

IMPACT ATTENUATORS

GENERAL

Impact attenuators must meet the requirements of the Specifications for Impact Attenuators.

APPROVAL

Application for approval shall be sent to the Methods Engineer in the Iowa DOT's Office of Design (515-239-1402). All product manuals, specifications and brochures along with correspondence indicating compliance with the Specifications for Impact Attenuators shall be submitted. Samples of materials may also be requested. The Methods Engineer will evaluate the application and determine whether the product is to be approved.

Approved products are listed in Appendix A.

ACCEPTANCE

Acceptance of impact attenuators will be on the basis of approved sources and brand names. If this brand name is not clearly evident on the product, a certification shall be furnished from the manufacturer.
