

Bid Proposal 14860

Statewide Roadway Data Collection Services

Responses to question Set 5

1. Can the DOT define the location of the adjacent lane where ‘Transverse profile adjacent lane slope’ is listed in the data dictionary? Is it in the same direction when there are multiple lanes or the lane in the opposite direction of travel in 2-lane roads? Is it both situations?

R: For 2-lane lane segments (1 lane in each direction), this means the lane in the opposite direction. For multi-lane segments this means the lane directly to the left of the lane being surveyed (i.e. passing lane, middle turn lane, etc.)

2. In the Schedule of Prices, Urban paved non-primary (Locals) is listed twice. Should one of them be “Rural paved non-primary (Locals)?

R: Yes one of them should be Rural paved non-primary
