
TC-218 Lane Closure with Pilot Car and Flagger Operated Signals

(This section last updated 07-02-15)

Include information in the Temporary Traffic Signals estimate reference note to inform contractors how many sets of signals are included in the bid item. Typically, 1 set includes 2 signals. Signals are not bid for sideroads and private entrances. Instead, designers will need to add bid items for flaggers for sideroads. Flaggers are normally not bid for private entrances. High volume private entrances may need a flagger. Discuss this with the District.
