The proposed 2009-2012 Iowa Statewide Transportation Improvement Program (STIP) project listing is contained herein. This draft is prepared in accordance with Title 23, United States Code.

The draft STIP is divided into two sections identifying projects funded by Federal Highway Administration (FHWA) or Federal Transit Administration (FTA) programs. The FHWA and FTA sections are subdivided by individual metropolitan and regional planning areas. Specific projects are identified within each planning area, based on the respective programs and funding sources.

FHWA programs include the Surface Transportation Program (STP), the National Highway System, Interstate Maintenance, Highway Bridge Program, Transportation Enhancements, Safe Routes to School, Highway Safety, National Recreational Trails and Federal Lands. Also shown are projects awarded funding from the Iowa Clean Air Attainment Program, which is the Iowa Department of Transportation's (DOT) effort to emulate the federal Congestion Management and Air Quality Program funded in the states that do not meet federal air quality standards.

Additional proposed obligations may be identified under a broader category of statewide improvements that are subject to alternate programming requirements. These include the Rail/Highway Safety Program, Planning funds and potential discretionary awards.

The Iowa DOT expanded the prescribed public participation process by empowering 18 regional planning affiliations (RPAs) to provide additional input for the four-year program. Each of the nine metropolitan planning organizations (MPOs) representing the urbanized areas with more than 50,000 population and the 18 RPAs representing rural Iowa were provided annual federal-aid (STP) targets for funding transportation improvements within their area that were a local priority and consistent with their long-range plan. Each MPO and RPA provided the Iowa DOT with a four-year transportation improvement program of projects using "targeted" funds. The projects programmed by MPOs and RPAs are included in this draft. In addition, one-half of the enhancement allocations were also targeted to the RPAs and MPOs to assist the development of locally significant enhancement projects.

