“The preparation of this document was financed in part through a planning grant from the Federal Aviation Administration (FAA) as approved under the Airport and Airway Improvement Act of 1982. The contents of this report reflect the views of the Consultant, which is responsible for the facts and accuracy of the data depicted herein, and do not necessarily reflect the official views or policy of the FAA. Acceptance of this report by the FAA does not in any way constitute a commitment on the part of the United States to participate in any development depicted therein, nor does it indicate that the proposed development is environmentally acceptable in accordance with applicable public laws.”

IOWA AVIATION SYSTEM PLAN - AIRPORT SUMMARY REPORT

This summary is intended to provide a general understanding of the specific information, findings and recommendations from the Iowa Aviation System Plan. An individual airport report was prepared for each public owned airport in Iowa.

INTRODUCTION

The Iowa Department of Transportation Office of Aviation, along with the System Plan Advisory Committee and consultant team, developed a strategic approach by which to identify and evaluate the needs of the Iowa aviation system within the period 2004 to 2024.

The Iowa aviation system is an integral component of the state's transportation network. The aviation system meets aviation and economic needs and links Iowa to the national transportation system. Aviation provides an important and efficient means of transportation for the movement of people and goods. The vision for the Iowa aviation system is to have safe, quality facilities and services that support transportation demands and meet economic development and quality of life needs in the state.

The primary goal of the system plan is to provide a framework that supports informed decisions related to planning and developing the Iowa aviation system. The objectives of this update of the Iowa Aviation System Plan are to:

- Identify and analyze aviation assets, including airspace, ground facilities and services, and needs of the state to assure that aviation performs its role in Iowa's economy and for its citizens.
- Provide continued guidance for development of a system of airports to meet the state's existing and future air transportation needs, projecting five, ten, and 20-year projects and giving guidance to meet needs.
- Build consensus among public policy makers, airport sponsors and users so that the plan's recommendations can be more readily accomplished.

Each airport was assigned to a functional classification. Facility and service objectives were developed for functional classifications. Based on existing facilities and services, recommendations were set forth for each airport.

SYSTEM GOALS

The following five goals and associated performance measures were identified and adopted to guide the Iowa aviation system development and establish the framework for the Iowa Aviation System Plan:

- **Development** – To provide an airport system that meets current and future customer needs.
- **Economic Support** – To promote an aviation system that sustains and enhances Iowa's economy.
- **Safety & Security** – To promote a safe and secure system of airports.
- **Accessibility** – To provide a system of airports that is accessible from both the ground and the air.
- **Education** – To support a system of airports that provides educational and career opportunities and promotes an understanding of the benefits of Iowa's air transportation system.

Performance Measure & Benchmark Summary	
<p>Performance Measure: Development</p> <p><i>Benchmarks</i></p> <ul style="list-style-type: none"> • Airports meeting aircraft storage objectives • Airports meeting aircraft parking objectives • Airports meeting auto parking objectives • Airports with Pavement Condition Index (PCI) rating of 70 or higher on primary runway • Airports with current master plan or Airport Layout Plan (ALP) • Airports included in a local comprehensive plan or with surrounding land use controls/zonings <p>Performance Measure: Economic Support</p> <p><i>Benchmarks</i></p> <ul style="list-style-type: none"> • Airports with jet fuel • Airports with a runway length of 5,500 feet or greater • Airports with rental car services • Airports with a courtesy car available • Airports with a 24-7 fueling (credit card or FBO) • Iowa employment within a 30-minute drive time of Commercial or Enhanced Service airport • Employment growth counties within 30-minute drive time of Commercial or Enhanced Service airport • Airports supporting air cargo • Airports with aircraft maintenance <p>Performance Measure: Safety and Security</p> <p><i>Benchmarks</i></p> <ul style="list-style-type: none"> • Airports with clear approaches to primary runway • Airports with wildlife management plans • Airports with emergency response plans • Airports with perimeter fencing • Airports with controlled access to airfield 	<p>Performance Measure: Accessibility</p> <p><i>Benchmarks</i></p> <ul style="list-style-type: none"> • Airports with precision approaches • Airports with any instrument approach • Airports with approach lighting system (ALS) • Airports with a precision approach and ALS • Iowa's Population within 30 minutes of any system airport • Iowa's population within 30 minutes of a Commercial or Enhanced Service airport • Iowa's population within 30 minutes of a General Service airport • Iowa's population within 30 minutes of an airport with a non-precision approach • Iowa's population within 30 minutes of an airport with a precision approach • Iowa's population within 30 minutes of an airport with onsite weather reporting equipment • Iowa's population within 60 minutes of an airport with one or more scheduled commercial airlines • Iowa's population within 120 minutes of an airport with two or more scheduled commercial airlines • Iowa's population within 120 minutes of an airport with two or more scheduled commercial airlines or 60 minutes of an airport with one or more scheduled commercial airlines <p>Performance Measure: Education</p> <p><i>Benchmarks</i></p> <ul style="list-style-type: none"> • Airports with on-site flight instruction • Aviation related training programs connected with local schools • Airports with public outreach/educational (following National Air Transportation Association (NATA,) National Business Aircraft Association (NBAA,) and Aircraft Owners and Pilots Association (AOPA) guidelines) programs, or hosting functions to bring the non-flying public to the airport

