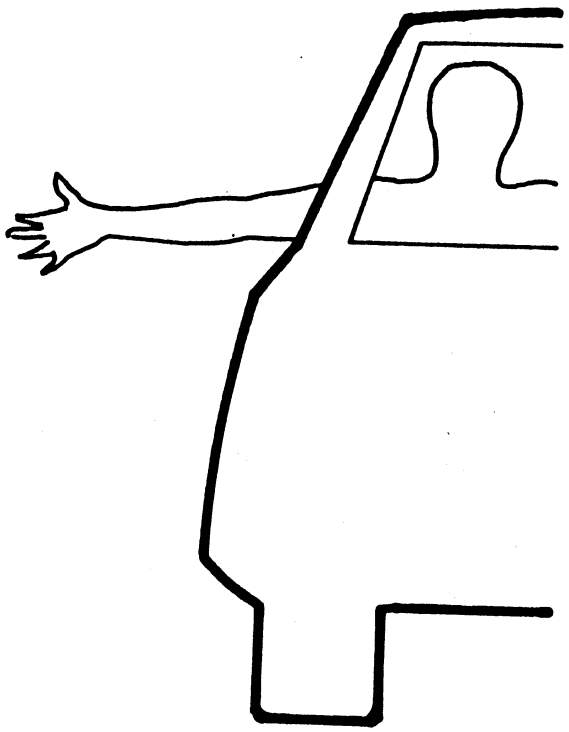


Visual 7 (Stop Twice)

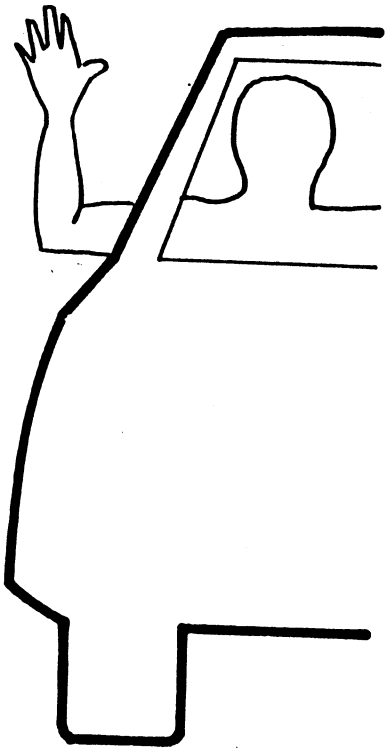


Visual 8 (Blind Spots)

