

TECHNICAL TRAINING & CERTIFICATION PROGRAM

INFORMATION AND REGISTRATION BOOKLET

FOR HIGHWAY MATERIALS & CONSTRUCTION

2023-2024

Welcome to the Iowa Department of Transportation Technical Training and Certification Program (TTCP). The TTCP provides training courses in the areas of construction and materials. The program includes certifications for agencies, industry, producers, and consultants for highway materials testing and inspection. The TTCP has information and resources for you which can be found at the following address:

<https://iowadot.gov/training/technical-training-and-certification-program>

TTCP WEBSITE INCLUDES

Special Messages regarding our training program.

Instructions on enrolling and/or cancelling an enrollment for in person, virtual and web-based training courses. Links for you to access:

Additional Training Videos

REGISTRATION

Class schedules and locations can be found in the TTCP Registration Book. <https://iowadot.gov/training/TTCP-registration-book>. Enrollments are made using IowaDOTU, the Iowa DOT's Learning Management System, and can be found at the following address: <https://learning.iowadot.gov/>. Use the search tab along the top to search for the class you would like to enroll in.

WEB-BASED REVIEWS

Web-based reviews are always available, and it is recommended that you view prior to attending class and prior to test-day. Information on enrolling in the web-based reviews and other web-based courses is available at <https://iowadot.gov/training/web-based-training>. A variety of additional web-based courses are available in IowaDOTU. It is highly recommended that you take the time to enroll in and watch the Math Basics and IM 204 course.

UPDATES

Erosion Control, Level I HMA and Level II PCC Updates will no longer be required for recertification. Updates continue to be offered through web-based training and are available from January 1st through May 31st. To take the PCC II, HMA I, or Erosion Control update via the web, follow the instructions at: <https://iowadot.gov/training/web-based-training>.

REQUIRED ITEMS

Safety glasses and steel-toe shoes are required for the following labs: Level I and II HMA, Level I PCC, Aggregate Technician, and Soils. Gloves will be provided. No one is allowed in the laboratories without the required personal protective equipment. The TTCP classes will have a few extra glasses and steel toe attachments, but it is highly recommended that students bring/wear their own equipment.

Photo Identification will be required prior to testing.

The goal of the Iowa TTCP is to work with contractors, producers, cities, counties and organizations to continually improve the quality on Iowa's construction projects by promoting education and training for technicians. Through the partnership with DMACC's Boone Campus, participants of the TTCP can learn in a state-of-the-art classroom and laboratory-setting. The TTCP is also thankful for the continued support and workshops hosted by Iowa's Aggregate, HMA, PCC, and Prestress organizations. Thank you for helping to improve the quality and success of the TTCP.

THE TTCP PROGRAM

PROGRAM REQUIREMENTS

SPECIAL NEEDS AND REQUESTS

Students with special needs should notify the Technical Training and Certification Program prior to the class to make sure the training location is prepared to accommodate their needs. Please contact dot.ttcp@iowadot.us.

FEES

Course fees are stated with the course listings. The fees are payable by check or money order. **We can not accept credit cards. NO CASH PLEASE.** An invoice will be sent electronically once each enrollment is made. Please mail payment promptly. Certifications will not be issued until payment is received.

Construction Industry Training Funds (CIT) may be used for all or a portion of class fees. If the applicant is using CIT funds, they will need their employer's approval. **CIT funds may not be used if an individual must re-take a class for certification due to failure of a class previously attended.** This would normally occur if an individual failed an initial exam twice or recertification exam once and then would be required to take the full class again. The full class would not be covered by CIT funds. **It is up to the applicant and their employer to ensure there are enough funds available in the employer's account to cover the amount on the application.** If the employer is uncertain, they should contact the Office of Civil Rights at 515-239-1422. **Any applicant using CIT funds must give cancellation notice within two, working-days of the class or they may be billed the full-cost of the class.** Any contractor with outstanding CIT bills will not be allowed to use CIT funds until those bills are paid.

COURSE PRE-REQUISITES

Courses must be attended in sequence with all prerequisites fulfilled before the applicant may attend the next course in a series. Recertifications may be taken in any order, but all prerequisites must be met before certification is issued. For a list of prerequisites, please see the information in the class listings later in this book.

ACI CERTIFICATION AND PCC LEVEL I

If the applicant is American Concrete Institute (ACI) certified, they need to take the web-based PCC Level I review at <https://iowadot.gov/training/web-based-training>, that covers maturity, flowable mortar, beam breaks, measuring length of drilled concrete cores (IM 347), and pass the written exam. A copy of their ACI Certificate must be submitted to the central office at dot.ttcp@iowadot.us. The fee is the same as the recertification fee.

EXPERIENCE

The certified technician must take the responsibility to obtain the experience necessary to perform their job duties properly before performing certified work. In Prestress, the individual is required to obtain 40 hours of experience assisting in quality control inspection at an approved plant before certification will be issued.

REGISTERED PROFESSIONAL ENGINEERS AND ENGINEERING GRADUATES

Registered Professional Engineers and Engineering Graduates from accredited institutions will be exempt from the training requirement. In order to obtain certification for any level, these individuals must pass all applicable Iowa DOT Certification examinations for the level of certification they wish to obtain. The applicant needs to send a copy of their diploma or PE license to dot.ttcp@iowadot.us and set up a time to test and arrange payment. All certificates issued in accordance with these requirements will be subject to the same regulations concerning expiration, etc. as applies to certificates obtained via training and examinations. If the written examination attempt does not meet the required score, the candidate must take the certification class before another attempt can be made.

CERTIFICATION AND RE-CERTIFICATION

An individual must attend training and pass the examination in each level for which they are requesting certification. If an individual fails an examination following training, they will be given one opportunity to retake the exam within six-months of the original exam. If they fail the retake of the exam, they will be required to repeat the training course. This is for new certifications only.

If an individual fails a recertification exam, they are not given a chance to retake the exam but must complete the certification course and pass the certification exam in the level of certification they failed. A certification will be valid for approximately five years. **A certification shall be valid through December 31st of the fifth year. A 90-day grace period is given to allow the certificate holder the opportunity to recertify at all applicable levels.** At the end of the five-year period, the individual must take the recertification exam for the certification they wish to renew.

If a technician allows a certification to expire, they will also lose any certifications for which the expired certification is a prerequisite. For example, Aggregate technician certification is a prerequisite for PCC Level II technician certification. If a PCC Level II technician allows their Aggregate technician certification to expire, they will also lose their Level II PCC technician certification until they regain their Aggregate technician certification. If the individual has not renewed their certification **within the 90-day grace period** they are automatically decertified. The individual may still obtain certification by successfully passing the recertification examination within one year from the date of expiration. After that date they must successfully complete the certification class again to be certified. The certificate holder shall be responsible for enrolling in recertification and for maintaining a current address on file in IowaDOT U.

TECHNICIANS HOLDING CERTIFICATIONS FROM OTHER STATES

Technicians holding certifications from other states may be able to obtain certification in Iowa, if all the criteria in IM 213 is met. The applicant needs to send copies of their certifications from the state in which they are certified to dot.ttcp@iowadot.us. The TTCP coordinators will determine if the certification is eligible for reciprocity. If eligible, in order to obtain certification for any level, these individuals must pass all applicable Iowa DOT Certification examinations for the level of certification they wish to obtain. The applicant needs to contact the TTCP office in Ames at dot.ttcp@iowadot.us to set up a time to test and arrange payment. All certificates issued in accordance with these requirements will be subject to the same regulations concerning expiration, etc., as it applies to certificates obtained via training and examinations. If the written examination attempt does not meet the required score, the candidate must take

the certification class before another attempt can be made.

