TEMPORARY ATTENUATORS

GENERAL

Temporary attenuators must meet the requirements of National Cooperative Highway Research Program (NCHRP) Report 350: Test Level 3 Criteria and shall be approved by the FHWA. A copy of the FHWA approval letter shall be submitted along with the request for approval.

APPROVAL PROCEDURES

Application for approval shall be sent to the Methods Engineer in the Office of Design (515-239-1402). All relevant documentation, product literature, brochures and any other details along with the FHWA approval letter stating compliance to NCHRP 350: Test Level 3 shall be submitted.

The Methods Engineer will evaluate the application documents and recommend if the product is to be approved. The approved Temporary Attenuators are listed in Appendix A.