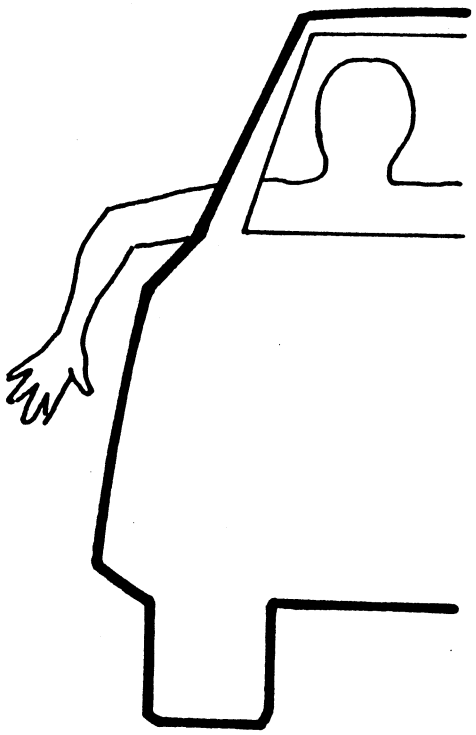




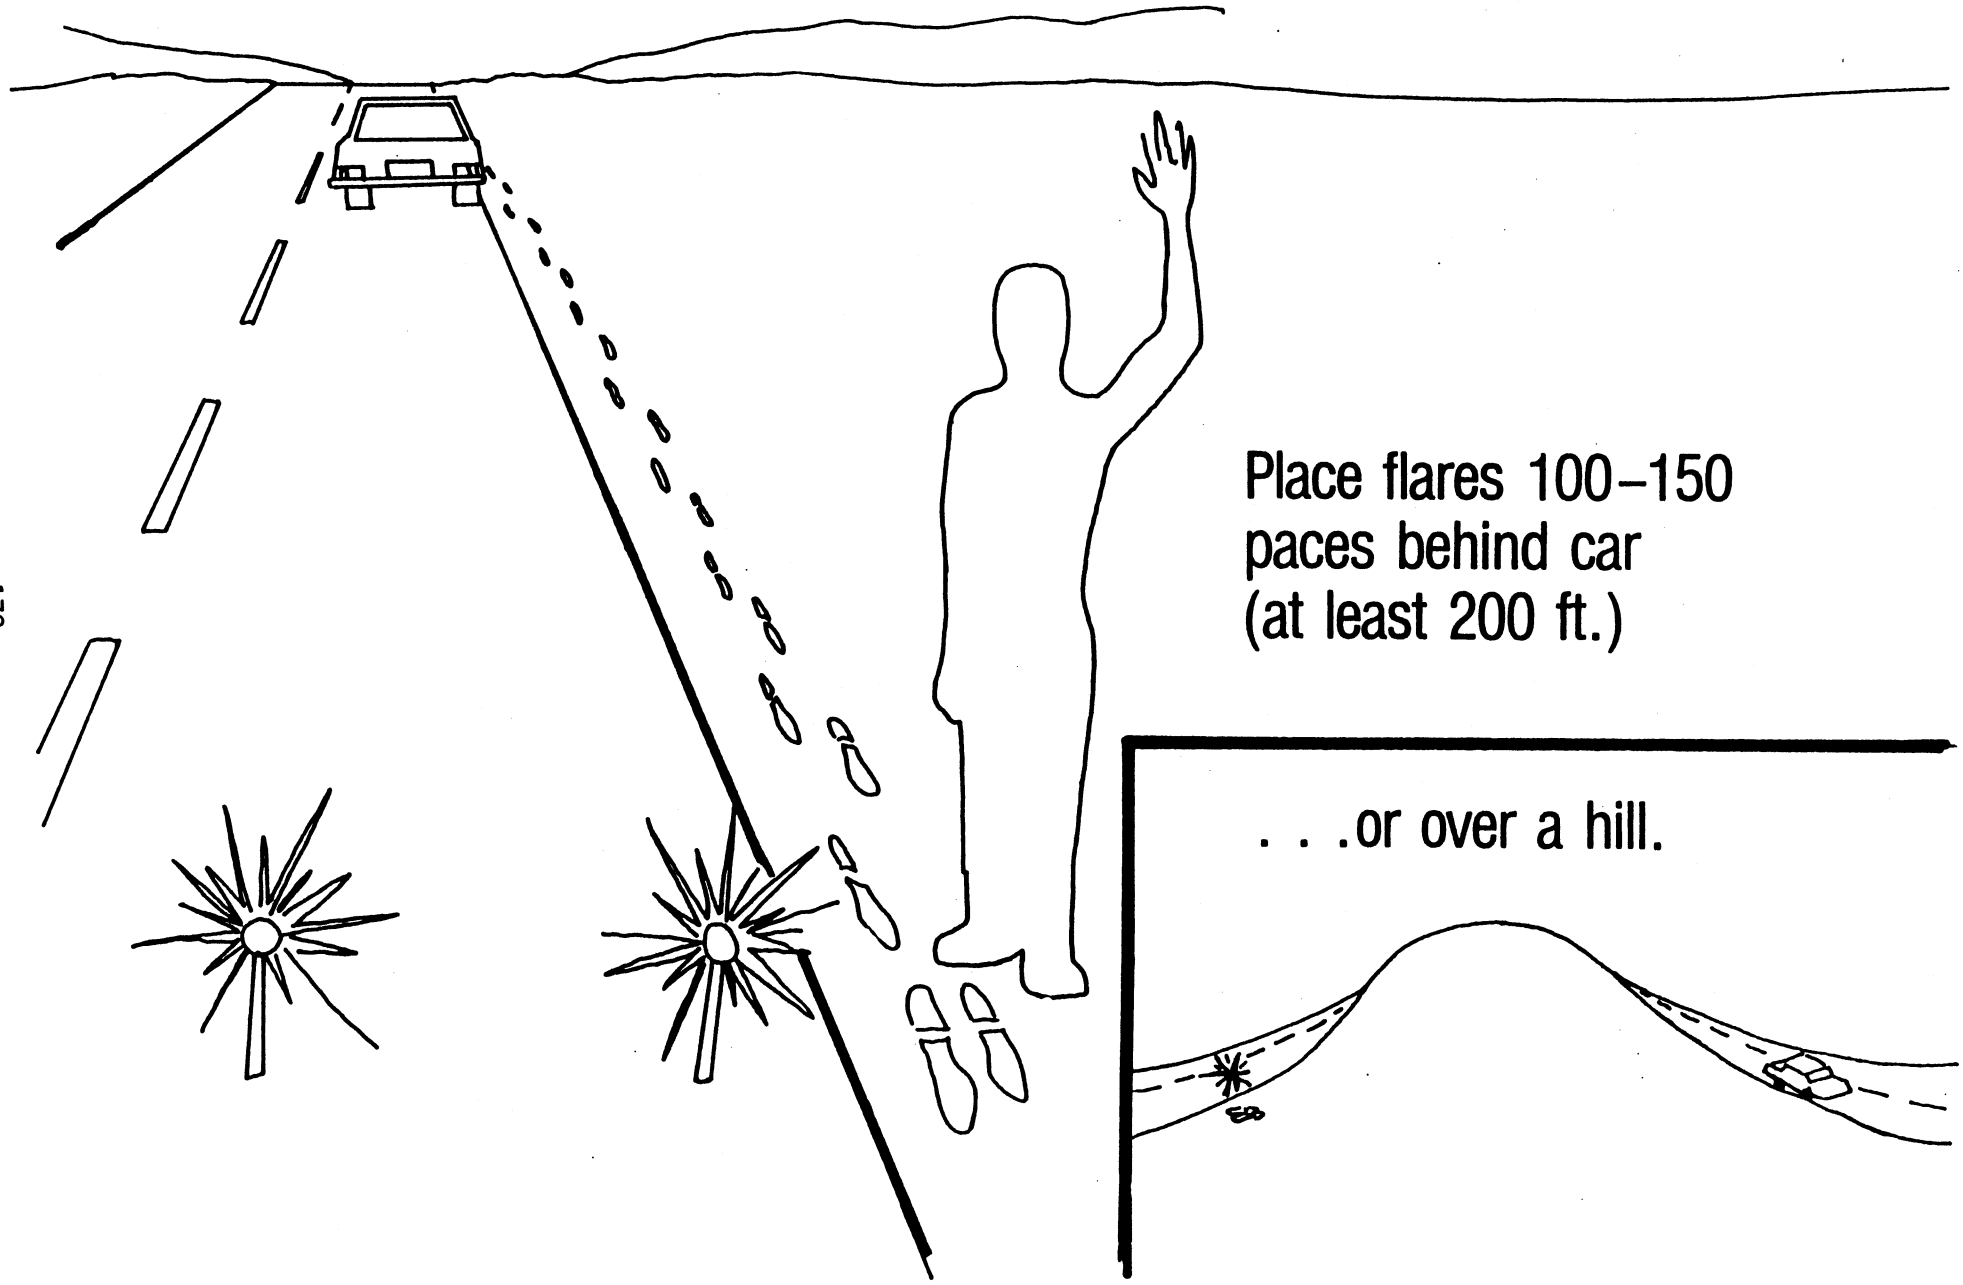
left turn signal



right turn signal

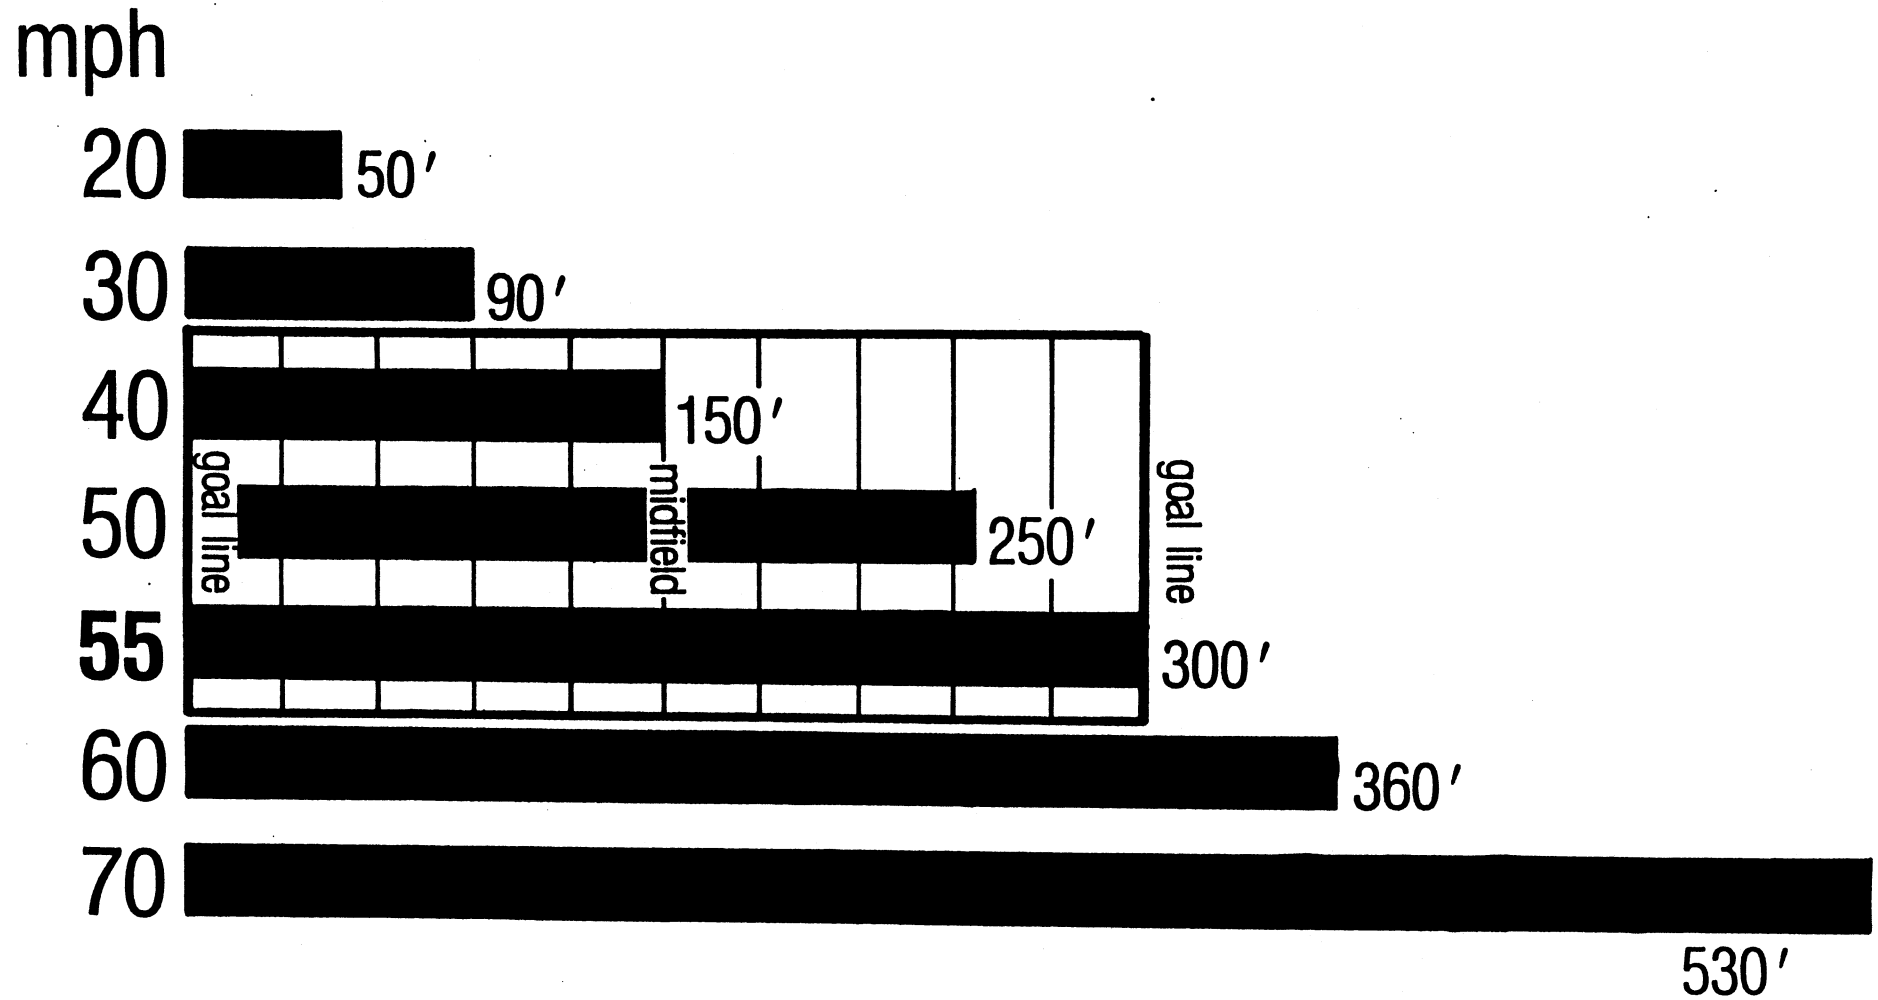


slowing down or stopping

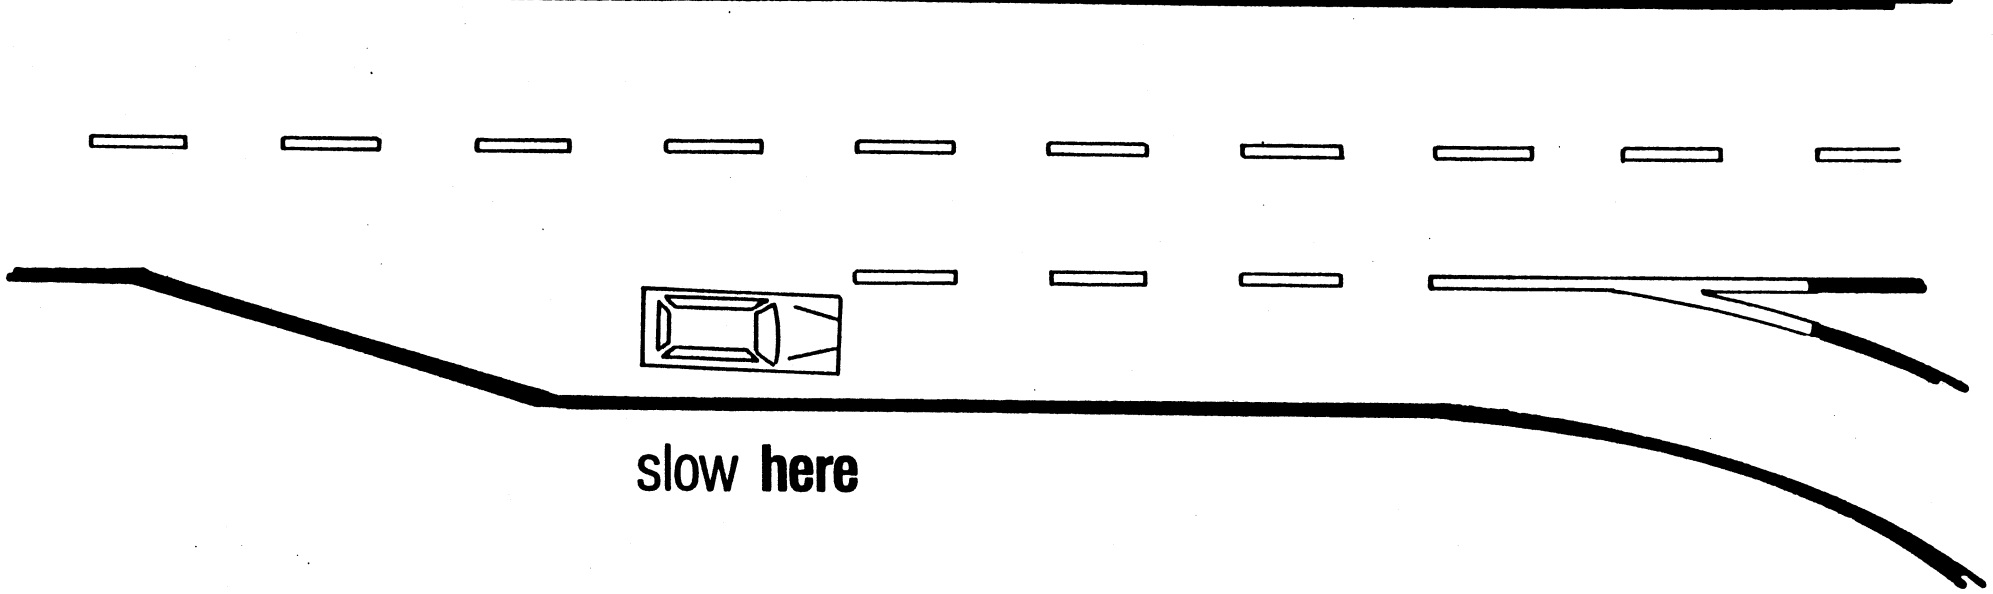


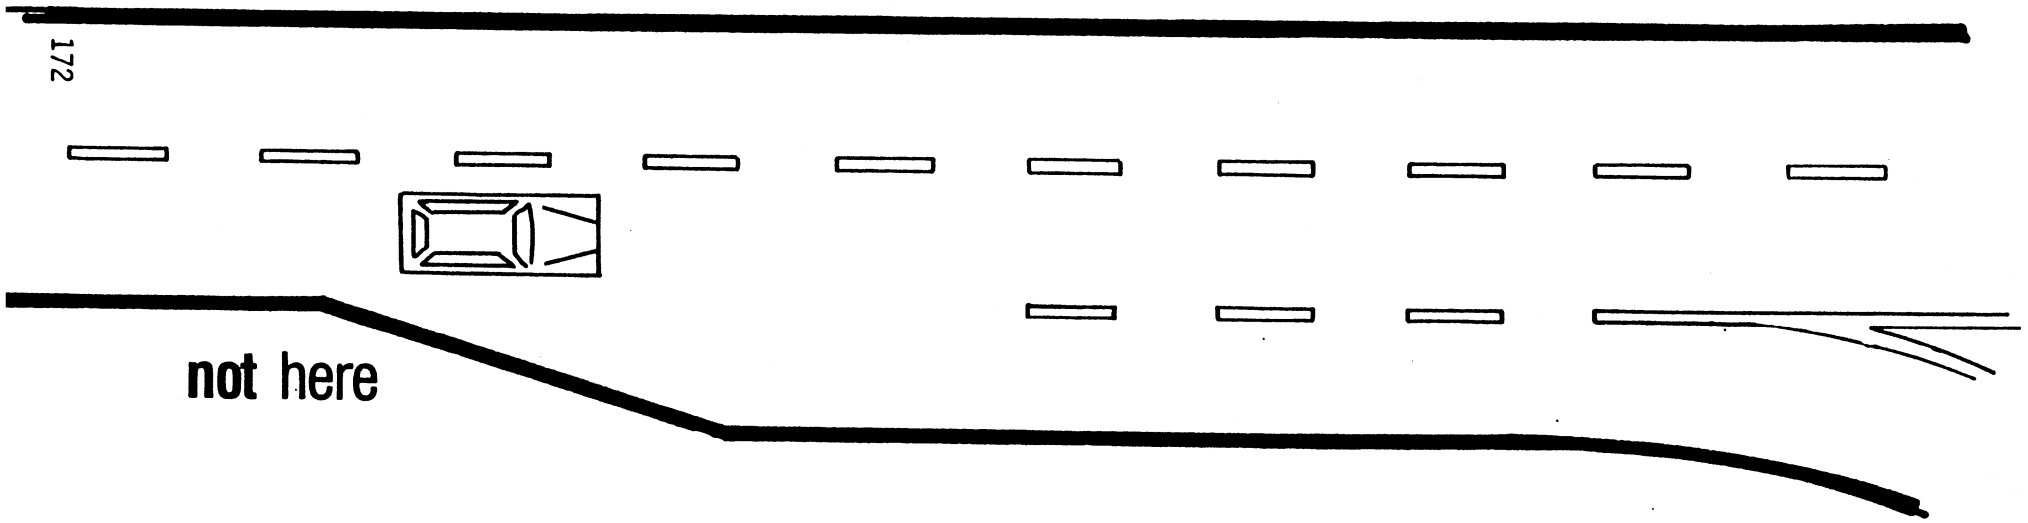
Place flares 100–150
paces behind car
(at least 200 ft.)
. . .or over a hill.

