## **PV-20 Raised Islands**

(This section last updated 05-15-14)

Refer to the Project Design Criteria Worksheets within Section [1C-1](#) to determine which one of the three types of curb (4" sloped, 6" sloped, or 6" standard) should be used with a raised island.

Should a project call for a painted island, contact the Methods Section in the Office of Design for assistance.
