

- ① Normal Backslope BS=3.0 unless otherwise specified on detail project plans.
- ② Where overburden is Earth, construct normal 3.0 to 1 backslope as shown.
- ③ Where overburden is Rock, construct bench and rock backslope as shown here and on Detail 4110.

Stepped backslope shall be used at locations indicated and in conjunction with other types of backslopes as necessary. Refer to detail cross sections and appropriate other drawings for additional data pertaining to backslopes.
