

07-16-91

223-17

Existing P.C.C. pavement shall be recycled into granular subbase. Excess material shall become the property of the contractor and disposed of as per Standard Notes 213-1. Virgin material shall be furnished for any shortage of recycled material required to reach the plan quantity and shall be paid for at contract unit price. The estimated quantity is based on 135 lb./c.f. in-place density.
