Interstate 80 Planning Study

The Iowa Department of Transportation is conducting a study of Interstate 80 and would like your input. The study will be developed and released through a series of technical reports that identify the existing condition of I-80, the way the system is performing, short- and long-term issues, and strategies to improve the route. Each report will be accessible online as it becomes available on the Iowa DOT's I-80 Planning Study website at: www.iowadot.gov/interstatestudy.

The Iowa DOT is asking interested parties to take a few minutes to review the materials on the I-80 Planning Study website, and complete the survey. Survey responses will help Iowa DOT's staff gain a better understanding of perceptions and experiences of those traveling I-80 in Iowa. The website also offers a way for those interested to receive future emails or text messages regarding the study. Use the "Stay Connected" link on the I-80 Planning Study website to sign up.

For more information regarding the I-80 Planning Study, contact the Iowa DOT's office listed below.

The Iowa DOT will be using the hashtag **#I-80IowaPlan** and you can use that key phrase to find relevant tweets about the planning study. When posting to Twitter or Facebook about the planning study, please use #I-80IowaPlan and reference @iowadot in your post.

More information will be posted as it becomes available at:
www.iowadot.gov/interstatestudy.