Average Stopping Distance

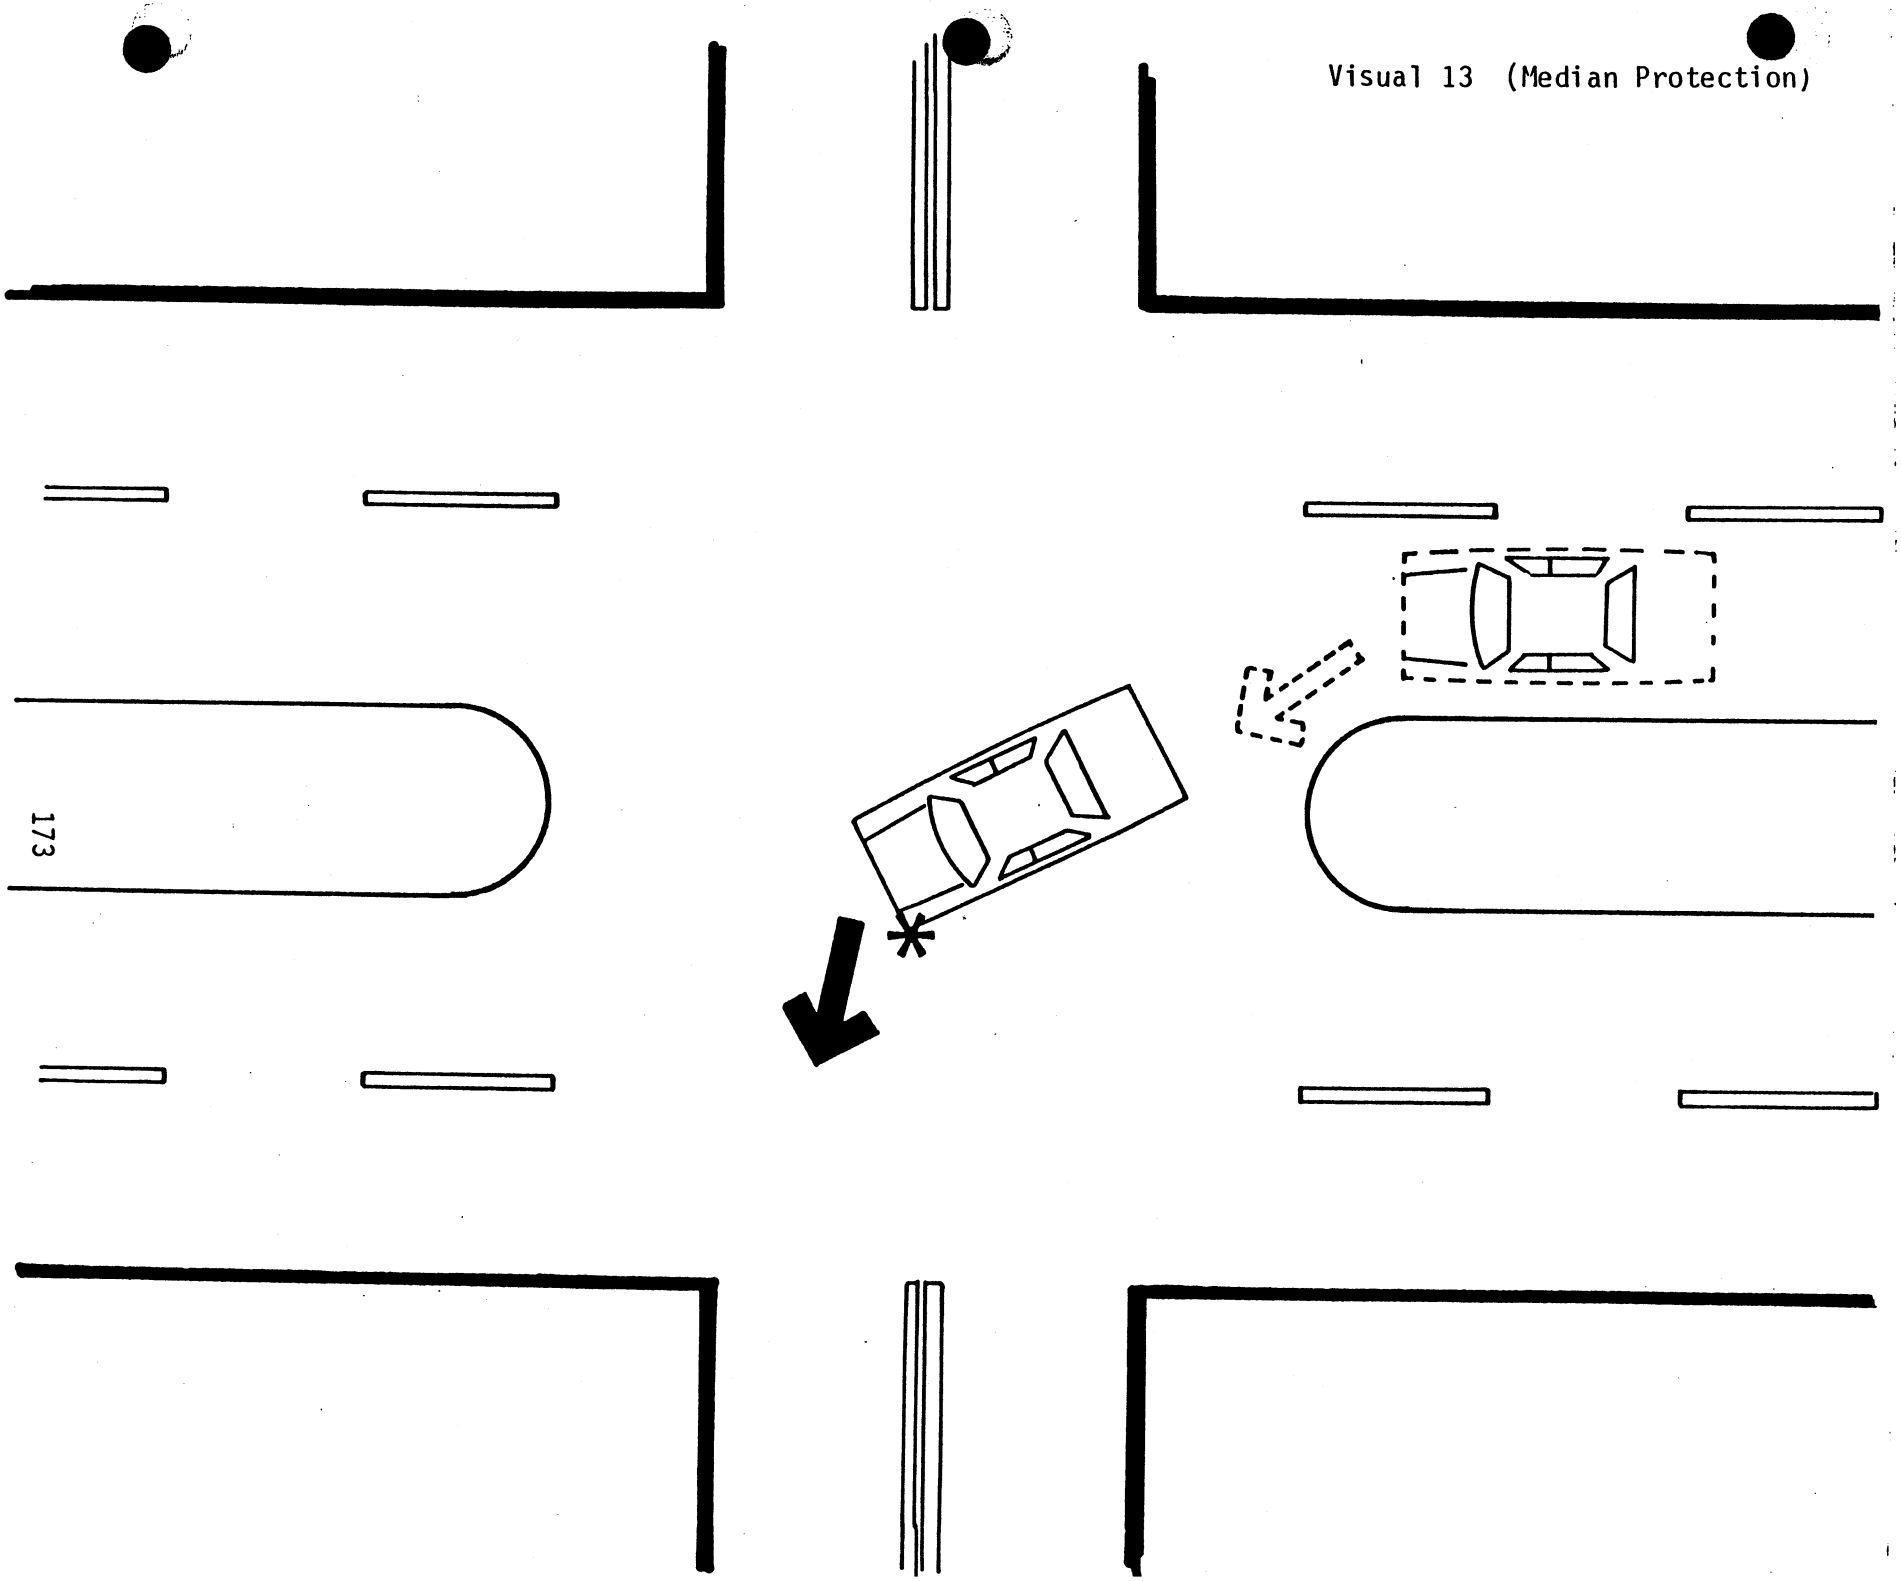


Visual 12 (Leaving Expressway)