TESTING PROTOCOL

The TTCP has a testing protocol that must be followed. The protocol includes testing environment, time limits, proctoring exams, etc. The protocol will typically be covered with attendees prior to testing. **Photo Identification** will be required prior to testing.

PERSONAL PROTECTIVE EQUIPMENT

Safety glasses and **steel toe shoes** will be required when working in the labs. The classes that will require safety apparel are HMA Level I and II, PCC Level I, Aggregate Technician, and Soils. Gloves will be provided. No one will be allowed in the laboratories without the required personal protective equipment. The TTCP classes will have a few extra glasses and steel toe attachments, but it is highly recommended that students bring/wear their own equipment.

CANCELLATION AND REFUND POLICY

For cancellations involving CIT funds:

Any applicant using CIT funds must give cancellation notice within two working days of the class or they may be billed the full cost of the class.

For all other cancellations:

For anyone not using CIT funds, the applicant must cancel at least two working days prior to the course or the entire course fee is not reimbursable. If cancellation is made at least two working days prior to the course, a refund may be requested. If applicable, refund checks will be mailed to the applicant.

COURSE SUMMARY

Certification Courses

Courses, Fees, and Pre-Requisites

Course Title	Description	Fees		Pre-Requisites
		New	Re-cert.	
Aggregate Sampler	Certified Sampling Technician	60	60	None
Aggregate Technician	Certified Aggregate Technician	480	120	None
Contract Administration Level I	Introduction to Contract Administration (non-certification)	120	N/A	
Contract Administration Level II	Moving to a non-certification format in 2024	360	N/A	
Contract Administration Level III	Moving to a non-certification format in 2024	360	N/A	
Erosion Control	Erosion Control Technician	300	120	None
HMA Sampler	Certified HMA Sampling Technician	60	60	None
HMA Level I	Certified HMA Technician	600	120	Aggregate Technician
HMA Level II	Gyratory Mix Designer	600	120	HMA Level I
PCC Level I	Certified Concrete Tester	300	120	None
PCC Level II	Certified PCC Technician	480	120	Aggregate Technician & PCC Level I
PCC Level III	PCC Mix Designer	480	120	Level II PCC
Prestress Technician	Prestress Technician	360	120	•PCC Level I or ACI Level I
Ride Quality	Ride Quality Technician	240	120	None
Soils Technician	Soils Technician	240	120	None
Nuclear Gauge	Nuclear Gauge Operator (DOT ONLY)	N/A	N/A	None

•If the Certified Prestress Technician will be running gradations, they will need to be Aggregate

Technician certified.

COURSE SUMMARY

Non-Certification Courses

Courses, Fees, and Pre-Requisites

Course Title	Description	Fee		Pre-requisite
		New	Recert	
HMA Paving Field Inspection	HMA Paving Inspection	--	--	None
Structures Field Inspection	Structural Inspection	--	--	None
PCC Paving Field Inspection	PCC Paving Inspection	--	--	None
Grading Field Inspection	Grade Inspection	--	--	None

Financial Assistance.....

Construction Industry Training Funds

These funds are offered to contractors, producers, and suppliers that provide materials or construction services on Iowa DOT projects. Funding is limited this year, so enroll early for the best opportunity to receive CIT funds.

CIT funds may not be used by consultants or government agencies.

If you wish to use Construction Industry Training funds to pay for course registration fees, contact your employer for approval, then register. Cancellation of any class must be done at least two working-days prior to the class or the applicant may be billed the entire cost of the class. Any contractor with outstanding CIT bills will not be allowed to use CIT funds until those bills are paid.

CIT funds may not be used if an individual must take a class for certification due to failure of a class previously attended. This would normally occur if an individual failed a re-certification exam and then would be required to take the full class. The full class would not be covered by CIT funds. CIT funds may not be used if the certification will not expire the year the re-certification is requested. An example would be someone who has an Aggregate Sampler certification that expires in 2024 and tries to register this upcoming season. To use CIT funds this training season to re-certify, your certification would need to expire in 2023.

Please call the Office of Civil Rights at 515-239-1422, if you have questions regarding the use of Construction Industry Training Funds. For questions about the Technical Training and Certification Program (TTCP), please call the Construction & Materials Training office at 515-290-5998 or 515-509-8302.

Know Your Math!

Math skills are required for most classes offered by the TTCP. Class time will not be spent teaching math so please be prepared before coming to class by enrolling in our web based training Math Basics Series for Highway Technicians! This course is available in IowaDOTU, the DOT's Learning Management System. You will also need to be able to operate the calculator you plan to use during class before attending class.

There is a FREE web based math course available through web based training at: <https://learning.iowadot.gov/>

Answering “percent of” questions

Type 3 - Question: Given an aggregate mix with 12 kg crushed limestone, 8 kg washed chips and 5 kg sand, what is the percentage of each component?

Answer:

1. Add up the total mass $12 \text{ kg} + 8 \text{ kg} + 5 \text{ kg} = 25 \text{ kg}$
2. Divide each component mass by the total mass.
 $\frac{12}{25} = 0.48$ $\frac{08}{25} = 0.32$ $\frac{05}{25} = 0.20$
3. Convert the decimals to percents
 $0.48 = 48\%$ Crushed Limestone
 $0.32 = 32\%$ Washed Chips
 $0.20 = 20\%$ Sand

IM 213

TECHNICAL TRAINING & CERTIFICATION PROGRAM

GENERAL

The purpose of the Technical Training & Certification Program is to ensure Quality Control (QC)/Quality Assurance (QA) and Acceptance of Aggregates, Hot Mix Asphalt (HMA), Portland Cement Concrete (PCC), Soils, Erosion Control, Precast and Prestressed Concrete, and Pavement Profiles and to ensure proper documentation of quality control/quality assurance and acceptance procedures and test results by industry and Contracting Authority personnel.

This Instructional Memorandum (IM) explains the requirements to become certified and to remain certified to perform inspection and testing in the State of Iowa. This IM also describes the duties, responsibilities and the authority of persons assigned the position of Certified Technician in any of the above areas for construction or maintenance projects. Appendix C of this IM lists what tests and procedures the technician is qualified to perform for each level of certification they obtain.

Through a cooperative program of training, study, and examination, personnel of the construction industry, State DOT, and other Contracting Authorities will be able to provide quality management and certified inspection. Quality control/quality assurance and acceptance sampling, testing and inspection will be performed by certified personnel and documented in accordance with the IMs.

A technician who is qualified and holds a valid certification(s) shall perform quality control/quality assurance and acceptance at a production site, proportioning plant, or project site. Responsibilities cannot be delegated to non-certified technicians. The duties of a Certified Technician may be assigned to one or more additional Certified Technicians.

The Technical Training & Certification Program will be carried out in accordance with general policy guidelines established or approved by the Highway Division Director. A Board of Certification composed of the following members will advise the Director:

- Director – Construction and Materials Bureau
- Representative of District Materials Engineers**
- Representative of District Construction Engineers**
- Representative of Associated General Contractors (AGC of Iowa)
- Representative of Iowa Concrete Paving Association (ICPA)
- Representative of Asphalt Paving Association of Iowa (APAI)
- Representative of Iowa Ready Mixed Concrete Association (IRMCA)
- Representative of Iowa Limestone Producers Association (ILPA)
- Representative of County Engineers
- Representative of American Council of Engineering Companies (ACEC-Iowa)
- Coordinator of Technical Training & Certification Program**

** Appointed by Program Director

The Director of the Construction and Materials Bureau will be the Program Director. Coordinators will be appointed by the Program Director to assist in administration of the program and to handle such planning, administration, and coordinating functions as may be needed.