AIRPORT FUNCTIONAL ROLES

Airports within any transportation system contribute to meeting air transportation and economic needs in different ways and at varying levels. While each airport within a system contributes in some way, airports fill different roles. Because airports in the Iowa aviation system play different roles, their needs for facilities and services also vary accordingly.

With input from the Iowa DOT Office of Aviation and the System Plan Advisory Committee, each public owned airport in Iowa was assigned to one of five roles.

RECOMMENDED FUNCTIONAL AIRPORT ROLES

- **Commercial Service Airports** – these airports support some level of scheduled commercial airline service and they support a full range of general aviation aircraft to virtually all domestic and possibly some international destinations.
- **Enhanced Service Airports** – these airports support almost all general aviation aircraft, including most types of business jets; these airports generally serve as transportation centers and economic catalysts for the State.
Facility and service objectives: 5,500' x 100' runway, parallel taxiway, precision approach, approach lighting, AWOS/ASOS, covered aircraft storage, jet and aviation fuel, full service FBO, and ground transportation
- **General Service Airports** – these airports support most twin and single engine general aviation aircraft and may experience occasional use by business jets. These airports support regional and in-state air transportation needs and local economic development.
Facility and service objectives: 4,000' x 75' runway, partial parallel taxiway or turnarounds, non-precision approach, AWOS/ASOS, covered aircraft storage, jet and aviation fuel, limited service FBO, and ground transportation.
- **Basic Service Airports** – these airports support primarily single engine general aviation aircraft but may also sometimes accommodate smaller twin-engine general aviation aircraft. These airports support local air transportation, and special use aviation activities.
Facility and service objectives: 3,000' x 60' runway (paved), 2,500' runway (turf), exits as needed, visual approach, covered aircraft storage, and aviation fuel.
- **Basis Service II Airports** – These airports support local air transportation, special use aviation activities, and may duplicate services in the area.
No facility and service objectives are specified for these airports.

AIRPORT FACILITY AND SERVICE OBJECTIVE

Airport facility and service objectives were established for the functional roles. These objectives were developed with input from the Iowa DOT Office of Aviation and System Plan Advisory Committee. The facility and services objectives should not be considered a requirement or development standard. Current airport facilities and services were compared to the facility and service objectives. Where existing facilities and services do not meet or exceed the objectives, consideration may be given by the airport owner to develop future facility and services improvements. Development of some facilities would require local support and justification of need through development of an airport master plan or through the environmental documentation process.

No state or federal funding resources are guaranteed or committed by inclusion of specific facility and service improvements in this report.

Facility and service objectives for commercial service airports should, at minimum, equal those developed for enhanced service airports as well as recommendations set forth in a current Airport Master Plan.

Basic Service II airports should meet state minimum safety standards: Runway width 50', visual approach 20:1, wind indicator, and 24 hour public telephone. Additional facility and service objectives were not established for Basic Service II airports.

The following table sets forth the facility and service objectives for Enhanced Service, General Service, and Basic Service airports.

