

EROSION CONTROL: (Incidental)

Following the completion of work on this project stabilizing crop seeding and fertilizing, and mulching of all disturbed areas shall be done as directed by the Engineer.

SEEDING:

Seed Mixture (Rural)

Spring — March 1 to May 20

Oats	72 kg per hectare
Winter Rye	63 kg per hectare
Red Clover	6 kg per hectare
Timothy	6 kg per hectare

Summer — May 21 to July 20

Oats	108 kg per hectare
Annual Ryegrass	39 kg per hectare
Red Clover	6 kg per hectare
Timothy	6 kg per hectare

Fall — July 21 to September 30

Oats	72 kg per hectare
Winter Rye	126 kg per hectare
Red Clover	6 kg per hectare
Timothy	6 kg per hectare

FERTILIZER:

Rate — 500 kg of 13-13-13 or equivalent commercial fertilizer per hectare.

MULCH:

Areas disturbed but not seeded with stabilizing crop by September 30 shall be scarified to a 75 mm depth and mulched. All mulch to be consolidated into the soil with the mulch stabilizer. Areas seeded with stabilizing crop in highly erosive soils may be mulched as directed by the Engineer.

Rate — 3.5 megagrams of dry cereal straw per hectare.

The preparation of the seedbed, furnishing and application of seed, fertilizer, and mulch to all disturbed areas on this project shall be considered incidental to work on this project and no extra compensation will be allowed.