TRAINING

The Iowa DOT will provide the training necessary to become certified. Producers/Contractors are encouraged to conduct their own pretraining program. A complete listing of training opportunities is available at the Technical Training & Certification Program website, <https://iowadot.gov/training/technical-training-and-certification-program>.

CERTIFICATION REQUIREMENTS

1. A candidate must attend Iowa DOT course instruction and pass the examination(s) for all levels of certification prepared and presented by the Program Director or someone designated by the Program Director. If the new candidate fails the examination, they will have one opportunity to retake the examination. The retake must be completed within six months of the original exam. If they fail the retake of the examination, they will need to attend the training again before taking the examination the third time. If an individual is recertifying they will have only one opportunity to take the examination. If they fail the examination they must take the applicable training before retaking the examination.
2. All prerequisites shall be met before the applicant may attend the next level of training for the certification desired. A listing of certification levels and prerequisites is located in Appendix A.
3. Once the candidate has met all the criteria and has received certification, it is recommended the Certified Technician work under the supervision of an experienced technician until they become efficient in the inspection and testing methods they will be performing.

An individual requesting to become certified as a Precast/Prestress Concrete Technician is required to obtain forty hours of experience assisting in quality control inspection at an approved plant before certification will be issued. The experience must be documented and shall be approved by the District Materials Engineer. This experience must be completed within two years from the date the individual attended the training.

4. Registered Professional Engineers, engineering graduates, and geology graduates from accredited institutions will be exempt from the training requirement in the areas they have had instruction. It is, however, strongly recommended that they attend the certification classes. In order to obtain certification for any technical level, these persons must pass all applicable written examinations for the level of certification they wish to obtain. If the written examination attempt does not meet the required score, the candidate must take the certification class before another attempt can be made. All certificates issued in accordance with these requirements will be subject to the same regulations concerning expiration, recertification, etc., as applies to certificates obtained via training and examinations.
5. Technicians will be issued certifications by reciprocity when the following criteria are met:
 - a. The applicant must be certified in another state or certification program determined equivalent by the Program Director or someone designated by the Program Director, in each level of certification they are requesting.
 - b. The applicant must pass an examination for each level of certification desired, which will be administered by the Iowa Department of Transportation. Failure of the examination shall require the applicant to take the applicable schooling before they can retake the exam.

-
- c. The applicant must follow the prerequisite requirements of the Technical Training & Certification Program.

Reciprocity requests should be made through the Technical Training and Certification office in Ames. Copies of all the applicant's certifications will be required.

CERTIFICATION

Upon successfully completing the requirements for certification, the Program Director will issue a pocket certification card. The certification is not transferable. A certification shall be valid for five years.

CERTIFICATION IDENTIFICATION

The certification card will identify the certificate holder, their certification number, the level(s) of certification, and the expiration date of each level.

RENEWAL OF CERTIFICATION

A certification shall be valid through December 31st of the fifth year. A 90-day grace period will be allowed. If the individual has not renewed their certification within the 90-day grace period, they are automatically decertified. The individual may obtain certification by taking the examination for the level of certification they are requesting. If the individual does not take the examination within one year after their certification(s) expire, i.e., 12/31/expiration year, they must retake all applicable schooling and pass the examinations. If an applicant becomes decertified in any level of certification and that certification is a prerequisite for other levels of certification the applicant will also be decertified in those related levels of certification.

All certified technicians will be required to pass an examination in each level of certification they hold before recertification will be issued. Failure of any level shall require the applicant to retake the applicable schooling and pass the test.

The certificate holder shall be responsible for applying for certification renewal and for maintaining a current address on file.

PROVISIONAL CERTIFICATION

Provisional certification will be allowed through a special request to the TTCP Director. The request can be mailed or emailed to the TTCP Director and must include the need for a provisional certification, such as, company technician quit and they need to replace, an unforeseen workload, etc. Provisional certifications will only be granted to contractors. If the request is granted the following requirements will apply.

1. The provisional certification applicant must work under the direct supervision of a certified technician until such time that the applicant is competent in the required skills of the certification and has taken the written exam. The applicant must also take the web based review offered by the TTCP in the area they are seeking provisional certification.
2. The applicant must take and pass the written exam for the provisional certification they are requesting. There will be a testing fee in the amount of the TTCP recertification fee due at the time of the exam. CIT funds may not be used for provisional certification testing. The exams will be offered at the District Materials offices or the TTCP office in Ames.
3. The technician must demonstrate proficiency to an Iowa DOT certified technician at the first available opportunity.

4. After the provisional certification applicant has successfully completed the steps in 1 and 2, they will become provisionally certified until the end of the calendar year in which they obtained certification.
5. If the provisional certified technician wishes to keep their certification they must attend the full class at the full class cost for the certification during the training season immediately following their provisional certification.
6. A provisional certification is not intended to be an annual request. The provisional certification will only be allowed for one construction season. Repeated requests for provisional certifications for the technician will be denied.
7. Any prerequisites for the certification must be met prior to number 2 above.
8. HMA Basic Tester is a new certification that may only be used as a provisional certification. This certification follows all the requirements previously listed and the technician will be required to take Level I HMA at the first available opportunity after the provisional expires.
9. Provisional Certification will be offered for:
 - a. Aggregate Sampler
 - b. Aggregate Technician
 - c. Level I PCC
 - d. HMA Sampler
 - e. HMA Basic Tester

UNSATISFACTORY PERFORMANCE NOTICE

A certified technician failing to perform the required specified duties or inadequately performing these duties, will receive an Unsatisfactory Notice (Materials IM 213, Appendix B). The notice will be from the District Materials Engineer in the District where the failure occurred. This notice and all supporting documentation will be placed in the technician's permanent file with the District Materials Office in which the technician resides. The notice will also be placed on the statewide computer file. The notice will remain in their file for five years. The notice may be removed prior to the five years upon the recommendation of the District Materials Engineer.

SUSPENSION

A technician receiving two Unsatisfactory Work Performance Notices for work performed under a specific certification will be given a three-month suspension of the applicable certification. Suspended technicians shall not perform any duties governed by the suspended certification, including any duties which require the suspended certification as a prerequisite.

Technicians are eligible to be reinstated after the three-month suspension and successful completion of the applicable recertification test(s).

Technicians are subject to decertification when they receive a third Unsatisfactory Performance Notice.

The suspension will be effective on the date the Program Director issues the suspension.

DECERTIFICATION

Certified Technicians will be decertified for any of the following reasons:

Certifications will be revoked for the following reasons:

1. Failure of the certificate holder to renew the certificate prior to regular expiration as described above.

-
2. Use of false or fraudulent information to secure or renew a certificate.
 3. Use of false or fraudulent documentation by the certificate holder.
 4. Use of misleading, deceptive, untrue or fraudulent representations by the certificate holder.
 5. Cheating on certification exams or performance evaluations. This includes removing, or attempts to remove, exam questions, answers, or other exam materials from the testing location.
 6. Receipt of 3 Unsatisfactory Performance notifications, as stated above under suspension.

