

IOWA DEPARTMENT OF TRANSPORTATION

To Office Bridges and Structures **Date** August, 2010
Attention All employees **Ref No.** 521.1
From Gary Novey
Office Bridges and Structures
Subject MM No. 225 (Traffic Data information)

Electronic copies are available on the Internet:

<http://www.iowadot.gov/bridge/standard.htm>

Traffic data information will always be shown on the Bridge title sheet and on each Situation Plan sheet. When there are multiple designs in a project, the Bridge title sheet will show a traffic note referring to the individual Situation Plan sheets for traffic data information.

The traffic information on the Bridge title sheet is labeled as “Design Data Rural” or “Design Data Urban”. This heading label is used to coincide with the way the Office of Design labels their traffic information. On the Situation Plan sheet the traffic information is labeled as “Traffic Estimate” and contains the same traffic information as “Design Data Rural/Urban” shown on the title sheet.

Both the traffic information and the traffic note referring to individual Situation Plan sheets are shown on the seed title sheet. The designer will decide which traffic information is applicable for each project and delete the other reference to traffic information when preparing the title sheet.

The “Plan Review Checklist” and the “Culvert Plan Review Checklist” will be updated to include these guidelines in the next release.

If you have any questions please check with Stuart Nielsen or Thayne Sorenson.