FACILITY AND SERVICE OBJECTIVES

	Enhanced Service Airports	General Service Airports	Basic Service Airports
Airport Reference Code (ARC)	C-II	B-II	B-I or Below
Runway Length (Primary)	Minimum 5,500 feet	Minimum Length 4,000 feet	3,000 feet Paved; 2500 feet Turf
Runway Width	100 feet	75 feet	60 feet Paved; 120 feet Turf
Taxiway	Full Parallel	Partial or Turnarounds	Exits as Needed
Approach	Precision	Non-Precision	Visual
Runway Lighting	MIRL/HIRL	MIRL	LIRL (Pilot Controlled)
Taxiway Lighting	MITL/HITL	LITL	Not An Objective
Weather Reporting	AWOS/ASOS	AWOS/ASOS	Not An Objective
Approach Aids	ALS	ALS	Not An Objective
Visual Guidance Slope Indicator (VGSI)	Both Runway Ends	Both Runway Ends	Not An Objective
Runway End Identifier Lights (REILS)	Both Runway Ends	Both Runway Ends	Not An Objective
Rotating Beacon	Rotating Beacon	Rotating Beacon	Not an Objective
Lighted Wind Indicator	Lighted Wind Indicator	Lighted Wind Indicator	Lighted Wind Indicator/Wind Sock
RCO Facilities	RCO Facilities	Not an Objective	Not an Objective
Other Pavement Strength	To Be Determined	To Be Determined	To Be Determined
Covered Storage	For 100% of Based Aircraft	100% of Based Aircraft	100% of Based Aircraft
Aircraft Apron	100% of Daily Transient	50% of Daily Transient	50% of Daily Transient
Terminal/Administration Bldg.	Yes	Not An Objective	Not An Objective
Auto Parking	Spaces equal to 100% of Based Aircraft (paved)	75% of Based Aircraft	50% of Based Aircraft
Fencing	Perimeter	Not An Objective	Not An Objective
Other	Building for Airport Maintenance Equipment	Not An Objective	Not An Objective
Fuel	100LL & Jet A - 24 Hour	100LL & Jet A 24 Hour (as needed)	100LL
FBO	Full Service - 24 Hour	Limited	Not An Objective
Ground Transportation	Rental Car, Taxi or Other	Courtesy Car/Off Site Rental Car	Not An Objective
Food Services	Vending	Vending	Not An Objective
Phone	Yes	Yes	Yes
Restroom	Yes	Yes	Yes
Pilot Lounge	Yes with Weather Reporting	Yes with Weather Reporting	Not An Objective
Security*	*	*	*
Snow Removal	Snow Removal	Snow Removal	Yes

**FORT MADISON MUNICIPAL AIRPORT (FSW)
INDIVIDUAL SUMMARY REPORT**

The Fort Madison Municipal Airport is owned and operated by the City of Fort Madison and is included in the National Plan of Integrated Airport Systems (NPIAS). The NPIAS designates the Fort Madison Municipal Airport as a general aviation airport. The State Aviation System Plan identifies the Fort Madison Municipal Airport as a General Service Airport.

General aviation airports in Iowa provide an important means of accessing the communities and regions they serve and provide a link to the national transportation system. The Fort Madison Municipal Airport serves the general aviation needs of northern Lee County and the City of Fort Madison. The airport is utilized by single engine and multi-engine aircraft. The airport offers a part time fixed-base operator (FBO) with fueling (100LL & Jet A) and flight instruction. The airport also offers aircraft parking and hangar storage.

A variety of aeronautical activities occur at the Fort Madison Municipal Airport including: personal travel, business travel, agricultural and medical transport.

LOCATION MAP

The Fort Madison Municipal Airport is located in northeast Lee County approximately 2 miles north of the City of Fort Madison. Local access is provided via County Road X-32.

EXISTING FACILITIES

The Fort Madison Municipal Airport supports two runway facilities. Runway 16/34 is paved and is 4,002 feet in length and 75 feet in width. The concrete surfaced runway has a 19,000 pound single wheel load. Medium intensity edge and threshold lights are in place. Runway 34 is equipped with runway end identifier lights (REIL) and precision approach path indicators (PAPI).

Runway 8/26 is turf and is 1,200 feet in length and 100 feet in width.

Runway 16/34 is served by a connecting taxiway and turnarounds.

A non-precision instrument (NPI) approach may be made to Runway 16 and 34.

- VOR/DME or GPS A
- VOR/DME or GPS RWY 16
- VOR/DME RNAV or GPS RWY 34

The airport has a rotating beacon and lighted wind indicator. An Automated Weather Observing System (AWOS III) is located on the field.

Landside facilities include a terminal building, aircraft storage hangars, fuel facilities, apron area and vehicle parking.

The 800 square foot terminal building was constructed in the 1950's.

Aircraft storage facilities are noted as follows:

<u>Hangar</u>	<u>Year Constructed</u>	<u>Aircraft Storage</u>	<u>Area</u>
Tee	1950	4	3,300 square feet
Conventional	1950	6	4,200 square feet
Conventional	1950	6	4,200 square feet
Conventional	1950	1	1,000 square feet
Conventional	1950	1	1,000 square feet

The airport has storage space for 18 aircraft.

Fuel (100LL) storage is provided by an above ground 5,000 gallon tank. Jet A fuel is stored in a 5,000 gallon above ground tank. Both are dispensed by self serve pump.

