

**Proposal 16424**  
**Davenport RCW Office Lighting Upgrade**  
**Questions and Responses Set 1**

**Q1)** Not sure we have the dimensions for the lenses to be replaced on your existing fixtures. Originally thought we saw it in the specifications; however on review we found the style, but not the dimensions themselves. Is this information readily available? If not can we come and measure?

**R1) The exact dimensions of existing lenses is not in the current specifications. The lights are 1' x 4'. You can go to site for measuring. Please call first if you decide to visit the site 563-391-2750.**

**Q2)** In the past we've made a photo copy of the end of the lens and written the measurements in and that sufficed for Louvers to make the custom lens. Is this acceptable?

**R2) Yes, this is acceptable, if it gives the manufacturer the required information to fit the existing fixtures.**