The Program Director, or designee, will notify an individual in writing of the intent to suspend or revoke the individual's certification(s). Notice will also be sent to the technician's last known employer. For DOT employees, notice will also be sent to their immediate supervisor.

An individual's certifications will be suspended during the appeal process, and the individual can't perform any duties governed by the certification during this time, until the first day following the end of the appeal process described below.

Technicians that are decertified shall not perform any duties requiring certification.

APPEALS & REINSTATEMENT REQUESTS

An individual has 10 business days to respond to the revocation notice. If the individual fails to respond with an appeal within 10 days of receipt of the original revocation notice, the suspension or revocation becomes effective on the 10th day.

Appeal step 1: First step appeals will be heard by the program director and a representative panel. The individual will have an opportunity to present information to support their continued certification to the panel. The Program Director and representative panel will then render a written decision, taking into account the technician's actions or omissions, the existence of past infractions, and any mitigating factors. This step 1 appeal will become final if further action is not taken as described in appeal step 2 and the suspension or revocation will become effective on the day the decision is issued by the panel.

Appeal step 2: If the individual is not satisfied with the decision of the Program Director and representative panel, the individual shall, within 10 days of receipt of the written decision, submit a request for further review to the Program Director. This appeals request will be considered by the entire Certification Board. The decision of the Certification Board will be the final decision on behalf of Technical Training & Certification Program.

Any violation will remain on the violator's record for five years, at which time the violation will be removed from their record.

A technician may request reinstatement after one year of being decertified unless the Program Director authorized a shorter period of time, which shall not be less than three months. If a reinstatement is authorized, the individual must attend and successfully complete the applicable certification courses.

FUNCTIONS & RESPONSIBILITIES

A certificate holder at each production site, project site, proportioning plant, or laboratory will perform duties. The certified technician shall perform quality control testing in accordance with specified frequencies and submit designated reports and records.

The specification requirement for materials testing by a certified technician does not change the supplier's responsibilities to furnish materials compliant with the specification requirements.

The District Materials Engineer and/or Project Engineer will be responsible for monitoring the sampling, testing, production inspection activities and quality control performed by the contractor. A monitor shall have satisfactorily completed the training and be certified for the level of technician they are monitoring.

The District Materials Engineer and/or Project Engineer will have authority and responsibility to question and, where necessary, require changes in operations and quality control to ensure specification requirements are met.

QUALITY CONTROL, TESTING, & DOCUMENTATION

The QC Technician shall be present whenever construction work related to production activity, such as stockpiling or other preparatory work, requires record development and/or documentation is in progress. The QC Technician's presence is normally required on a continuing basis beginning one or more days before plant operation begins and ending after plant shut down at the completion of the project. The work shall be performed in a timely manner and at the established frequencies.

The QC Technician's presence is not normally required during temporary plant shut downs caused by conditions, such as material shortages, equipment failures, or inclement weather.

All quality control activities and records shall be available and open for observation and review by representatives of the contracting authority.

Reports, records, and diaries developed during progress of construction activities will be filed as directed by the Contracting Authority and will become the property of the Contracting Authority.

Quality control activities, testing, and records will be monitored regularly by Contracting Authority representatives. The Project Engineer or District Materials Engineer will assign personnel for this function.

Monitor activities will be reported and filed at prescribed intervals with the Project Engineer, District Materials Engineer, producer, contractor, and the contractor's designated producer.

At no time will the monitor inspector issue directions to the contractor, or to the QC Technician. However, the monitor inspector will have the authority and responsibility to question, and where necessary, reject any operation or completed product, which is not in compliance with contract requirements.

ACCEPTANCE

Completed work will be accepted on the basis of specification compliance documented by acceptance test records, and monitor inspection records. Specification noncompliance will require corrective action by the producer, contractor, or by the contractor's designated producer, and review of events and results associated with noncompliance by the Project Engineer.

CERTIFICATION LEVELS

CERTIFICATION LEVEL	TITLE	PRE-REQUISITES
AGGREGATE		
Aggregate Sampler	Certified Sampling Technician	None
Aggregate Technician	Certified Aggregate Technician	None
CONTRACT ADMINISTRATION		
Level II Contract Admin.	Level II Contract Admin. Tech	Level I Contract Admin.
Level III Contract Admin.	Level III Contract Admin. Tech	Level II Contract Admin., Level I HMA, Level II PCC
EROSION CONTROL		
Erosion Control	Erosion Control Technician	None
HOT MIX ASPHALT		
HMA Sampler	HMA Sampler	None
Level I HMA	HMA Technician	Aggregate Technician
Level II HMA	HMA Mix Design Technician	Level I HMA
PORTLAND CEMENT CONCRETE		
Level I PCC**	PCC Testing Technician	None
Level II PCC	PCC Plant Technician	Agg. Technician & Level I PCC
Level III PCC	PCC Mix Design Technician	Level II PCC
**American Concrete Institute (ACI) Grade I certification will be acceptable as a portion of the Level I PCC training.		
PRESTRESS		
Prestress	Prestress Technician	Level I PCC or ACI Grade I If the technician will be performing gradations, they will need to be Aggregate Technician certified.
RIDE QUALITY		
Ride Quality	Ride Quality Technician	None
SOILS		
Soils	Soils Technician	None

UNSATISFACTORY PERFORMANCE NOTICE

Issued To: _____

Date: _____

This notice is to inform you that your performance as a Certified Inspector/Technician was unsatisfactory for the reason(s) listed below.

This notice will be placed in your permanent file with the District Materials Office in which you reside. It will also be placed on the statewide computer file.

The goal of the Technical Training and Certification Program (TTCP) is to work with contractors, producers, cities, and counties to continually improve the quality of Iowa's construction projects. We hope you will work with us to achieve this goal.

Unsatisfactory Performance:

District Materials Engineer

cc: Program Director – Construction and Materials Engineer, Ames
TTCP Coordinator
Resident Construction Engineer

CERTIFIED TECHNICIANS QUALIFICATIONS

Tests and Procedures the Certified Technician is qualified to perform for each level of certification.

AGGREGATE SAMPLER

- IM 204 - Inspection of Construction Project Sampling & Testing (when material is incorporated)
- IM 209, App. C - Aggregate Specification Limits & Sampling & Testing Guide (when material is produced)
- IM 301 - Aggregate Sampling Methods
- IM 336 – Methods of Reducing Aggregate Field Samples to Test Samples

AGGREGATE TECHNICIAN

- IM 204 - Inspection of Construction Project Sampling & Testing (when material is incorporated)
- IM 209, App. C - Aggregate Specification Limits & Sampling & Testing Guide (when material is produced)
- IM 210 – Production of Certified Aggregate From Reclaimed Roadways
- IM 216 - Guidelines for Verifying Certified Testing Results
- IM 301 - Aggregate Sampling Methods
- IM 302 - Sieve Analysis of Aggregates
- IM 306 - Determining the Amount of Material Finer Than #200 (75µm) Sieve in Aggregate
- IM 307 - Determining Specific Gravity of Aggregate
- IM 308 - Determining Free Moisture & Absorption of Aggregate
- IM 336 - Methods of Reducing Aggregate Field Samples to Test Samples
- IM 344 - Determining the Amount of Shale in Fine Aggregate
- IM 345 - Determining the Amount of Shale in Coarse Aggregate
- IM 368 – Determining the Amount of Clay Lumps & Friable Particles in Coarse Aggregate
- IM 409 – Source Approvals for Aggregate

