

F Sheets

Design Manual

Chapter 1

General Information

Originally Issued: 03-06-03

Revised: 06-30-11

F sheets usually show overhead (plan) and side (profile) views of detour roads constructed as a result of mainline construction or reconstruction. F sheets are very similar to D and E sheets except the centerline of the detour is usually shown.

Contents of the F Sheets

The F sheets contain Plan and Profile Sheets for detour roads constructed (see Section [1F-5b](#)).

Sample F Sheets

Click here to view a [Sample F Sheet](#).

Plan Quality Checklist

- Use D sheet checklist (See Section [1F-5](#)).
- Is Detour/Temporary Pavement presented in order of occurrence?
- Is Detour/Temporary Pavement labeled in the bottom right of the plan view?
- Are tie-in elevations shown on the profile view?
- Are equations labeled at tie-in on the plan view?

Chronology of Changes to Design Manual Section:

001F-007 F Sheets

- | | |
|-----------|--|
| 6/30/2011 | Revised
Updated sample sheet to reflect addition of temporary pavement shading. |
| 2/4/2011 | Revised
Renamed, updated to reflect current practices and added plan quality checklist. |
| 2/4/2011 | Revised
Update section and D sheets examples. |