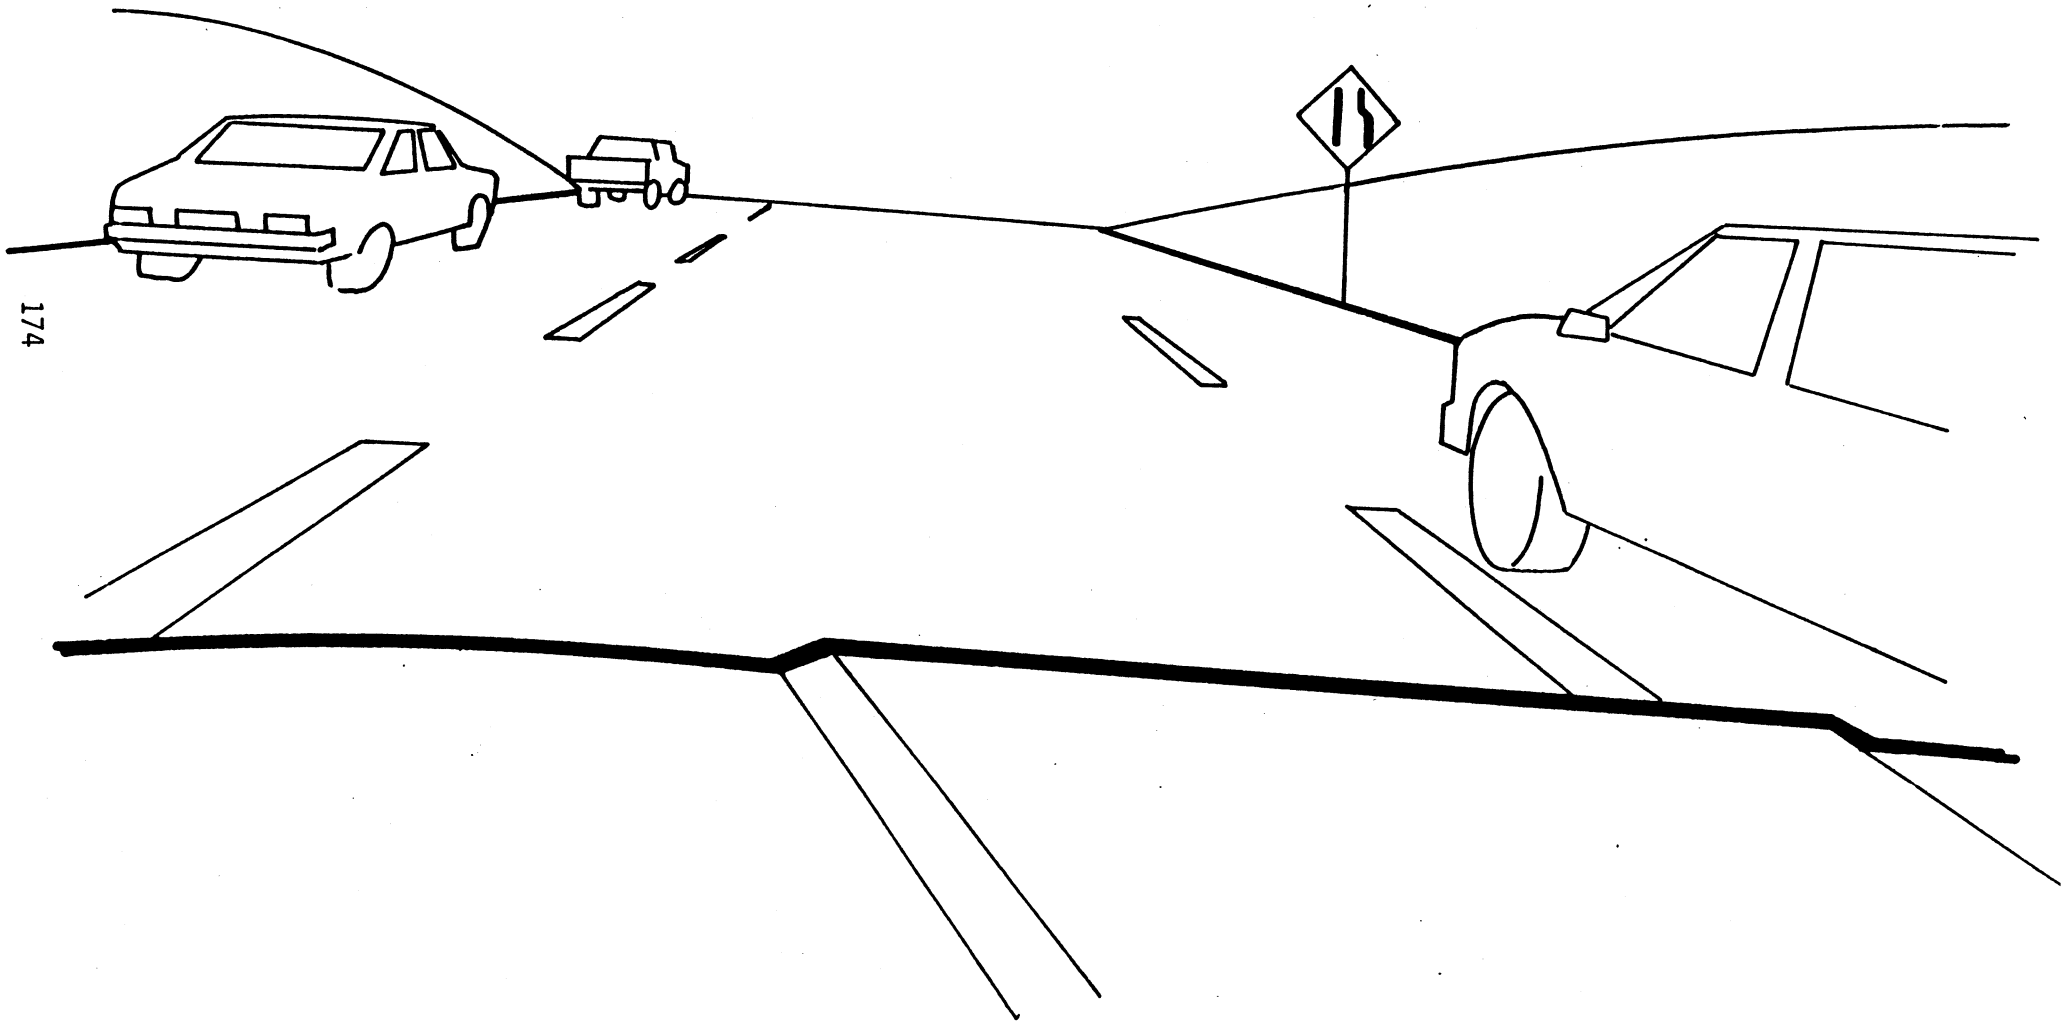




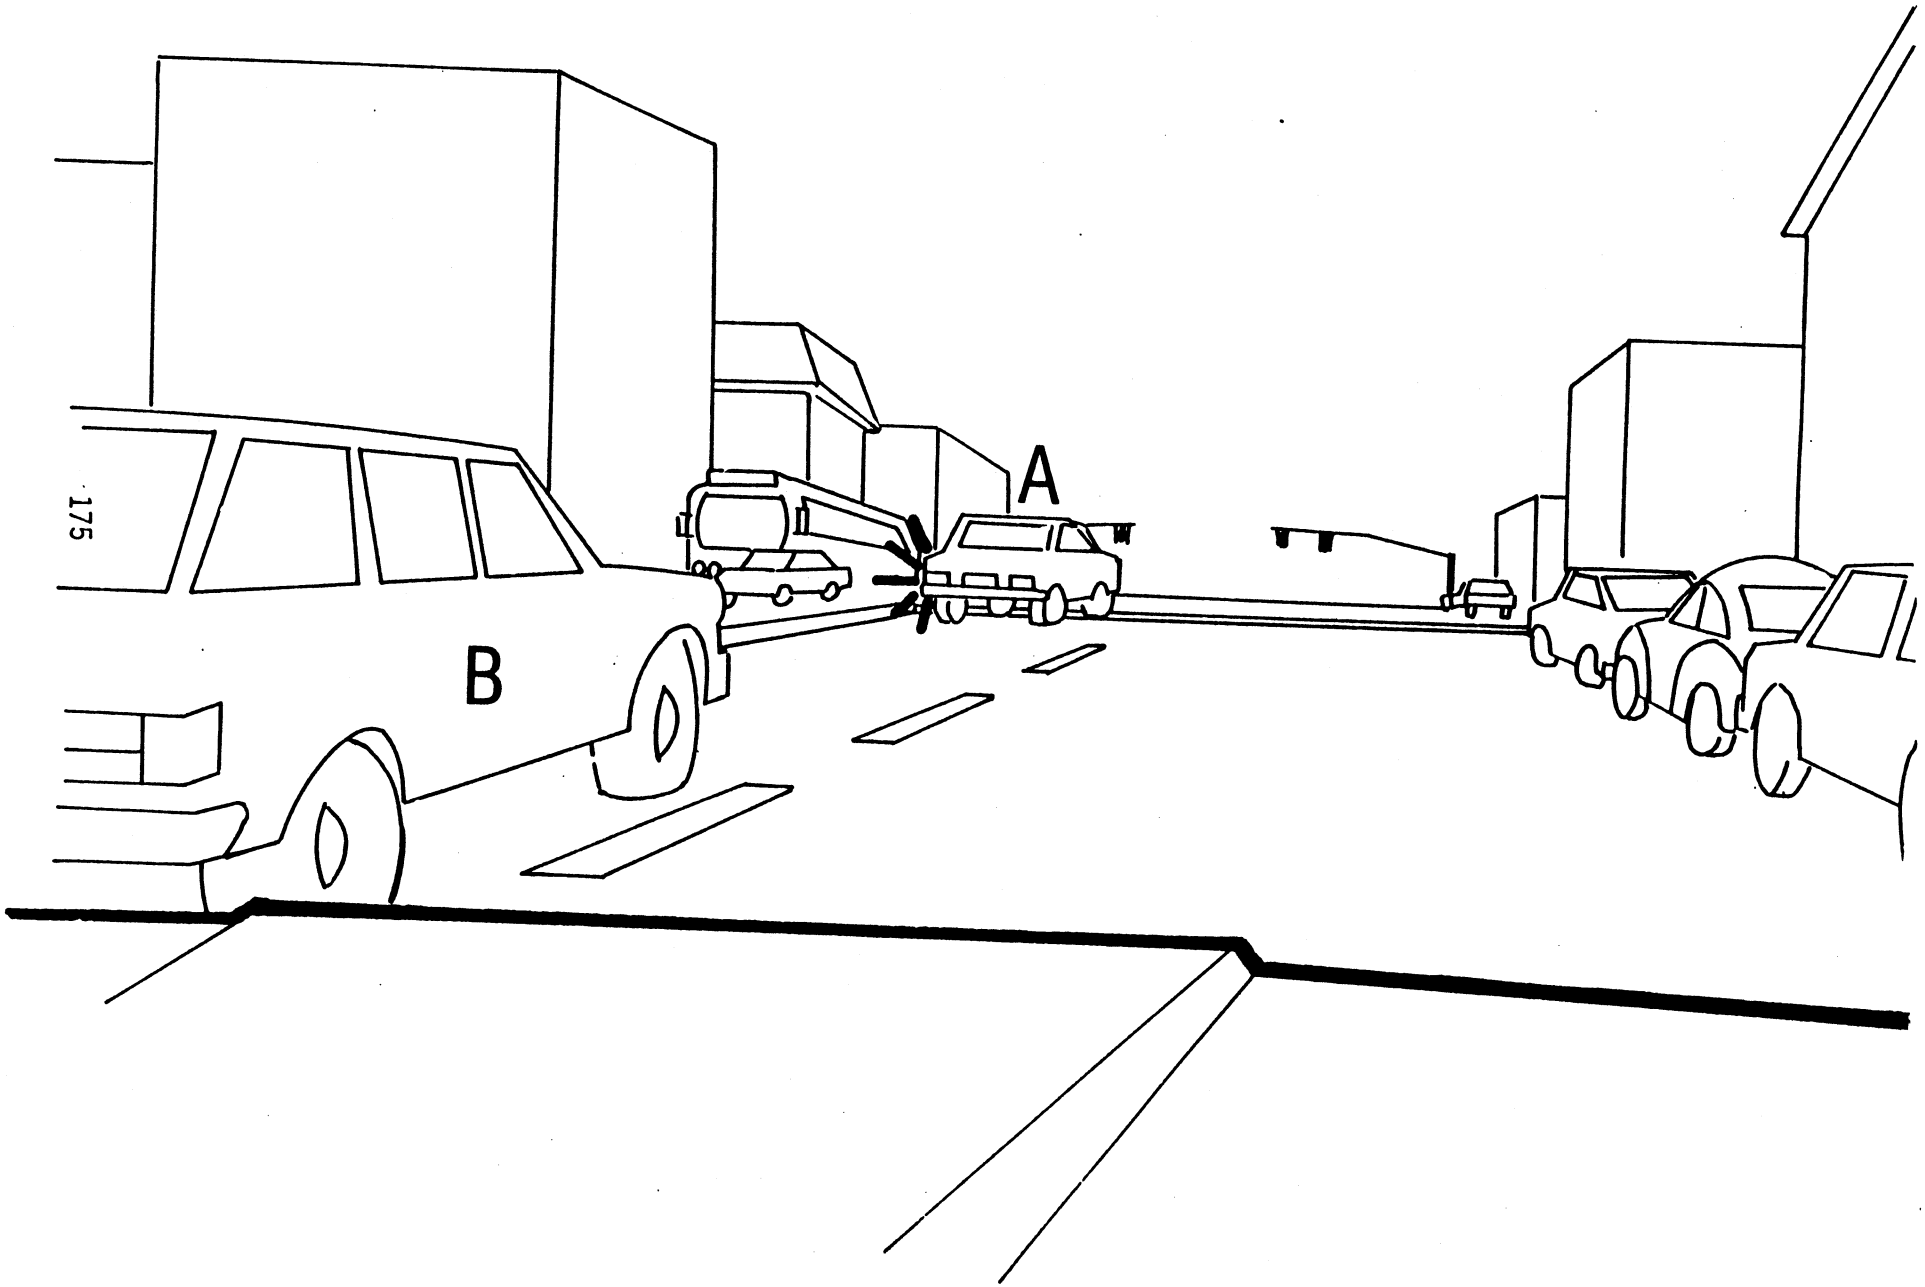
Visual 13 (Median Protection)