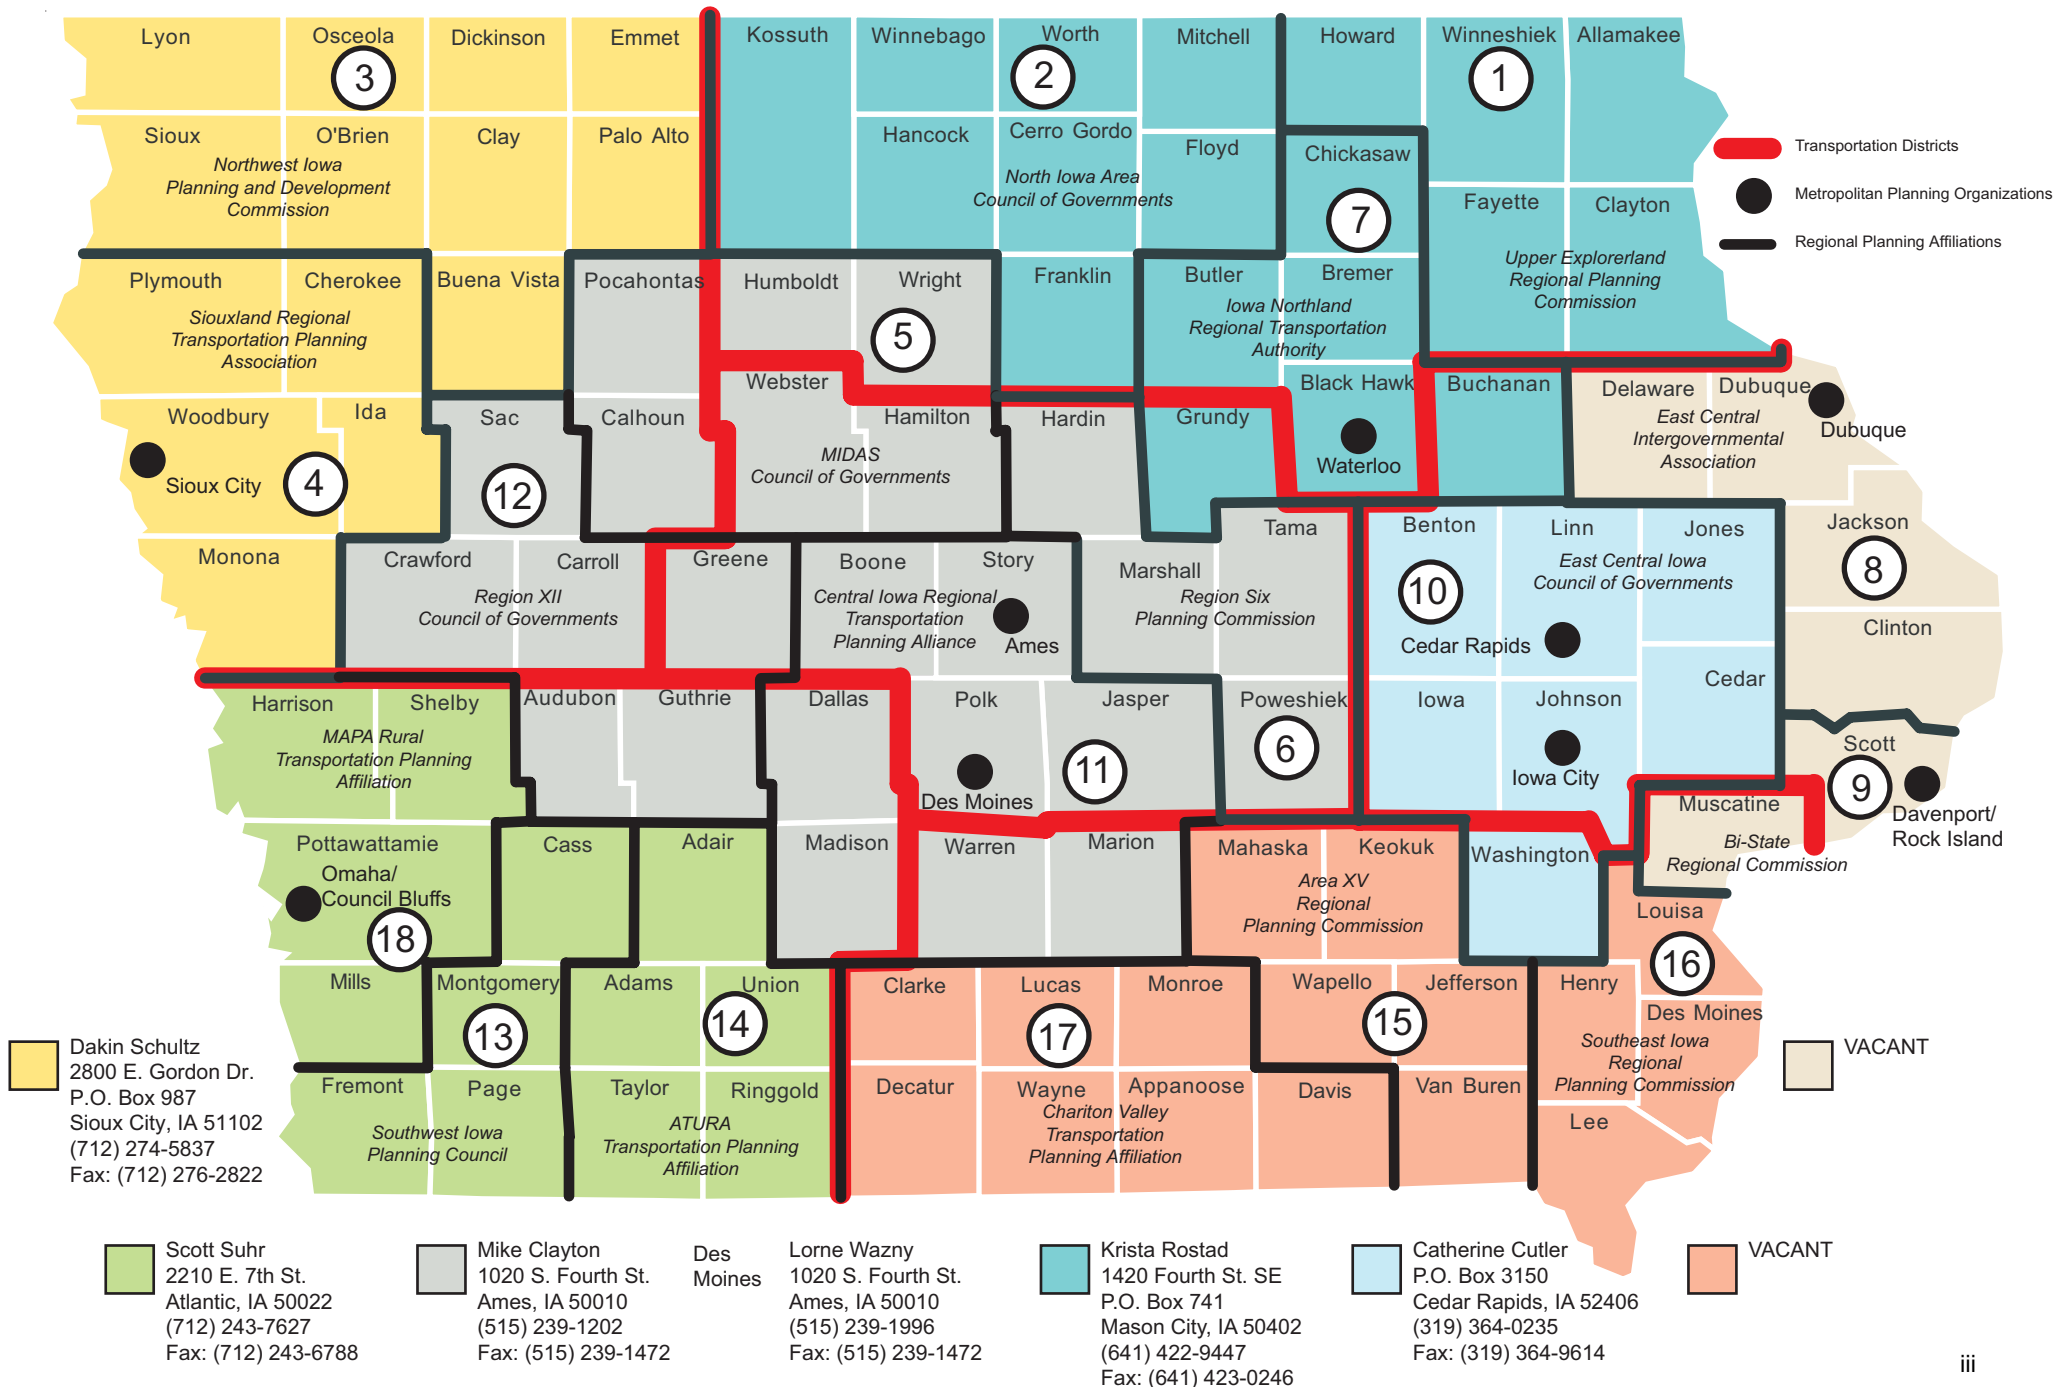

The Iowa DOT also prepares a Transportation Improvement Program, which establishes projects consistent with the state's long-range plan "Iowa in Motion." The program includes projects of statewide significance. This draft STIP has been generated by compiling the transportation improvement programs provided from the MPOs, RPAs and the Iowa DOT. The program will be fiscally constrained by adjusting the Iowa DOT program to match the best estimate of available federal funds for the next four years. In some cases, projects may be shown that indicate no federal-aid participation or that are noted as subject to some future funding decision. These projects have been identified to maintain programming flexibility. The transit portion of the STIP was developed in cooperation with the state's large urban, small urban and regional transit systems.