LEVEL II CONTRACT ADMINISTRATION

- N/A

LEVEL III CONTRACT ADMINISTRATION

- IM 101 – Review of Materials Used in Construction & Maintenance Projects
- IM 103 – Inspection Services Provided to Counties, Cities, and Other State Agencies
- IM 204 – Inspection of Construction Project Sampling & Testing

HMA BASIC TESTER (This is for Provisional Certification Only)

- IM 321 - Method of Test for Compacted Density of Hot Mix Asphalt (HMA) (Displacement Method)
 - IM 322 - Method of Sampling Uncompacted Hot Mix Asphalt
 - IM 323 - Method of Sampling Asphaltic Materials
 - IM 325G - Method of Test for Determining the Density of Hot Mix Asphalt (HMA) Using the Superpave Gyratory Compactor (SGC)
 - IM 350 - Maximum Specific Gravity of Hot Mix Asphalt (HMA) Mixtures
-

-
- IM 357 - Preparation of Hot Mix Asphalt (HMA) Mix Samples for Test Specimens
 - All forms must be signed by an HMA I or HMA II certified technician

HMA SAMPLER

- IM 320 – Method of Sampling Compacted Asphalt Mixtures
- IM 321 – Method of Test for Compacted Density of Hot Mix Asphalt (HMA) (Displacement Method)
- IM 322 - Method of Sampling Uncompacted Hot Mix Asphalt
- IM 323 - Method of Sampling Asphaltic Materials

LEVEL I HMA

- IM 204 - Inspection of Construction Project Sampling & Testing
- IM 208 - Materials Laboratory Qualification Program
- IM 216 - Guidelines for Verifying Certified Testing Results
- IM 320 - Method of Sampling Compacted Asphalt Mixtures
- IM 321 - Method of Test for Compacted Density of Hot Mix Asphalt (HMA) (Displacement Method)
- IM 322 - Method of Sampling Uncompacted Hot Mix Asphalt
- IM 323 - Method of Sampling Asphaltic Materials
- IM 325G - Method of Test for Determining the Density of Hot Mix Asphalt (HMA) Using the Superpave Gyratory Compactor (SGC)
- IM 337 - Determining Thickness of Completed Courses of Base, Subbase, & Hot Mix Asphalt
- IM 350 - Maximum Specific Gravity of Hot Mix Asphalt (HMA) Mixtures
- IM 357 - Preparation of Hot Mix Asphalt (HMA) Mix Samples for Test Specimens
- IM 501 - Asphaltic Terminology, Equations & Example Calculations
- IM 508 - Hot Mix Asphalt (HMA) Plant Inspection
- IM 509 - Tank Measurement & Asphalt Cement Content Determination
- IM 511 - Control of Hot Mix Asphalt (HMA) Mixtures

LEVEL II HMA

- IM 380 - Vacuum-Saturated Specific Gravity & Absorption of Combined or Individual Aggregate Sources
- IM 510 - Method of Design of Hot Mix Asphalt (HMA) Mixes
- AASHTO T176 - Plastic Fines in Graded Aggregate & Soils by use of Sand Equivalent Test
- AASHTO T304 - Uncompacted Void Content of Fine Aggregate
- ASTM D 4791 - Flat Particles, Elongated Particles, or Flat & Elongated Particles in Coarse Aggregate
- AASHTO T283 Resistance of Compacted Hot Mix Asphalt (HMA) to Moisture-Induced Damage

LEVEL I PCC

- IM 204 - Inspection of Construction Project Sampling & Testing
 - IM 208 - Materials Laboratory Qualification Program
 - IM 216 - Guidelines for Verifying Certified Testing Results
 - IM 315 - Method of Protecting, Curing, Making & Testing Concrete Cylinders
 - IM 316 - Flexural Strength of Concrete
-

- IM 317 - Slump of Hydraulic Cement Concrete
- IM 318 - Air Content of Freshly-Mixed Concrete by Pressure
- IM 327 - Sampling Freshly-Mixed Concrete
- IM 328 - Making, Protecting, and Curing Concrete Flexural Specimens
- IM 340 - Weight Per Cubic Foot, Yield, & Air Content (Gravimetric) of Concrete
- IM 347 – Measuring Length of Drilled Concrete Cores
- IM 383 - Testing the Strength of PCC Using the Maturity Method
- IM 385 - Temperature of Freshly-Mixed Concrete
- IM 525 - Designing Flowable Mortar
- AASHTO T97 - Third Point Loading

LEVEL II PCC

- IM 527 - Paving Plant Inspection
- IM 528 - Structural Concrete Plant Inspection
- IM 529 - PC Concrete Proportions

LEVEL III PCC

- IM 530 - Quality Management & Acceptance of PC Concrete Pavement
- IM 531 - Test Method for Combining Aggregate Gradations
- IM 532 - Aggregate Proportioning Guide for Portland Cement Concrete Pavement

PRESTRESS

- IM 570 - Precast & Prestressed Concrete Bridge Units

RIDE QUALITY

- IM 341 - Determining Pavement & Bridge Ride Quality

SOILS

- IM 309 – Determining Standard Proctor Moisture Density Relationship of Soils
- IM 312 – Sampling of Soils for Construction Project
- IM 335 – Determining Moisture Content of Soils
- ASTM D-2937 – Field density by drive-cylinder method

AGGREGATE SAMPLING TECHNICIAN DUTIES

Duties of the Aggregate Sampling Technician are detailed in IM 209 and the IM 300 Series and consist of, but are not limited to the following:

A. Sampling

1. Obtain representative samples by approved method(s).
2. Sample at required frequencies.
3. Identify samples with pertinent information such as:
 - a. Type of material
 - b. Intended use
 - c. Production beds working depth
 - d. Sampling method
4. Reduce samples by approved method(s).

AGGREGATE TECHNICIAN DUTIES

Duties of the Aggregate Technician are detailed in IM 209 and the IM 300 Series and consist of, but are not limited to the following:

A. Sampling

1. Obtain representative samples by approved method(s).
2. Sample at required frequencies.
3. Identify samples with pertinent information such as:
 - a. Type of material
 - b. Intended use
 - c. Production beds working depth
 - d. Sampling method
4. Reduce samples by approved method(s).

B. Gradation Testing

1. Follow appropriate testing methods.
2. Maintain current applicable specifications.
3. Post test results within 24 hours of sampling.

C. Other Testing as required (specific gravity, moisture, deleterious material, etc.)

1. Follow appropriate testing methods.
2. Maintain current applicable specifications.
3. Complete required reports.

D. Sampling & Testing Equipment

1. Clean and check testing sieves for defects.
2. Assure scale accuracy.
3. Maintain sampling and testing equipment.

E. Communication

1. Notify the District Materials office for production start-up or changes.
2. Relay test results to appropriate production or supervisory personnel.
3. Report failing test results immediately to appropriate personnel (including District Materials office) and assure remedial actions are taken.

F. General

1. Monitor stockpiling procedures to avoid contamination and excess segregation.
2. Assure proper identification of stockpiles.
3. Assure specification requirements for intended use are met before shipment.
4. Assure sampling locations are safe.
5. Assure proper bedding planes or production depths are maintained.

G. Documentation

1. Report all production test results of certified aggregates on Form #821278 and distribute as required.
2. Assure "plant production log" is maintained.

CONTRACT ADMINISTRATION TECHNICIAN DUTIES

Levels II and III perform duties described in Article 1105.06 "Authority & Duties of Inspector". Duties of the Contract Administration Technician consist of, but are not limited to the following:

Level I

- A. Field inspection on a single, or few, projects.
 - 1. Conduct measurements.
 - 2. Collect materials certifications.
 - 3. Perform inspection on small/medium projects.
 - 4. Daily log of contractor's activities.
 - 5. Measure contract quantities for pay.