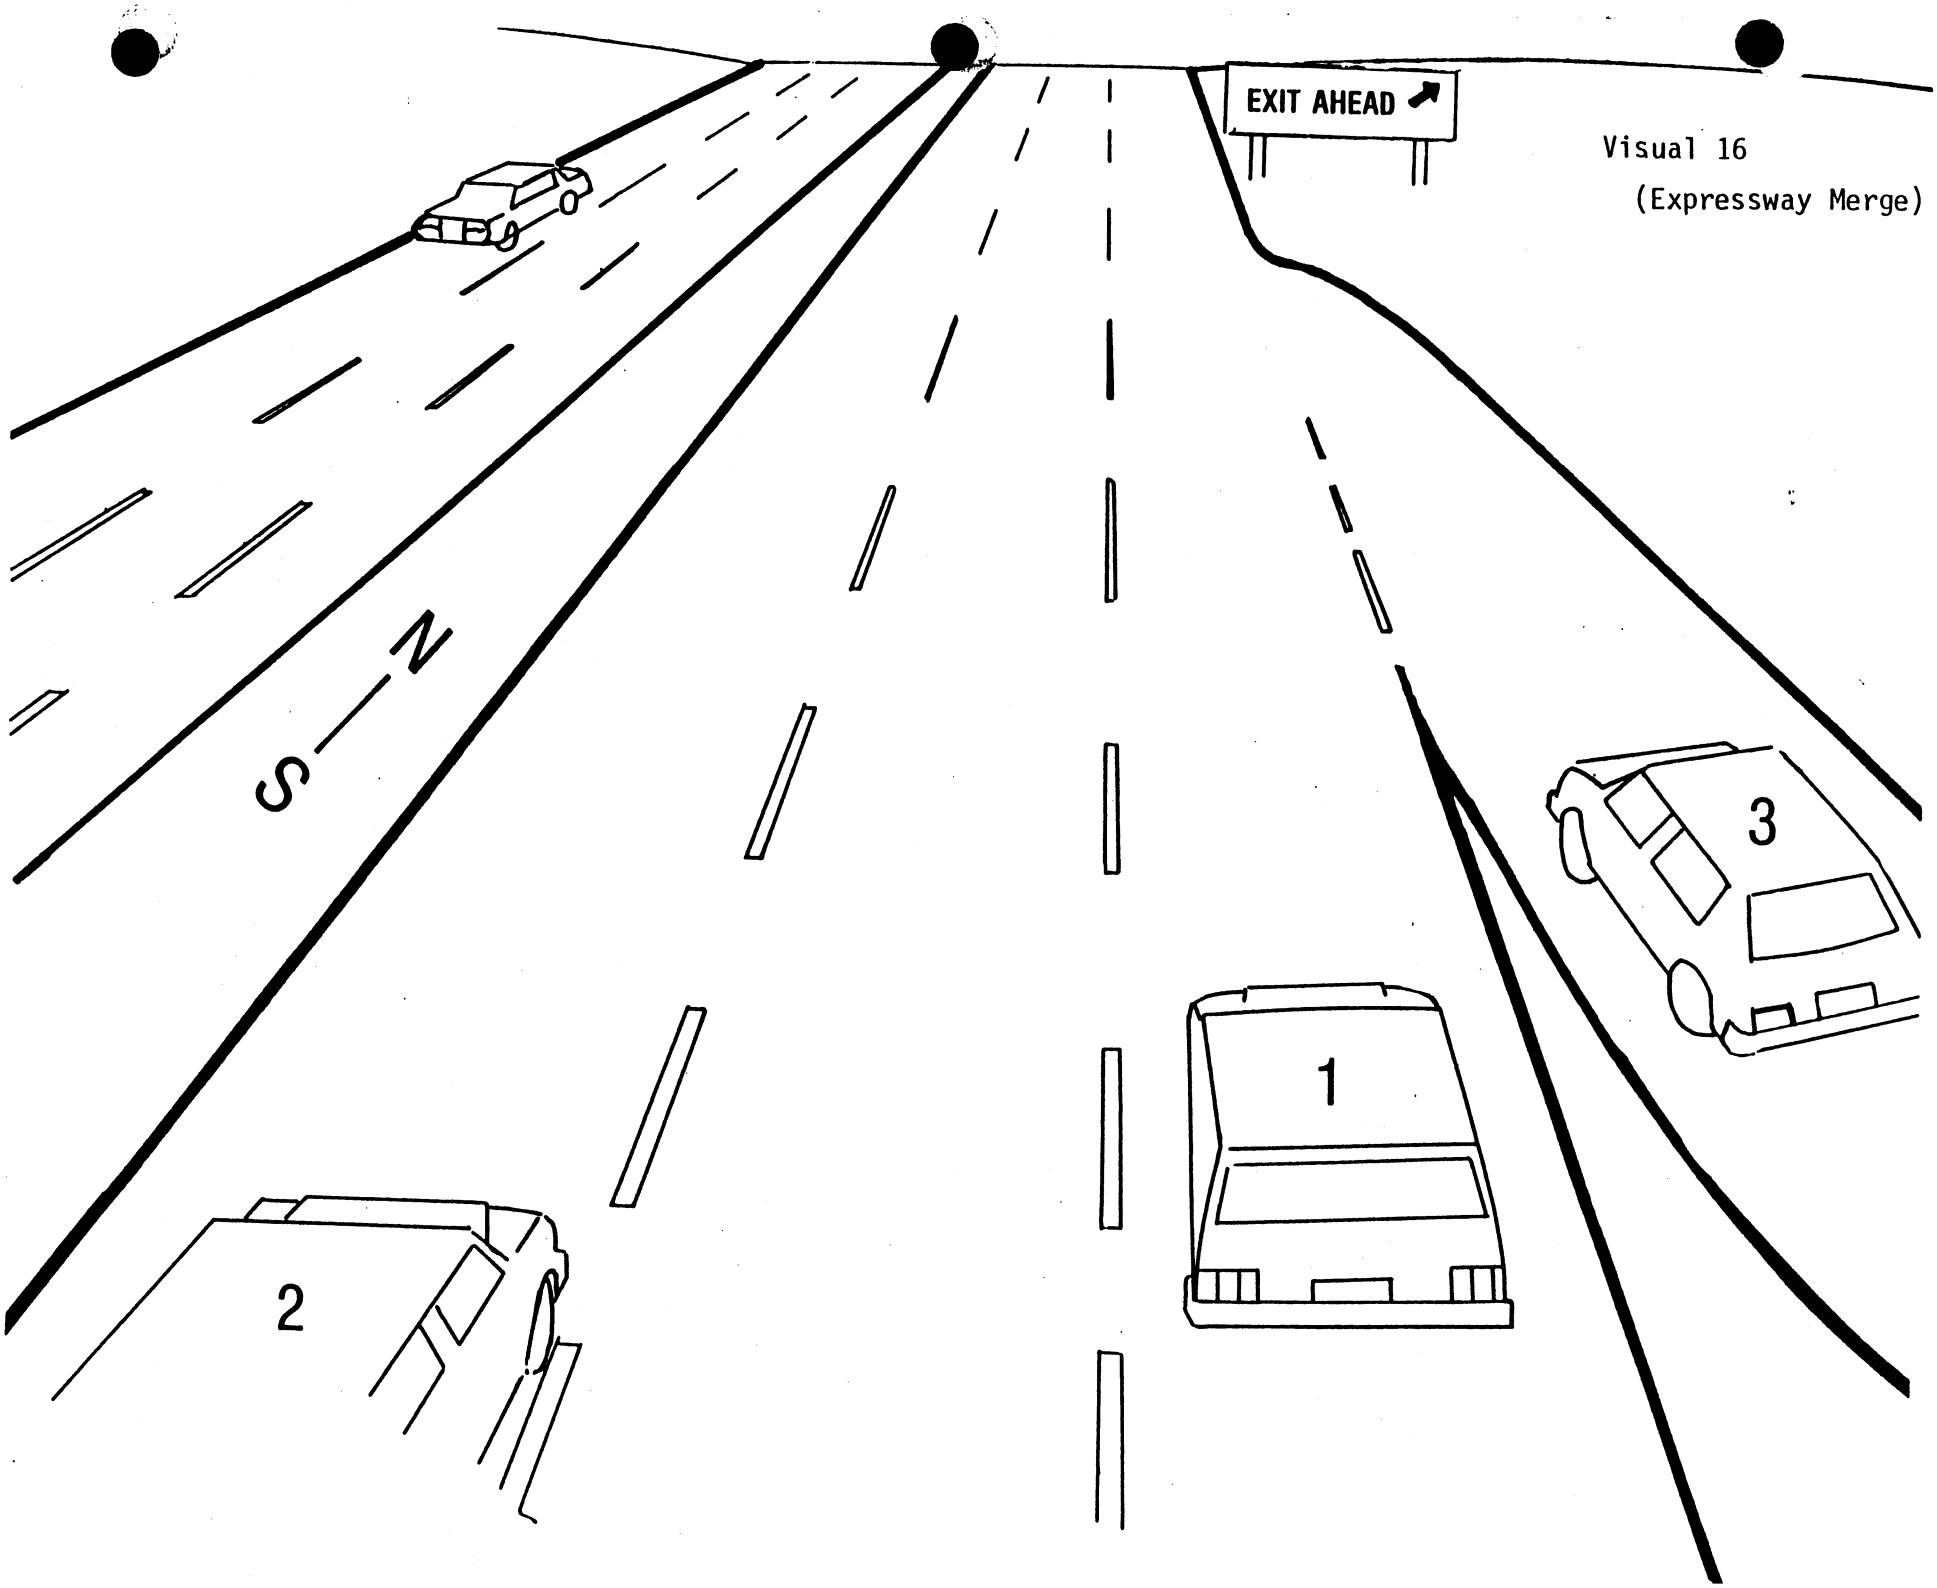


Visual 14 (Lane Drop)



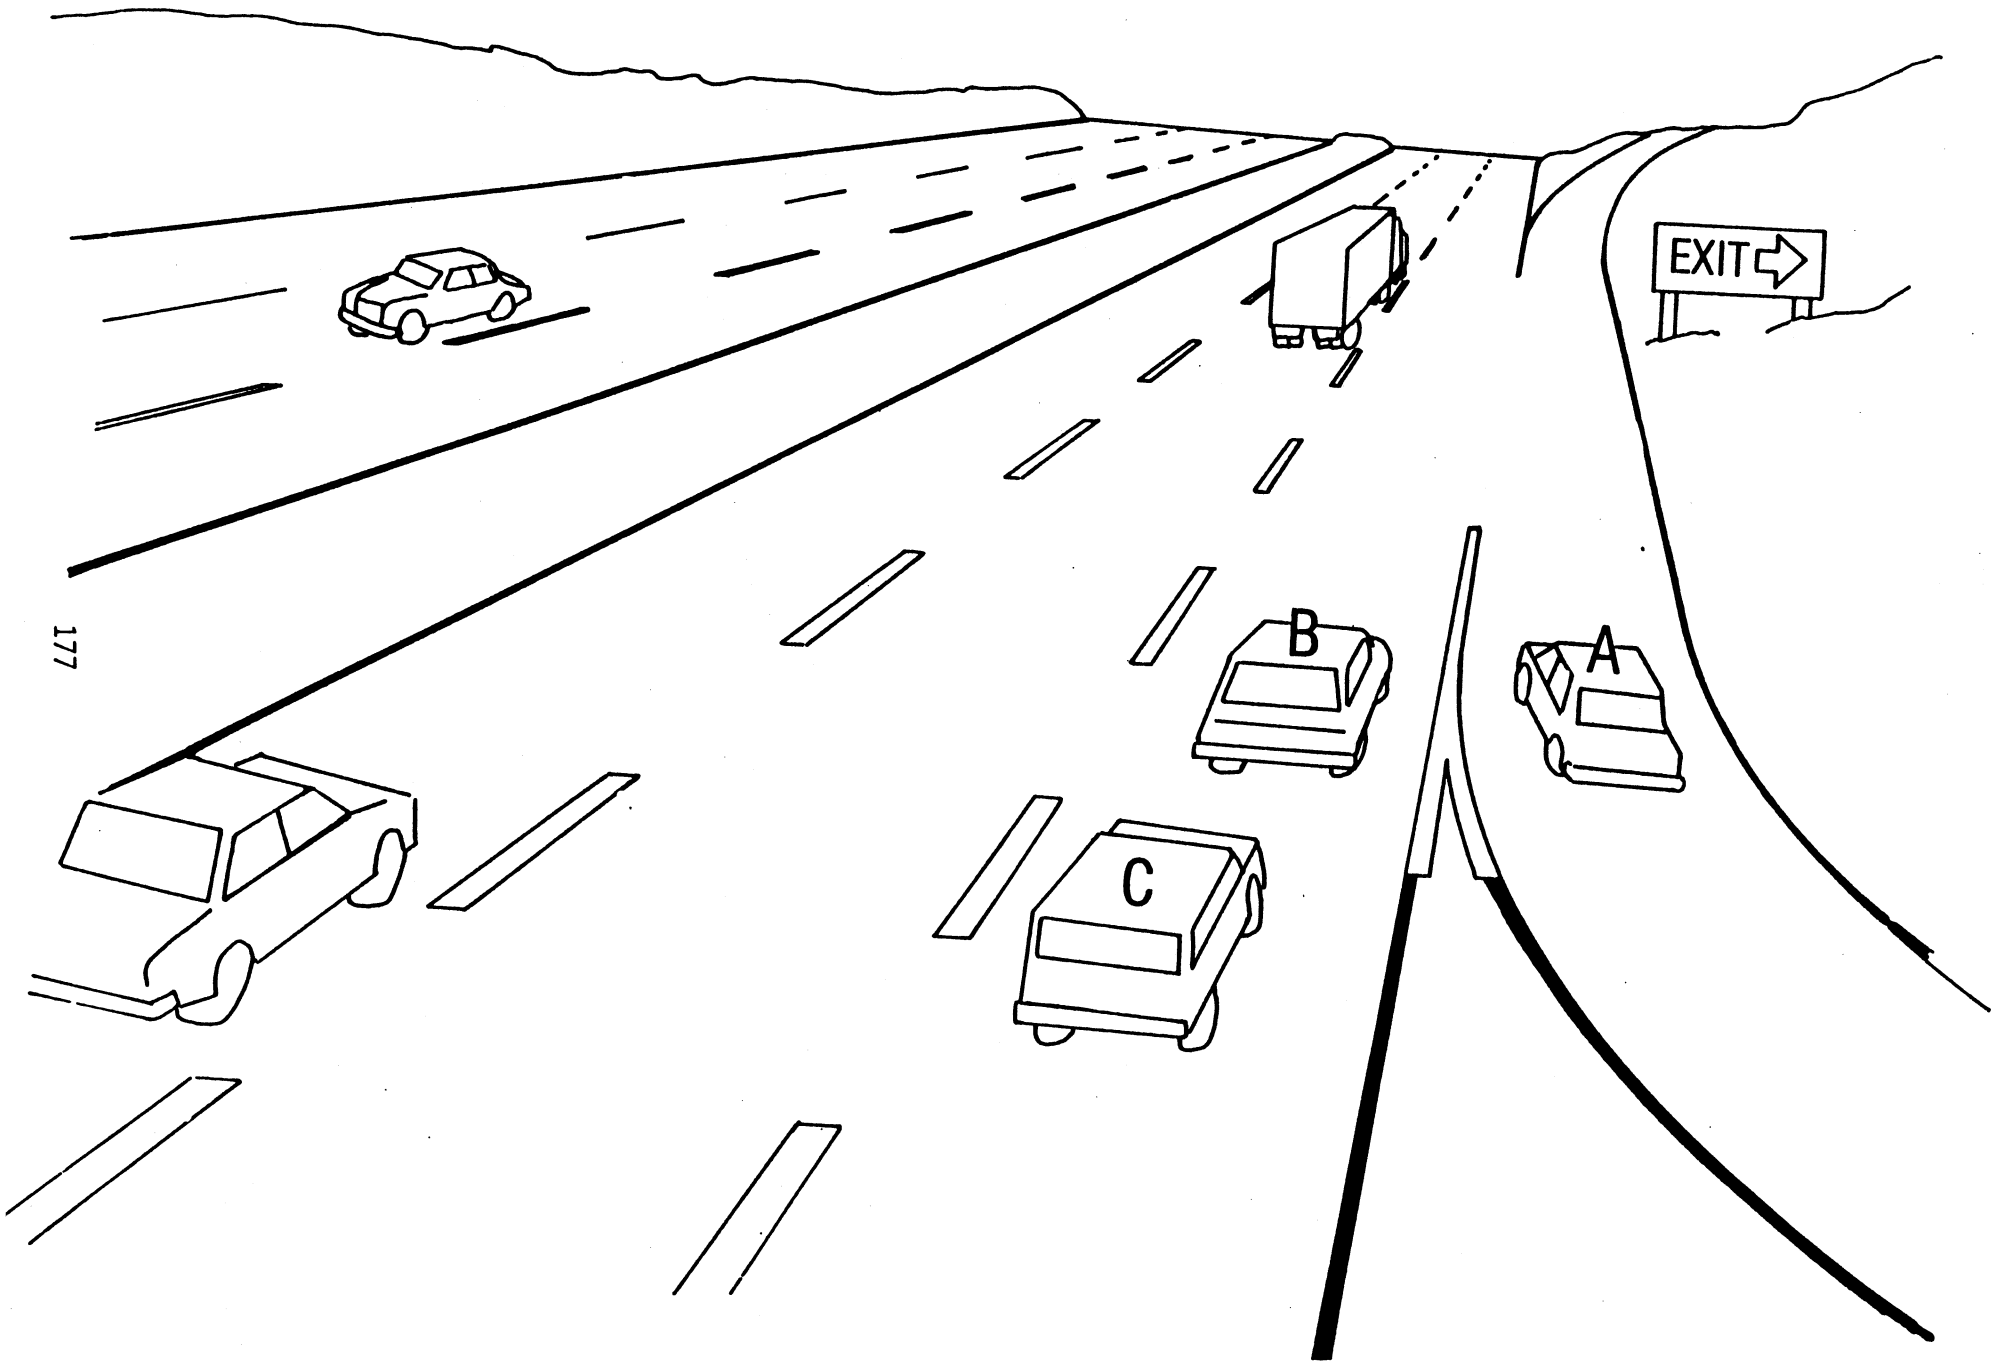
Visual 15 (Left-turning Car)



