Proposal No.: 12359

To all bidders:

This Addendum is issued to incorporate the following additions, deletions, corrections, and clarifications to the Specifications and is hereby made a part of the Contract Documents. This Addendum shall supersede, modify and/or change all statements or drawings to the contrary in the Plans and Specifications and shall take precedence over these documents.

CLARIFICATION

Brand referencing was included for purposes of comparison of like functionality and not intended to be brand specific. Section 3.4.4.1 allowed approved equivalents that met the specific technical specifications.

The radio shall be capable of communicating from all points on the patrolled routes including outside the vehicle and be compatible with the existing radio system utilized by the DOT. All radio equipment shall be supplied and maintained by the Vendor. The Vendor shall obtain and maintain all necessary licenses.

Each vehicle will need one portable multi band radio, one mobile multi band radio, and one VRS radio for the portable.

The portable radio shall be a VHF, 700/800 MHz radio with P25 trunking.

The mobile radio shall be a VHF, 700/800 MHz radio with P25 trunking.

The VRS (vehicular repeater system) shall be compatible with the above radios with full duplex capabilities.