This draft STIP will be made available to all Iowans consistent with the Iowa DOT's public participation plan. Comments received by September 5, 2008, will be considered prior to the STIP submittal to the FHWA/FTA in September 2008. A map showing the locations of the MPOs and RPAs along with the areas of responsibility for the district planners is included. In addition, a map of the various transit systems is also provided. Please review the following project lists and submit comments to an MPO, RPA or a DOT district planner.

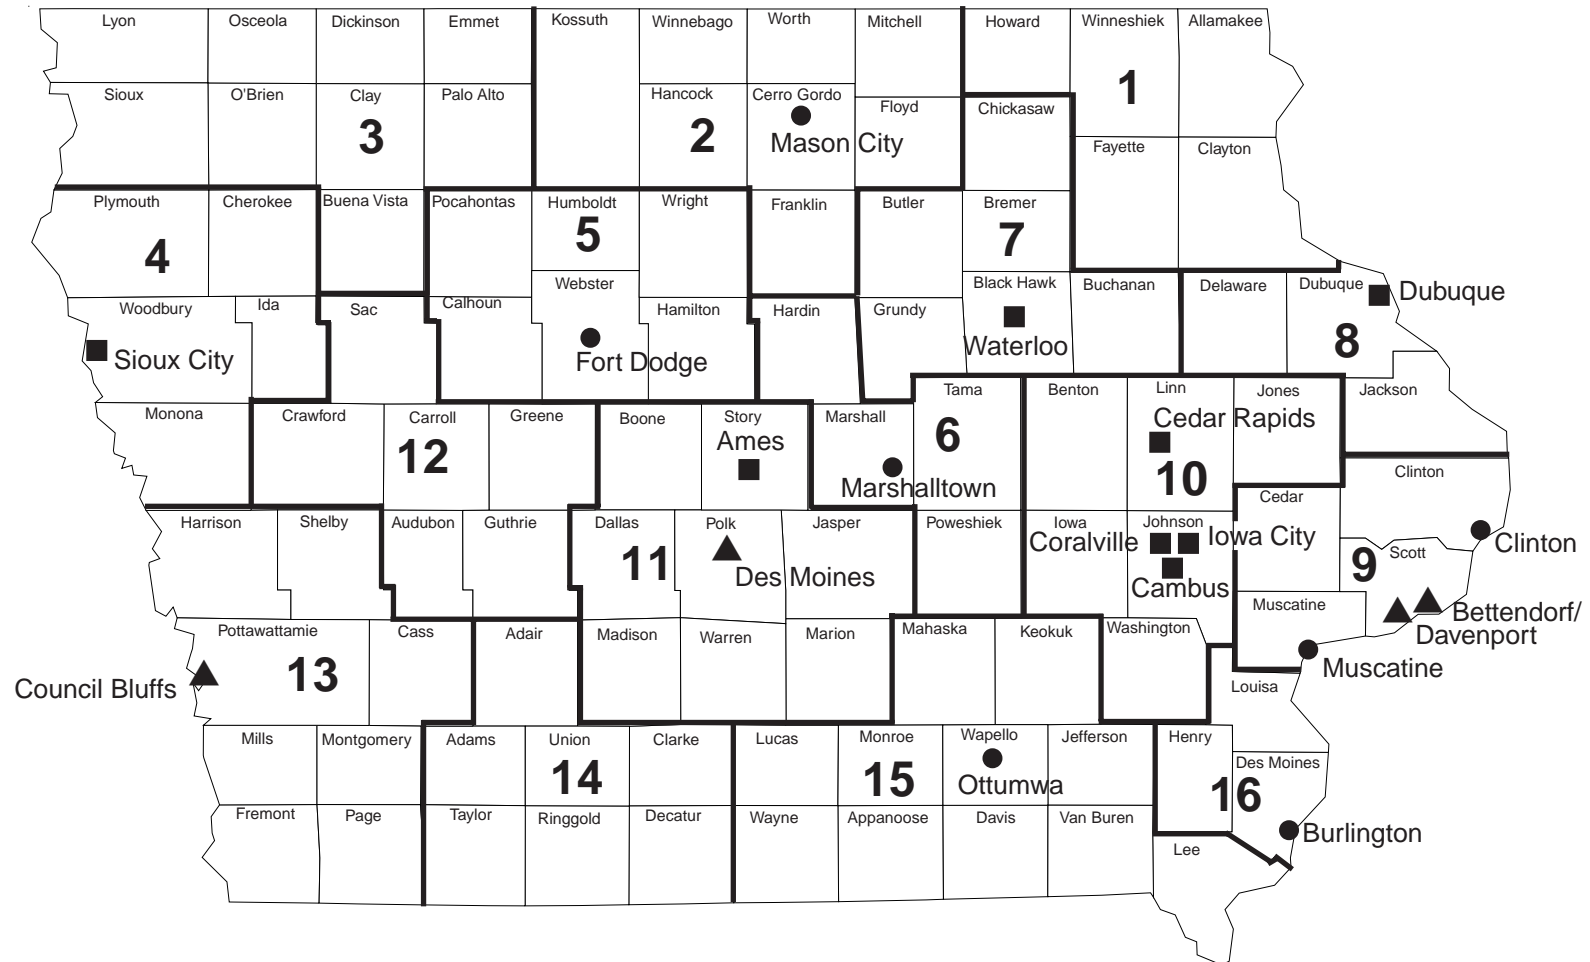

Inclusion of a project in this draft STIP does not guarantee federal-aid eligibility for the project. Eligibility for federal aid will be determined on a case-by-case basis when project authorization is requested from the FHWA or FTA.