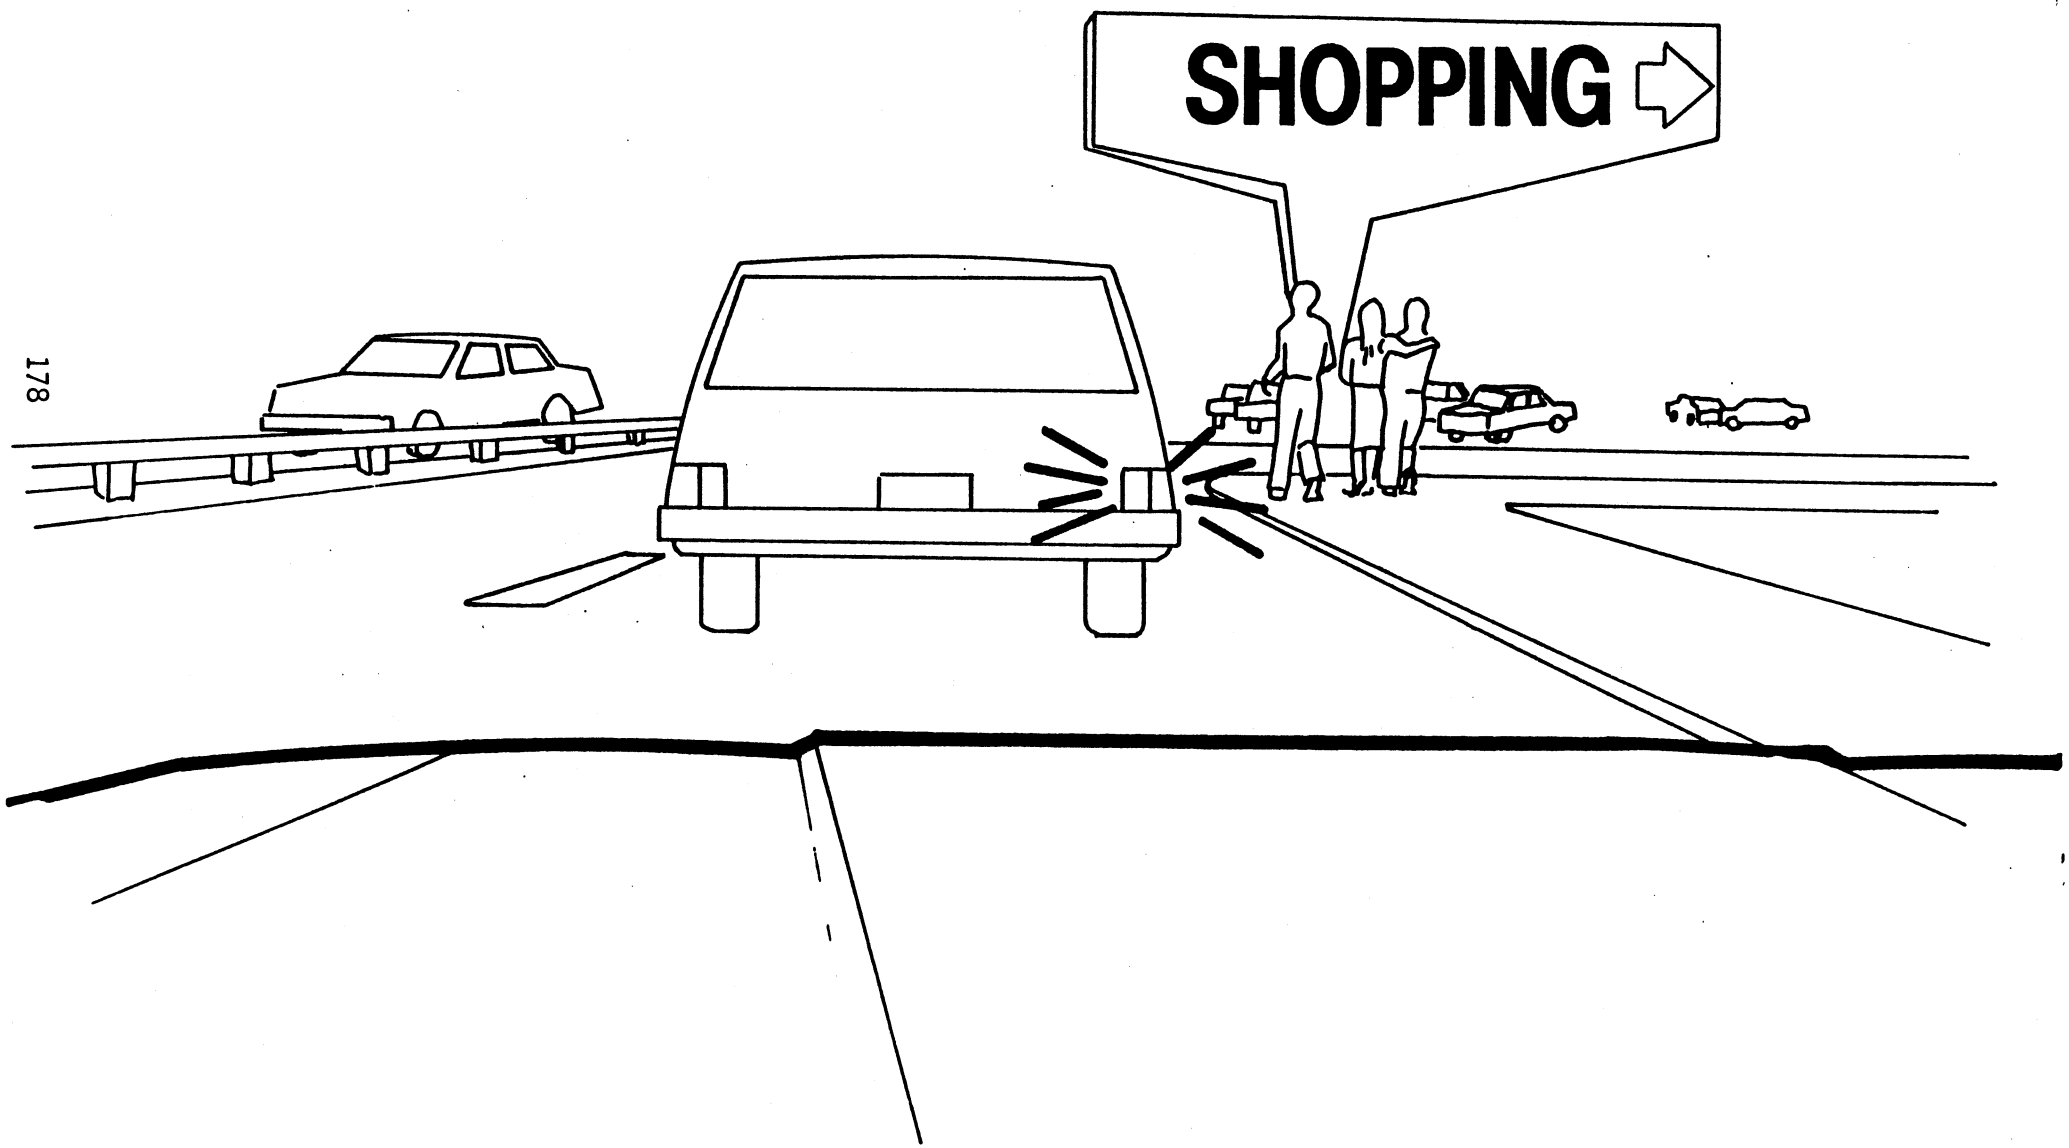


Visual 16
(Expressway Merge)

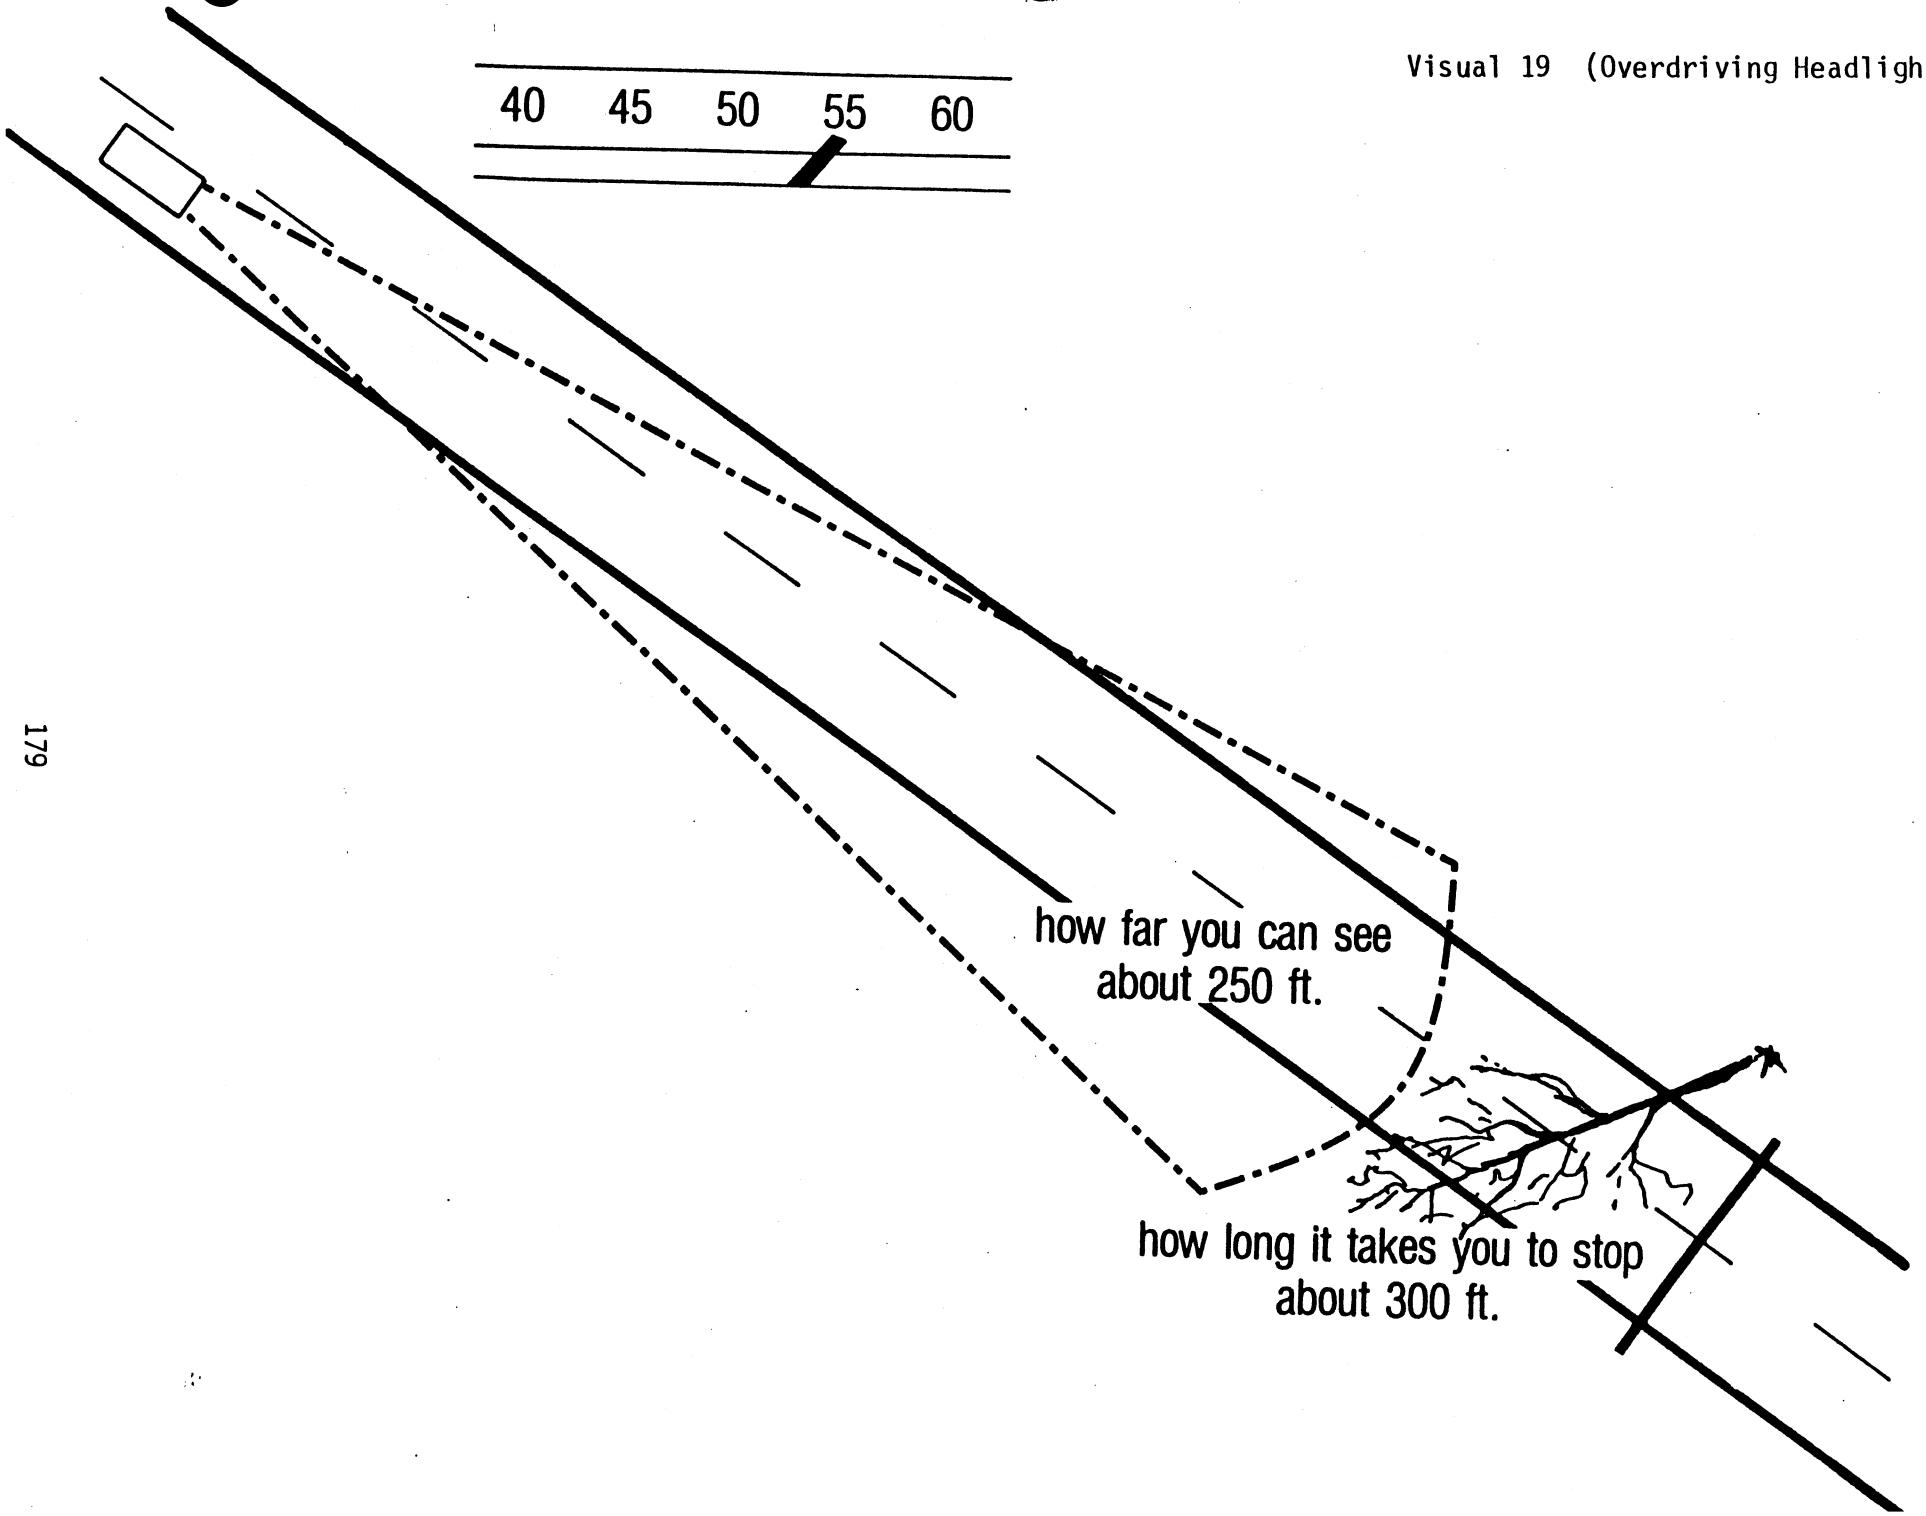
Visual 17 (Entrance/Exit Ramp)