The concrete surfaced (4,000 square yards) apron provides 7 tiedowns. Parking is available for 14 vehicles.

EXISTING SERVICES

Aeronautical services provided by the FBO include fuel (100LL and Jet A), and pilot instruction.

The terminal building provides a pilot lounge, rest rooms, and other amenities.

FORT MADISON MUNICIPAL AIRPORT (FSW)

Federal Role: General Aviation Airport
State Role: General Service Airport

CURRENT AND FORECAST DEMAND

There were 7 aircraft based at the airport in 2003. Five of those were single engine aircraft and two were multi engine. The number of based aircraft is forecast to increase to no fewer than 9 in 2022.

There were an estimated 3,407 total annual operations conducted in 2003. The total number of operations is expected to increase to 4,638 in 2022.

<u>Operational Activity</u>	<u>2003</u>	<u>2007</u>	<u>2012</u>	<u>2022</u>
Based Aircraft	7	8	8	9
Annual Operations	3,407	4,064	4,457	4,638
Itinerant Operations	1,936	2,438	2,674	2,783
Local Operations	1,471	1,626	1,783	1,855

The based aircraft mix and aircraft operational mix are not expected to change significantly over the 20 year planning period. Reference may be made to Chapter Four of the 2004-2024 Iowa SASP for additional forecast data regarding:

- Based aircraft mix
- Operational mix
- Annual Instrument Approaches
- Annual Instrument Operations

AIRPORT FACILITY AND SERVICE NEEDS

The Fort Madison Municipal Airport has been classified as a General Service Airport and should provide facilities and services commensurate with its system role.

The following table summarizes current facilities and services, the airports' facility and service objectives, and actions/projects recommended to meet objectives within the context of the system plan. Local airports may have additional projects planned to accommodate local needs and demand.

Airside Facilities	Existing	System Objective	Recommendation
Airport Reference Code	B-II	B-II	None
Primary Runway Length	4,000'	4,000 min.	None
Primary Runway Width	75'	75'	None
Taxiway	Connecting & Turnarounds	Partial or Turnaround	Extend turnarounds
Approach	NPI	Non-Precision	None
Runway Lighting	MIRL	MIRL	None
Taxiway Lighting	None	LITL	Light turnarounds and connecting taxiway
Approach Aids	None	ALS	None
VGSI	PAPI Runway 34	Both Ends	Add PAPI Runway 16
REIL	Runway 34	Both Ends	Add REIL Runway 16
Rotating Beacon	Yes	Rotating Beacon	None
Lighted Wind Indicator	Yes	Lighted Wind Indicator	None
RCO Facilities	No	Not an Objective	None
Pavement Strength	19,000 lb. SW	To be determined	None
Landside			
Covered Storage	18	100 % Based Aircraft	None
Aircraft Apron	4,000 SY /7 tiedowns	50% Daily Transient	None
Terminal/Admin Building	Yes	Not an Objective	None
Auto Parking	14 spaces	Space equal to 75% based aircraft	None
Fencing	Partial	Not an Objective	None
Storage	None	Not an Objective	None
Fuel	100LL, Jet A	100LL, Jet A	None
FBO	Yes	Limited	None
Ground Transportation	Courtesy car, off-site rental	Courtesy car/off-site rental car	None
Food Services	None	Vending	None
Phone	Yes	Phone	None
Restroom	Yes	Restroom	None
Pilot Lounge	Yes	Yes w/weather reporting	None
Security*	*	*	*
Snow Removal	Yes	Snow Removal	None
Other	None	None	None

*Security enhancements for each airport depend on the size and activity at the airport. Each airport is encouraged to complete a security plan that addresses security enhancements recommended by the Transportation Security Administration and the Iowa DOT.

There are no other system plan recommendations at the Fort Madison Municipal Airport to meet performance objectives set forth for General Service Airports.

SYSTEM DEVELOPMENT COSTS

<u>Development Item</u>	<u>2004-2009</u>
Extend turnarounds	\$230,000
Add PAPI Runway 16	\$60,000
Add REIL Runway 16	\$25,000
Obstruction removal	\$351,850
Total	\$666,850

OTHER RECOMMENDATIONS

Airport improvements identified on the Airport Capital Improvement Program (ACIP) data sheets are noted as follows:

- Relocate taxiway

DEVELOPMENT COSTS - OTHER

<u>Development Item</u>	<u>2004-2009</u>
Relocate taxiway	\$153,000
Total	\$153,000