District Transportation Planners' Areas of Responsibility

Metropolitan Planning Organizations and Regional Planning Affiliations

Large Urban, Small Urban, and Regional Transit Systems

▲ 4 Transit Systems in Urbanized Areas > 200,000 Population

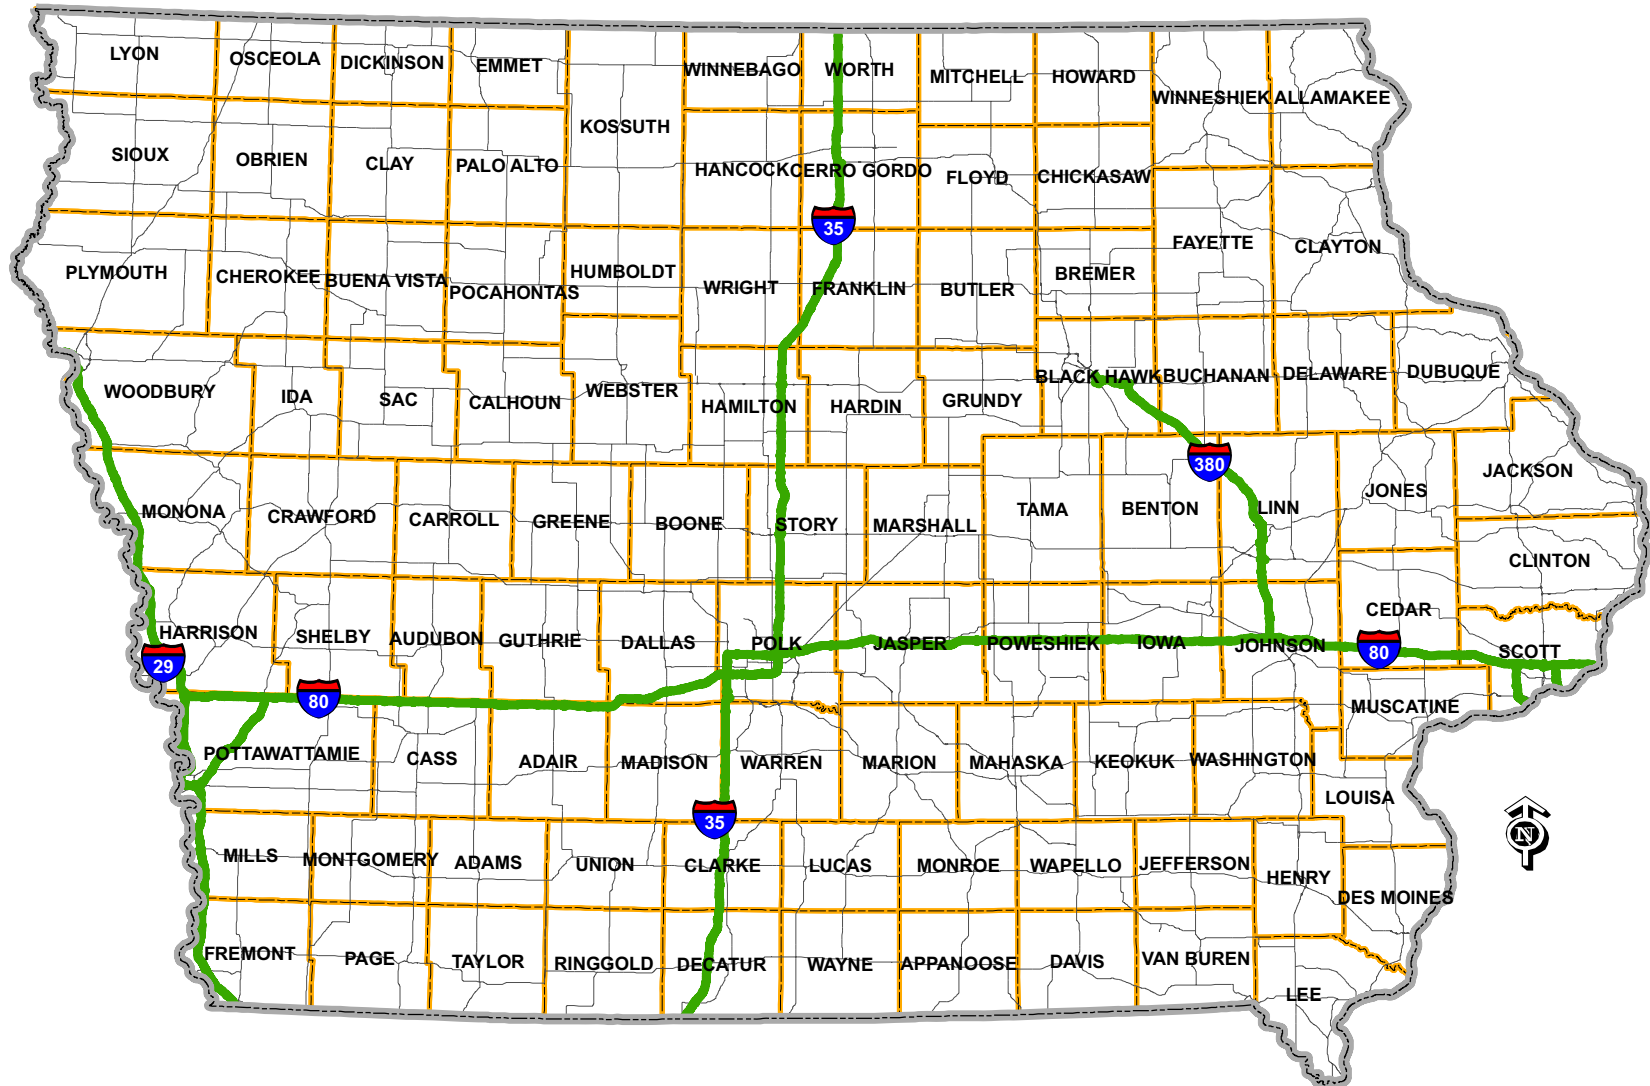

● 7 Transit Systems in Small Urban Areas < 50,000 Population

■ 8 Transit Systems in Urbanized Areas 50,000 to 200,000 Population

— 16 Regional Transit Systems
