# Section 4103. Liquid Admixtures for Portland Cement Concrete

### 4103.01 GENERAL REQUIREMENTS.

- A. Comply with AASHTO M 154 for air entraining admixtures and AASHTO M 194 for other liquid admixtures.
- B. Unless the Engineer approves, do not use admixtures containing more than 1.0% chloride ions.
- C. Inspection and acceptance of liquid admixtures for PCC will be according to Materials I.M. 403.

## D. Air Entraining Admixtures.

Stir, agitate, or circulate air entraining admixtures prior to use to ensure a uniform and homogeneous mixture.

# E. Retarding and Water Reducing Admixtures.

- 1. Use retarding and water reducing admixtures compatible with the air entraining agent used.
- 2. As approved by the Engineer, use admixtures either:
  - In amounts recommended by the manufacturer for conditions which prevail on the project, or
  - According to Materials I.M. 403.
- **3.** When used, introduce admixtures into the mixer after all other ingredients are in the mixer. The Engineer may approve other procedures.
- Agitate retarding and water reducing admixtures prior to and during their use according to Materials I.M. 403.
- 5. When supplementary cementitious materials are used in the concrete, apply the liquid admixture dosage rate to both the cement and supplementary cementitious materials weight (mass) combined.

### F. Other Admixtures.

Other admixtures may be used with the Engineer's approval and according to the manufacturer's recommendations.