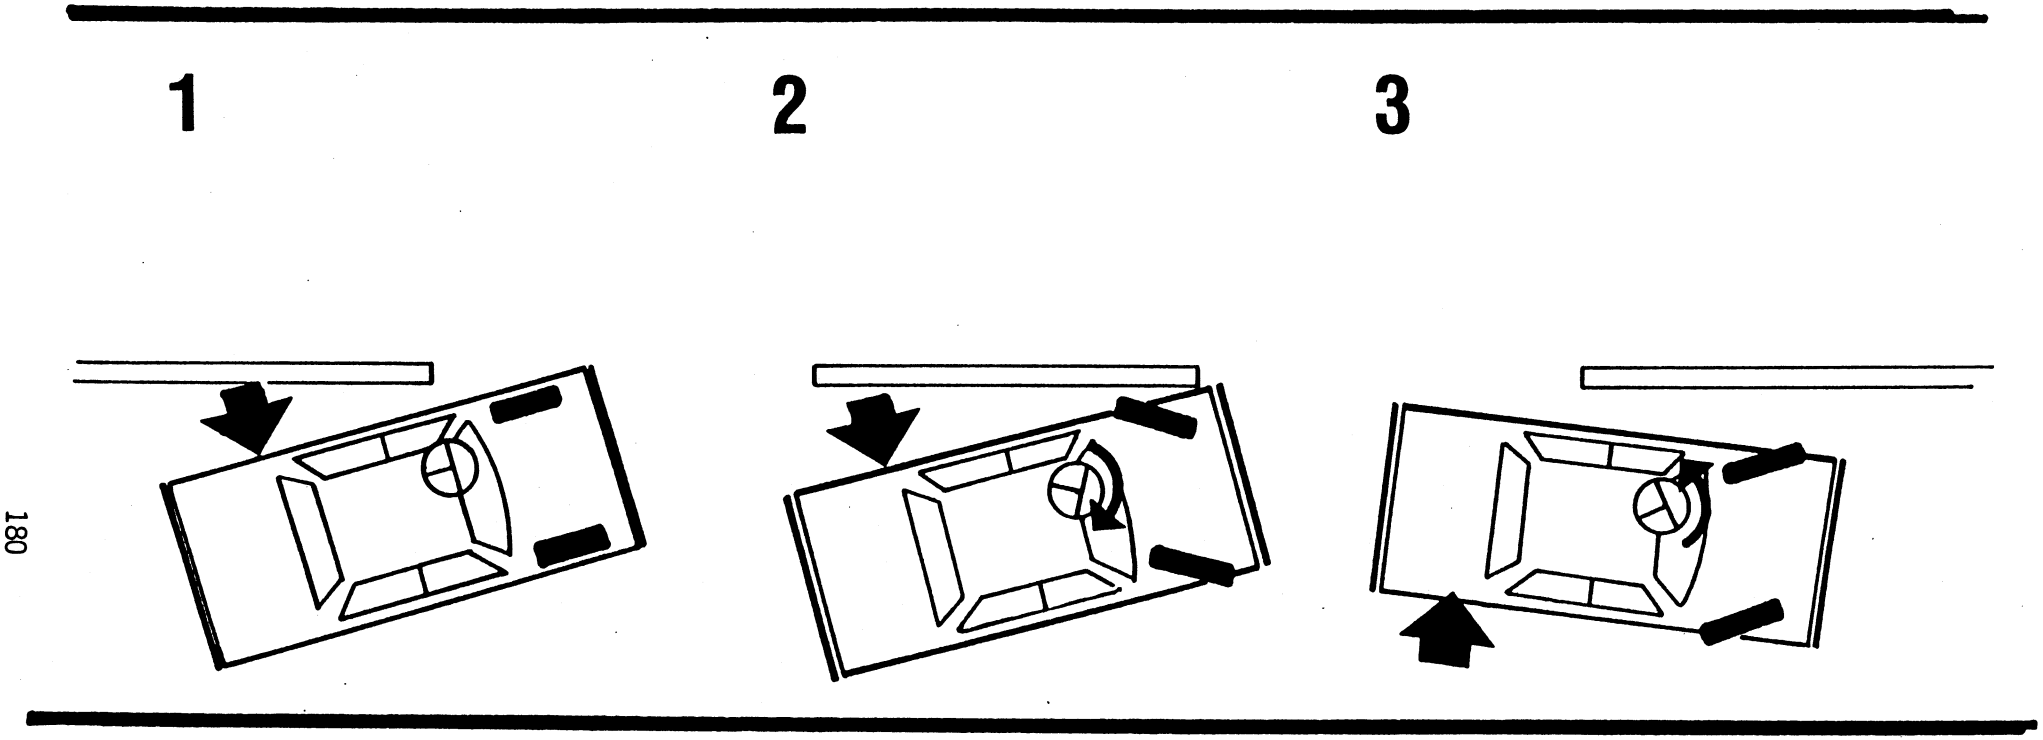


Visual 18 (Shopping Center)



Visual 19 (Overdriving Headlights)



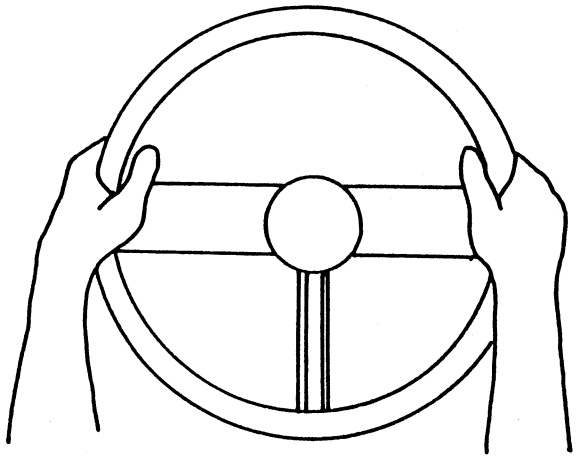


1. Stay off the brake. Braking will make the skid worse.

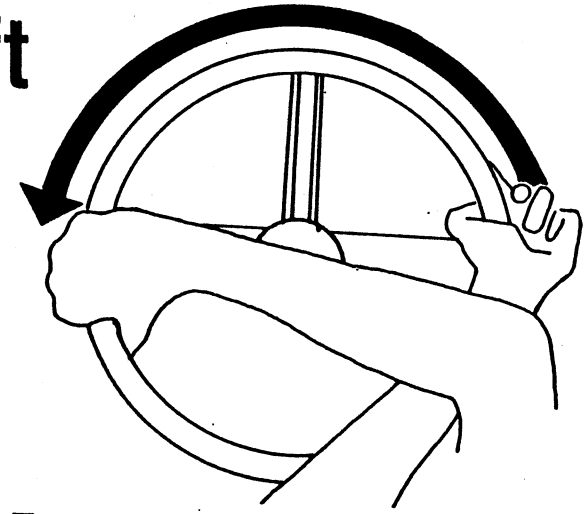
2. Turn the wheel quickly—in the direction you want to go. This lines up the front of the car with the back.

3. Turn back the other way—as soon as the car begins to straighten out. If you don't turn the wheel back, you'll start a new skid.

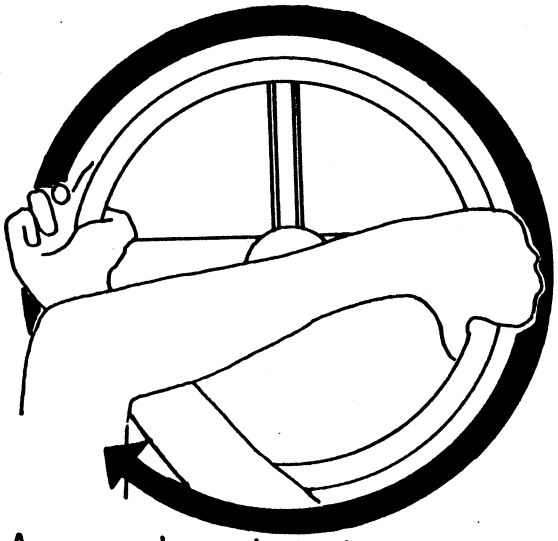
Emergency Turn to the Left



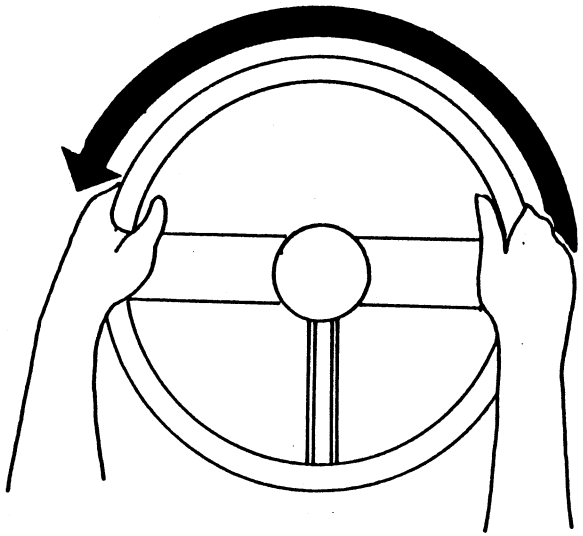
1. Normal hand position for driving.



