

**Jasper County Rest Area I-80 WB
Purchasing Bid Proposal 13350**

Vendor Questions:

- 1. I was looking through the spec section and noticed that Division 01 General Requirements would be provided by the DOT. Could I get that from you?**

Response:

There are no general requirements that the DOT intends to add to Section 3. This specification format follows the American Institute of Architects guidelines and on most private sector jobs, this is the area where you would find instructions for bidders. For the DOT project, that information is all included in our up-front document titled "Request for Bids" so Section 3 remains blank.