Level II

- A. Lead inspector of medium-sized project or multiple small projects.
 - 1. Ensure work is completed according to contract documents.
 - 2. Ensure proper materials certifications.
 - 3. Coordinate and review inspector activities.
 - 4. Maintain project records.
 - 5. Prepare authorization for project progress reports and pay vouchers.
 - 6. Identify and report non-complying materials or activities.

Level III

- A. Manages the inspection and documentation of large, complex highway construction projects and/or several small highway projects.
 - 1. Ensure work is done according to applicable contract documents, permits, laws, and other government regulations.
 - 2. Review project daily to ensure adequate inspection and compliance of work.
 - 3. Coordinate solution when contract documents do not completely and accurately address site conditions. Assists in negotiating change orders.

4. Make timely decisions to prevent non-complying work, avoid delays in project completion, and avoid potential claims due to loss of production by the contractor.
5. Perform end of project audit on incorporated materials.
6. Prepare project documents for final review.
7. Make determination on necessity of interest payment to the contractor and calculate that value.

EROSION CONTROL TECHNICIAN DUTIES

Duties of the Erosion Control Technician consist of, but are not limited to the following:

- A. Carefully review and be familiar with the details in the contract documents.
- B. Assign erosion and sediment control monitoring responsibilities to Erosion & Sediment Control (ESC) Basics trained field staff.
- C. Review copies of storm water inspection reports.
- D. Provide input on initial Erosion Control Implementation Plan (ECIP) submittal and ECIP updates.
- E. Provide onsite reviews when requested by Contracting Authority or Contractor field staff.

HOT MIX ASPHALT (HMA) SAMPLING TECHNICIAN INSPECTION DUTIES

Duties of the Hot Mix Asphalt Sampling Technician consist of, but are not limited to the following:

A. Plant Sampling. (Article 2303.04, IM 204 & 511)

1. Obtain asphalt binder samples as directed by Contracting Authority personnel per IM 323 and IM 204.

B. Field Sampling (Article 2303.04, IM 204 & 511)

1. Obtain uncompacted mix random samples as directed by Contracting Authority personnel, and identify time, station, lift and side.
2. Obtain compacted mix core random samples as directed by Contracting Authority personnel.

HOT MIX ASPHALT (HMA) TECHNICIAN INSPECTION DUTIES

The following is a list of the duties that must be performed by the Certified Level I HMA Technicians doing quality control work for the Contractor on all projects where the Quality Management-Asphalt (QM-A) specification applies. The Quality Control Technician shall have no other duties while performing certified inspection duties.

These duties consist of, but are not limited to, the following:

A. Aggregate Stockpiles.

1. Assure proper stockpiling of aggregate deliveries. (stockpile build & additions) (IM 508)
 - a. Prevent intermingling of aggregates.
 - b. Check for and prevent contamination.
 - c. Prevent segregation.
 - d. Check for oversize material.
2. Document certified aggregate deliveries. (each delivery) (IM 508). When the aggregate supplier can provide a summary document of all deliveries, do not enter into Plant Book.
 - a. Obtain truck tickets.
 - b. Check for proper certification.
 - c. Check for proper approved source.
 - d. Enter deliveries in Plant Book Program when other documentation cannot be provided, Aggregate Certification page.
3. Observe loader operation. (daily) (IM 508)
 - a. Check for proper stockpile to bin match-up.
 - b. Check that loader does not get stockpile base material in load.
 - c. Check that loader does not intermingle aggregate by overloading bins.

B. Asphalt Binder Delivery. (each delivery) (IM 508 & 509)

1. Check that material is pumped into correct tank.
2. Document Deliveries.
 - a. Obtain truck tickets.
 - b. Check for proper approved source.
 - c. Check for proper certification.
 - d. Check for proper grade.
 - e. Check for addition of liquid anti-strip if required.
 - f. Check if weight per gallon or specific gravity has changed.
 - g. Enter deliveries into Plant Report Program.

C. Plant Operations. (daily)

1. Prepare Plant Report Program for daily entries. (IM 511)
 - a. Enter Date.
 - b. Enter Report Number.
 - c. Enter expected tonnage for the day.
 - d. Enter any proportion or target changes that apply.
2. Aggregate Delivery System. (IM 508)
 - a. Check for proper cold feed gate settings.
 - b. Check for proper cold feed belt speed settings.
 - c. Check for proper moisture setting (drum plants).
 - d. Monitor RAP proportions.
3. Mixing System. (Article 2303.03, IM 508)
 - a. Check for proper asphalt binder delivery setting.
 - b. Check for proper interlock operation.
 - c. Monitor coating of aggregates.
 - d. Monitor mixing time (batch plants).
4. Loading System. (Article 2303.03 & 2001.01, IM 508)
 - a. Check hopper/silo gates for proper open/close
 - b. Check trucks for proper loading and possible segregation.
 - c. Check trucks for diesel fuel contamination in box and remove contaminated trucks from service (5 hrs with box raised).
5. Asphalt Binder Quantity Determination.
 - a. Obtain totalizer printout readings and periodically check against tank stick readings.
 - b. If using batch count for quantity, obtain printouts of each batch and add up the asphalt binder used for total quantity.

D. Plant Operations. (2 hour intervals) (IM 508)

1. Temperatures.
 - a. Monitor and record mix temperature at discharge into truck box.
 - b. Monitor and record asphalt binder temperature.
 - c. Monitor and record air temperature.
2. Observe plant operation for any irregularities.

E. Weighing Equipment.

1. Proportioning scales (batch plants). (min. 1/day) (Articles 2001.07 & 2001.20)
(IM 508)
 - a. Perform sensitivity checks of scales.
 - b. Check for interference at scale pivot points.
2. Pay Quantity Scales. (min. 1/day) (Articles 2001.07 & 2001.20, IM 508)
 - a. Regularly perform check weighing comparisons with a certified scale as necessary. (min. 1st day and one additional if >5000 tons, and as directed by Engineer)
 - b. Perform sensitivity checks of scales.
 - c. Check for interference at scale pivot points.
 - d. Perform verification weighing (truck platform scales).
3. Weigh Belts. (daily)
 - a. Check weigh belt for excess clinging fines that effects speed reading.
 - b. Check weigh belt for interference at bridge pivot points.
 - c. Check for proper span setting.
4. Enter scale checks in Plant Report Program. (daily)

F. Plant Sampling. (daily) (Article 2303.04, IM 204 & 511)

1. Obtain cold-feed gradation samples as directed by Contracting Authority personnel per IM 301 and IM 204.
2. Obtain asphalt binder samples as directed by Contracting Authority personnel per IM 323 and IM 204.
3. Obtain cold-feed moisture samples at a minimum of every ½ day (drum mix plants).

G. Field Sampling (if not performed by others). (daily) (Article 2303.04, IM 204 & 511)

1. Obtain uncompacted mix random samples as directed by Contracting Authority personnel, and identify time, station, lift and side.
2. Obtain compacted mix core random samples as directed by Contracting Authority personnel.

H. Testing. (daily) (Article 2303.04, IM 204 & 511)

1. Field cores.
 - a. Provide properly calibrated equipment for Contracting Authority technician's use.
 - b. Obtain and record core location station and offset information.

