

Office of Location and Environment File Exchange

Design Manual
Chapter 20
Project Automation
Information

Originally Issued: 02-10-12

The files listed in this document are to be exchanged between the Office of Design and the Office of Location and Environment for all projects with a P3 Event (FHWA Approval of Prelim. Environmental Doc. (EA/Draft EIS)).

Files Provided by the Office of Location and Environment

The Office of Location and Environment is to provide the following MicroStation file to the Office of Design upon completion of the P0 Event (Planning Concept – Pre-Program).

File Name: *CCRRRPPP.ole* in MicroStation format, where *CCRRRPPP* represents the two-digit County number, three-digit Route number, and three-digit project number "Paren" number.

File Content: One model, *ML_0100_OLE*, that includes levels for the Corridor Study Area, NEPA Cleared Area, and constraints (archeological areas, wetlands, etc.), if applicable.

File Location: *W:\Projects\ProjectDir\OLE \CCRRRPPP.ole*

NOTE: The contents of this file are to be displayed on the D2 (Design Field Exam) plans (see Section [1D-9](#)).

Files Provided by the Office of Design

The Office of Design is to provide the following MicroStation files to the Office of Location and Environment upon completion of the D2 Event (Design Field Exam).

File Name: *CCRRRPPP.ndl* in MicroStation format, where *CCRRRPPP* represents the two-digit County number, three-digit Route number, and three-digit project number "Paren" number.

File Content: A closed shape, or shapes, in the *Default Model*, on level *dsnGroundLineIntercept* that represents the limits of construction for the project.

File Location: *W:\Projects\ProjectDir\Design\CCRRRPPP.ndl*

The Office of Design is to re-submit a finalized file, as described above, to the Office of Location and Environment upon completion of the D5 Event (Plans to Right-of-Way).
