

Roadways may or may not have edge lines. When the free flow roadway has edge lines but the stop controlled roadway does not, end edge lines at the end of returns (marked by ▲s). When the stop controlled roadway has edge lines but the free flow roadway does not, end edge lines at the end of returns (marked by ■s). If both roadways have edge lines, continue edge lines around the returns.

Terminate all mainline centerline markings at the edge of the thru lanes of the side road.

The offset distance from centerline *W* can be the entire width of the offset if the offset is all to one side, or it is the larger of the two partial offsets if the entire offset is split between the two directions of traffic.

For line information, see [PM-110](#).

For symbol and legend information, see [PM-111](#).

- ① If less than 400 feet, join Yellow Lines.
- ② If less than 1000 feet, extend Yellow Line to Stop Line.
- ③ Symbol and Legend (when listed in [108-29](#)).
- ④ For Island information, see [PM-120](#).