- c. Obtain copy of core thickness measurements from Contracting Authority Technician.
- d. Obtain copy of core weights from Contracting Authority technician.
- e. Record weights and thickness in Plant Report Program.

2. Uncompacted mix.

- a. Properly store Contracting Authority secured portion of paired sample.
- b. Split Contractor half of paired sample into test portions as per IM 357.
- c. Perform gyratory compaction as per IM 325G.
- d. Perform bulk specific gravity test of laboratory-compacted specimen as per IM 321.
- e. Perform maximum specific gravity test as per IM 350.
- f. Enter test data into Plant Report Program.
- g. Submit secured samples to DOT District Lab.

3. Aggregate.

- a. Split one sample each day as directed by Contracting Authority personnel and provide half for testing by Contracting Authority.
- b. Perform gradation analysis as per IM 302 and enter weights into Plant Report Program.
- c. Perform moisture tests and produce results upon request.

4. Testing Lab Qualification. (as needed) (IM 208 & 511)

- a. Record all HMA sample validations with DOT on form 235.
- b. Document corrective actions taken when not correlating.
- c. Document all test equipment calibrations.
- d. Update IM's, test procedures and specs as required.

I. Documentation. (daily) (Article 2303.04, IM 204, 511 & 508)

The Plant Report, Chart, Plant Book, and other HMA worksheets are available on the following website: https://iowadot.gov/construction_materials/Hot-mix-asphalt-HMA

1. Prepare computerized Daily Plant Report.

- a. Check that all data is correct.
- b. Check that all data is complete.
- c. Compute tons of mix used to date.
- d. Enter mix adjustment data on report.
- e. Check for spec compliance.
- f. Immediately report non-complying results.
- g. Obtain and record mat temperatures and stationing.
- h. Provide electronic daily Plant Report to DME.

2. Maintain a daily diary of work activity in Plant Report Program.

- a. Record weather conditions.

- b. Record daily high and low temperatures.
 - c. Record sunrise and sunset times.
 - d. Record any interruptions to plant production.
 - e. Record any other significant events.
3. Import daily data into charting program.
4. Enter tack shipment quantities in Plant Report Program.
5. Total all truck tickets delivered to project and deduct any waste to determine HMA pay quantity.
6. Complete Daily Check List

J. Miscellaneous. (daily) (IM 208 & 511)

1. Clean lab.
2. Back-up computer files.
3. Dispose of samples as directed by District Lab.
4. Clean and maintain lab equipment.

K. Independent Assurance Duties. (Every 3 months) (IM 205 & 216)

1. Pick up HMA and aggregate proficiency sample from District Lab.
2. Test aggregate proficiency sample for gradation per IM 302.
3. Test HMA proficiency sample per IM 357, 325G, 321 & 350.
4. Report test results on proficiency samples to Construction Materials Bureau per IM 205.

L. Project Duties. (1/project) (IM 508 & 511)

1. Be in possession of appropriate mix design.
2. Be present during plant calibration.
3. Observe scale calibrations.
4. Perform plant site and set-up inspection and fill out Plant Site Inspection List.
5. Set up Plant Report Program and enter all project information to create Project Master files at beginning of project.

6. Check that release agents used in truck boxes are on the approved list in MAPLE.
7. Copy all computer files and provide to the Contracting Authority at completion of project.
8. Copy all paperwork and control charts and provide to the Contracting Authority at completion of project.

**PORTLAND CEMENT CONCRETE (PCC) TECHNICIAN DUTIES
PAVING & STRUCTURAL CONCRETE**

The Quality Control Technician shall have no other duties while performing certified inspection duties. Refer to IM 528 for exceptions. The District Materials Engineer may approve all quality control activities be performed by a single certified technician for low production situations.

Many of the duties of the PCC Level II Technician are detailed in IM 527 (Paving) and IM 528 (Structural) and consist of, but are not limited to the following:

A. Stockpiles

1. Assure proper stockpiling procedures.
2. Prevent intermingling of aggregates.
3. Prevent contamination.
4. Prevent segregation.

B. Plant Facilities

1. Assure safe sampling locations.
2. Check for equipment compliance.
3. Assure proper laboratory location and facilities.

C. Calibration

1. Be present during calibration (paving).
2. Check plant calibration (structural).
3. Assure proper batch weights.

D. Cement (Fly Ash) & Aggregate Delivery

1. Check for proper sources and certification.
2. Document quantities delivered.
3. Monitor condition of shipments.

E. Plant Sampling

1. Check aggregate gradations by obtaining, splitting, and testing samples.

2. Check aggregate moistures and specific gravity.

F. Proportion Control

1. Check scale weights and operation.
2. Check admixture dispensers.
3. Check mixing time and revolutions.
4. Check cement yield. (Paving plant only, unless over 10,000 cu. yds.)

G. Concrete Tests

1. Cure flexural test specimens.
2. Test flexural specimens (Contract agency will perform test in structural plant).
3. Conduct maturity testing.

H. Test Equipment

1. Clean and maintain scales, screens, pycnometers and beam molds, and laboratory facility.

I. Documentation

1. Prepare daily plant reports (paving), weekly plant reports (structures).
2. Document all checks and test results in the field book.
3. Maintain daily diary of work activity.

PRESTRESS TECHNICIAN DUTIES

Duties of the Prestress Technician are detailed in IM 570 and consist of, but are not limited to the following:

A. Pre-pour

1. Identify and document materials requiring outside fabrication inspection.
2. Identify potential fabrication or production problems and notify Iowa DOT inspectors.
3. Verify that all materials incorporated meet the requirements of the contract documents.
4. Review concrete placement documents for strand locations.
5. Check tension calculations.
6. Measure elongation and gauge pressure during tensioning.
7. Check hold down and insert locations.
8. Check stress distributions.
9. Check steel reinforcement and placement.
10. Check strand position.
11. Check condition of pallet.
 - a. Level
 - b. Holes
 - c. Gaps
 - d. Other deformities
12. Determine moisture of aggregates.
13. Check form condition and placement.
 - a. Oil
 - b. Line alignment level
 - c. Tightness

B. Concrete Placement

1. Check on use of an approved mix design and batching operations (sequence).
2. Assure appropriate placement and proper vibration techniques.
3. Measure and record concrete temperature.
4. Assure test cylinders are properly made.
5. Assure appropriate finish.
6. Assure appropriate curing operations.

C. Post-pour

1. Check temperature and record during curing process.
2. Assure concrete strength has been met prior to releasing the line.
3. Assure proper detensioning procedure.
4. Check unit for defects and obtain approval for repairs.
5. Identify and store cylinders with the respective units.
6. Check beam ends for fabrication in accordance with the plans.
7. Assure exterior sides of fascia beams are grouted.
8. Inspect after patching and desired surfacing.
9. Measure and record overall dimensions of beam.
10. Measure and record camber at release and compare to design camber.
11. Check and/or measure and record lateral sweep before shipping.
12. Assure proper cylinder cure.

RIDE QUALITY TECHNICIAN DUTIES

Duties of the Ride Quality Technician are detailed in IM 341 and consist of, but are not limited to the following:

- A. Test pavement and bridge surfaces for ride quality.
- B. Evaluate the test data.
 - 1. Identify bumps and dips.
 - 2. Summarize the roughness into segments and sections.
 - 3. Identify the segments for incentive, disincentive, or grind.
 - 4. Retest and evaluate bumps, dips, and must grid segments for specification compliance.
- C. Documentation
 - 1. Document the evaluation on a test report. A copy is sent to the Project Engineer, District Materials Engineer, and Central Materials.
 - 2. Notify the Project Engineer if the daily average profile index exceeds the specification tolerance.
 - 3. Submit the profilograms to the Project Engineer for all areas tested.