2. Turn wheel half-circle to the left (to turn away from obstacle).

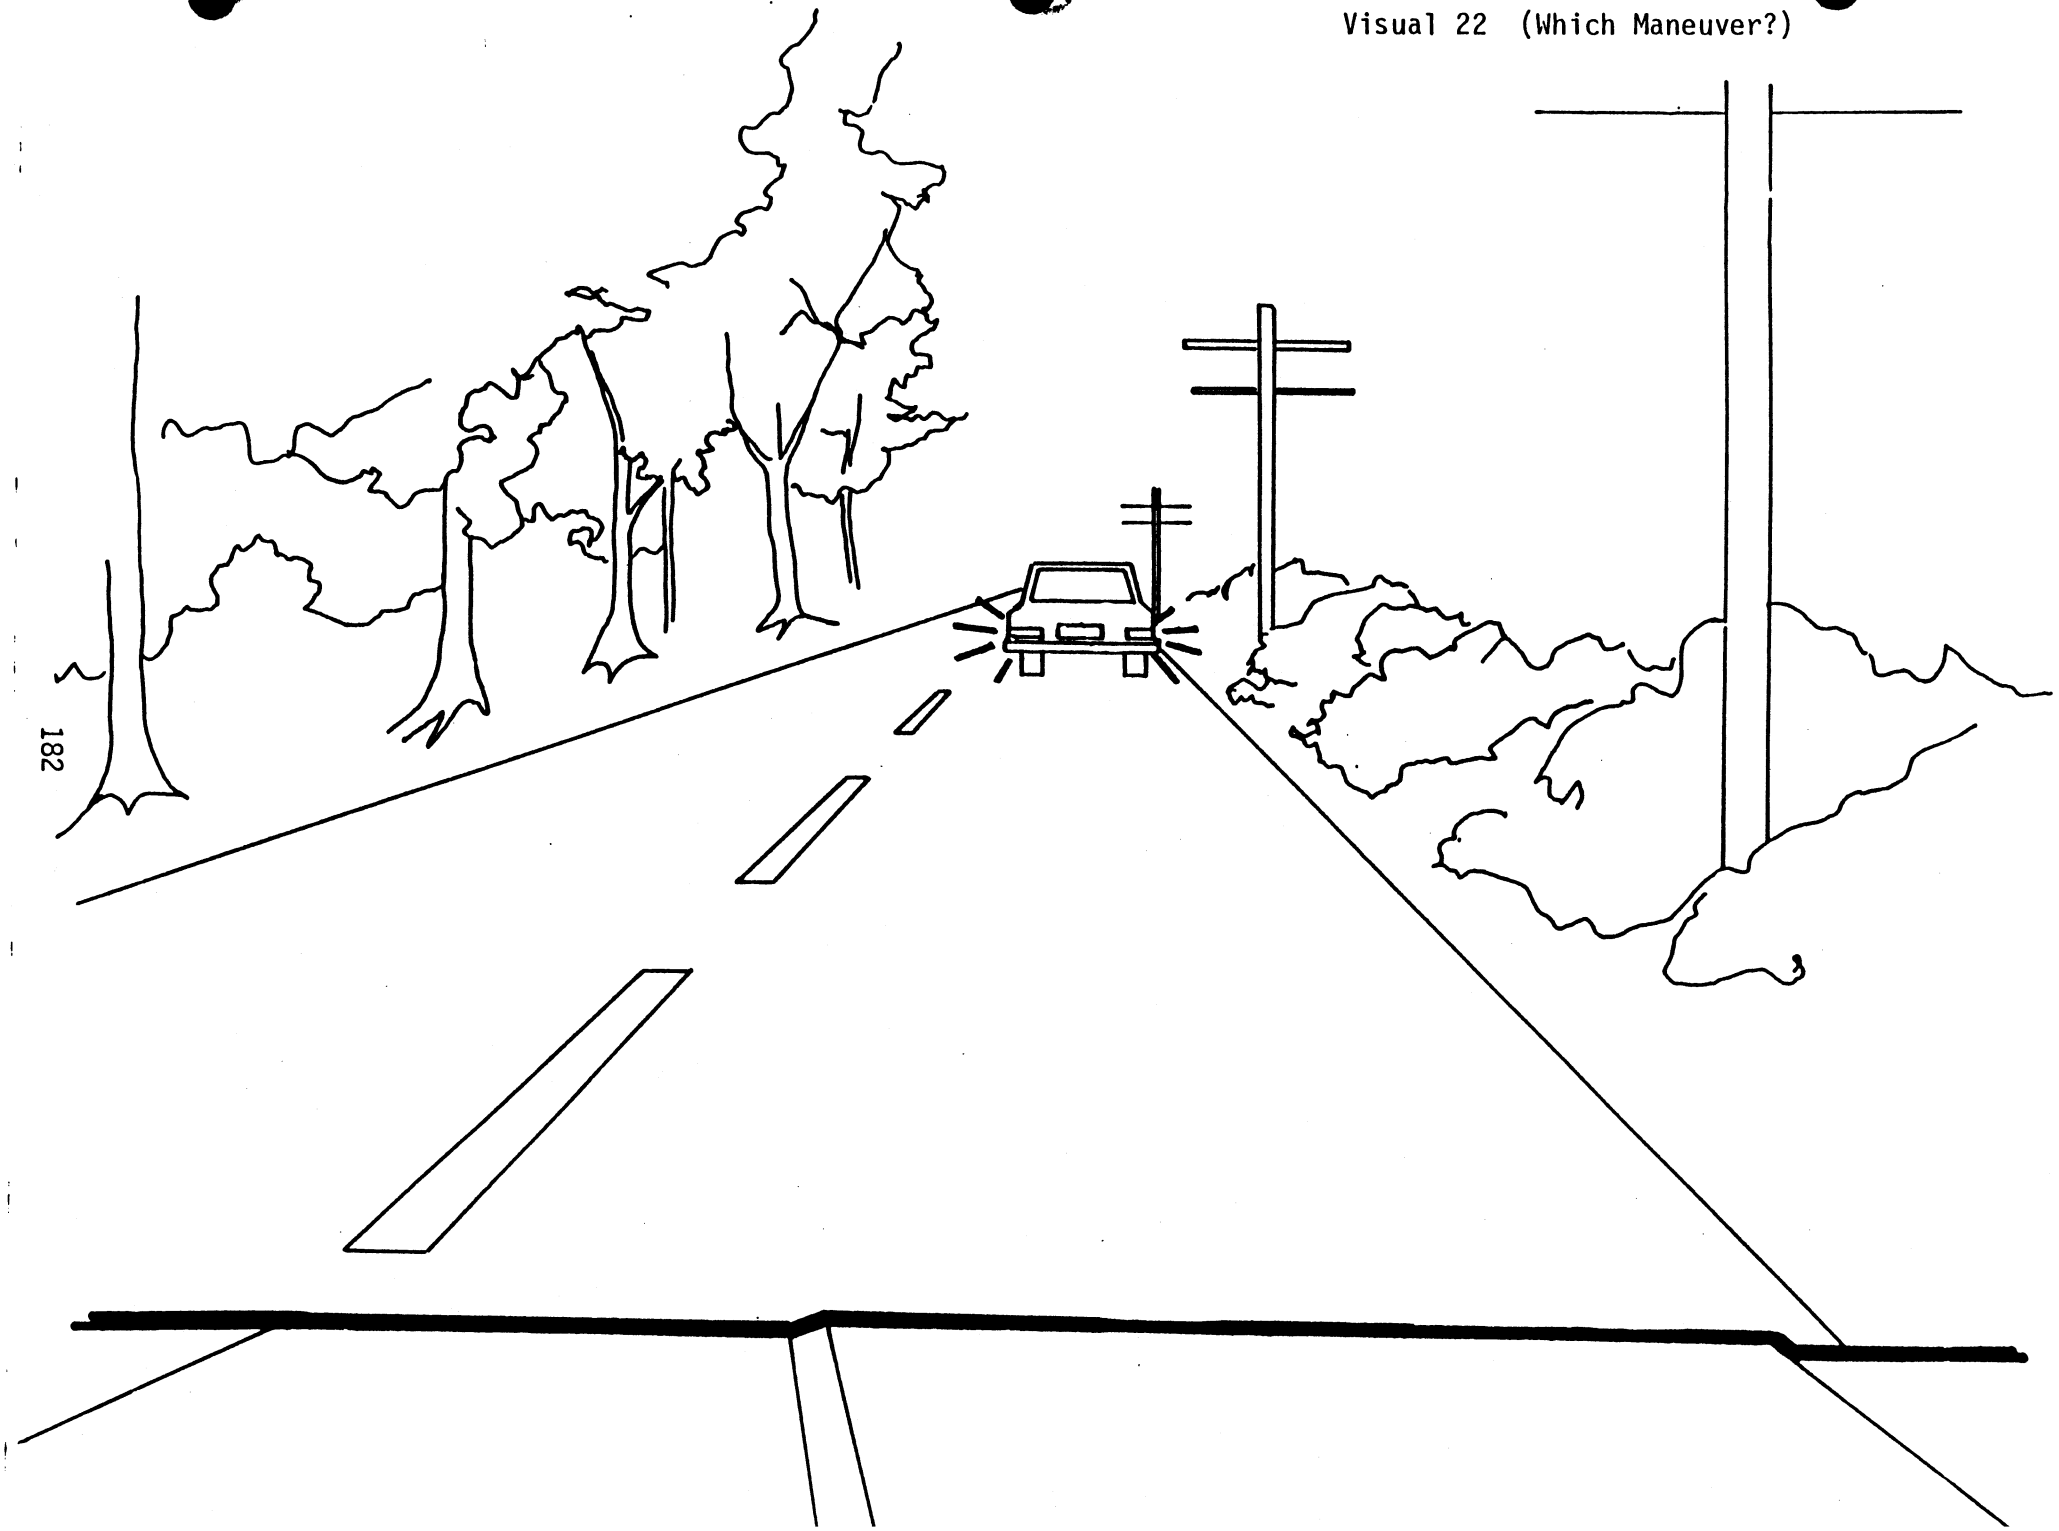


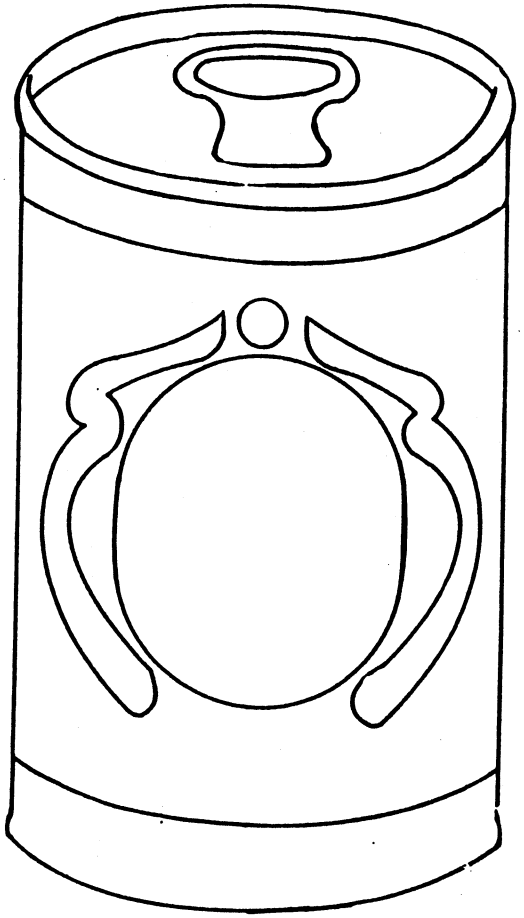
3. As you clear obstacle, turn wheel full-circle to the right (to get back in your lane).



4. As you return to lane, turn wheel left (to straighten out car).

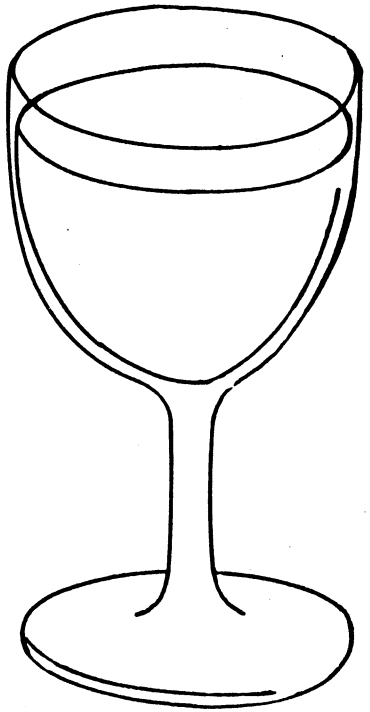
Visual 22 (Which Maneuver?)





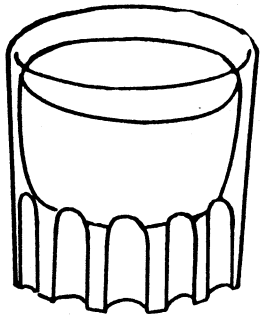
one can of beer

=



one glass of wine

=



one shot of hard liquor

BAC	condition
.01–.04%	affected
.05–.09%	impaired
.10%	intoxicated
