

February 22, 2016:

**ADDENDUM NO. 1  
to the  
Iowa Department of Transportation  
Proposal No. 15580  
For Passage Door Replacement for Various Locations  
Letting Date: February 24, 2016**

**Notice To Bidders:**

This Addendum is issued to incorporate the following additions, deletions, corrections, and/or clarifications to the terms or specifications and shall hereby be considered a part of the final contract documents. This Addendum shall supersede, modify and/or change all statements to the contrary in the bid proposal and shall take precedence over previous terms or specifications.

**CLARIFICATIONS On Door Frames:**

In our new construction projects we are specifying the Thermal Break frames for all the exterior entrance passage doors except for the brine building and the wash bay where we are specifying fiberglass doors and frames.

However, to replace an existing standard hollow metal frame in the storage bay or mechanic's bay, the Kerf frame would be sufficient because energy efficiency is not as critical since it is not the main entrances to those areas. The overhead doors are the main entrances for those spaces.

The Thermal Break Frame would be better at office area doors where the main entrance door from the exterior is the passage door because it is a little more energy efficient than the Kerf Frame.

Both types of frames should be insulated in the jamb and head of the frame and caulked well at the joints to minimize the air infiltration.

All Bidders must sign and return this Addendum for the bid opportunity referenced above. Failure to do so may subject the Bidder to disqualification. If a bid response has already been submitted, this Addendum shall be signed and emailed or faxed to the Purchasing Section prior to the scheduled Letting Date.