SOILS TECHNICIAN DUTIES

A certified Soils Technician is required for all projects with Compaction with Moisture Control, Compaction with Moisture and Density Control, or Special Compaction of Subgrade (including for Recreation Trails). Refer to contract documents for Contractor QC testing requirements. Duties of the Soils Technician consist of, but are not limited to the following:

- A. Sampling: Obtain samples at required frequencies per IM 204.
- B. Proctor Testing
- C. Other Testing as Required
 - 1. For projects with Compaction with Moisture Control: Determine moisture content per frequencies in IM 204.
 - 2. For projects with Compaction with Moisture and Density Control or Special Compaction of Subgrade: Determine moisture content and in-place density per frequencies in IM 204.
- D. Sampling & Testing Equipment
 - 1. Clean and check testing sieves for defects.
 - 2. Assure scale accuracy.
 - 3. Check and maintain other testing equipment.
- E. Evaluate the test data.
 - 1. For projects with Compaction with Moisture Control: Confirm soils are being placed within required moisture content range.
 - 2. For projects with Compaction with Moisture and Density Control or Special Compaction of Subgrade: Confirm soils are being placed within required moisture content range and soil is compacted to density equal to or greater than density requirement.
- F. Documentation and Communication
 - 1. Document test data. A copy is sent to the Project Engineer.
 - 2. Relay test results to appropriate supervisory personnel.
 - 3. Notify the Project Engineer if any test results do not meet contract requirements and assure corrective actions are taken.

CERTIFICATION CLASSES

COURSE SUMMARY

Below is a list of supplies that are necessary for the certification courses:

- Pencils and paper
- Calculator - No computers or programmable calculators are allowed. Prestress Technician class students need a scientific calculator that shows a MINIMUM of 10 digits.
- Safety glasses and steel toe shoes will be required when working in the labs. The classes that will require safety apparel are HMA Level I and II, PCC Level I, Aggregate Technician, and Soils. Gloves will be provided. No one will be allowed in the laboratories without the required personal protective equipment. The TTCP classes will have a few extra glasses and steel toe attachments, but it is highly recommended that students bring/wear their own equipment.

Cell Phones are to be shut-off or put on vibratory mode when entering the classroom. All cell phones will be shut-off completely during examinations.

Weather-related cancellations

If the weather conditions cause a class delay or cancellation:

For all classes at DMACC - Boone: If DMACC cancels classes, the TTCP classes are also cancelled for that day. If DMACC classes are delayed, TTCP classes scheduled in Boone will also be delayed. The decision to cancel DMACC classes should be made by 7:00 am and a recording will be placed on Kelli Bennett's voice mail at 515-433-5232. You can also visit DMACC's website at www.dmacc.edu. Late starts, early closures and cancellations are listed at the top of the page.

For all other classes: Call the contact person for the location that your class is being held. Contact information is available at <https://iowadot.gov/training/ttcp/RegBook/Contacts.pdf>. If a large, weather event is forecasted and classes are cancelled for the following day, efforts will be made to contact you by telephone and email.

AGGREGATE SAMPLER

Certification and Recertification

This level of certification is for an aggregate sampling technician.

Topics covered include:

- Obtaining representative samples by approved methods.
- Frequency of sampling.
- Correctly labeling samples.
- Reducing field sample size to test sample size.

Prerequisite: None

Course Length: 1/2 day (in person)

Cost: \$60.00

Exam: Students must pass the exam with a minimum score of 80%.

To enroll: Go to <https://iowadot.gov/training/ttcp/registration>

YOU DO NOT NEED AGGREGATE SAMPLER IF YOU ARE TAKING AGGREGATE TECHNICIAN

The TTCP will schedule additional class sessions if there is a demand. We must have a minimum of six enrollments to hold an additional class. To be placed on a waiting list, please e-mail dot.ttcp@iowadot.us with the name of the certification course in which you are interested.

CONTRACT ADMINISTRATION LEVEL I

*Open only to consultants and government employees.

As of April, 2024, the Technical Training & Certification Program (TTCP) will no longer offer Level II Contract Administration and Level III Contract Administration as certification classes.

The course material currently contained in these classes will be reformatted into shorter, topic-based, non-certification courses. The Contract Administration task group is currently working on this project, and we hope to have some, if not most, of these classes available and scheduled to be held in March 2024. These courses will be added to the online TTCP Registration Book as they are finished and scheduled, so please check back periodically.

Since the certification aspect of this course material is going away, those certified technicians with Level II Contract Administration and/or Level III Contract Administration certificates expiring 12/31/2023 will no longer need to recertify in those certificates this training season. Level II Contract Administration and Level III Contract Administration recertification classes will not be offered.

If you have attended Contract Administration classes in the past, you will still have a record of completion in your transcript in IOWADOT U. This can also be printed from IOWADOT U.

CONTRACT ADMINISTRATION LEVEL II

*Open only to consultants and government employees

4/18/24 thru 4/19/24 9:00 am - 4:00 pm each day	DMACC - Boone	5

The TTCP will schedule additional class sessions if there is a demand. We must have a minimum of six enrollments to hold an additional class. To be placed on a waiting list, please e-mail dot.ttcp@iowadot.us with the name of the certification course in which you are interested.

RECERTIFICATION CLASSES

COURSE SUMMARY

Below is a list of supplies that are necessary for the recertification courses:

- Pencils and paper
- Calculator - No computers or programmable calculators are allowed. Prestress Technician class students need a scientific calculator that shows a MINIMUM of 10 digits.

All cell phones will be shut-off completely during examinations.

Weather-related cancellations

If the weather conditions cause a class delay or cancellation:

For all classes at DMACC - Boone: If DMACC cancels classes, the TTCP classes are also cancelled for that day. If DMACC classes are delayed, TTCP classes scheduled in Boone will also be delayed. The decision to cancel DMACC classes should be made by 7:00 am and a recording will be placed on Kelli Bennett's voice mail at 515-433-5232. You can also visit DMACC's website at www.dmacc.edu. Late starts, early closures and cancellations are listed at the top of the page.

For all other classes: Call the contact person for the location that your class is being held. Contact information is available at <https://iowadot.gov/training/ttcp/RegBook/Contacts.pdf>. If a large, weather event is forecasted and classes are cancelled for the following day, efforts will be made to contact you by telephone and email.

AGGREGATE SAMPLER RECERTIFICATION

This level of certification is for an aggregate sampling technician.

Aggregate Sampler and Aggregate Sampler Recertification have been combined, so please enroll in an Aggregate Sampler course to recertify.

AGGREGATE TECHNICIAN RECERTIFICATION

This level of certification is for an aggregate technician.

Topics covered include:

Aggregate classification.

Aggregate testing.

Maintaining sampling and testing equipment.

Documentation and reporting.

Prerequisite: None

Course Length: 1 day in person

Cost: \$120.00

Exam: Students must pass the exam with a minimum score of 80%.

To enroll: Go to <https://iowadot.gov/training/ttcp/registration>

CONTRACT ADMINISTRATION LEVEL II RECERTIFICATION

***Open only to consultants and government employees**

As of April, 2024, the Technical Training & Certification Program (TTCP) will no longer offer Level II Contract Administration and Level III Contract Administration as certification classes.

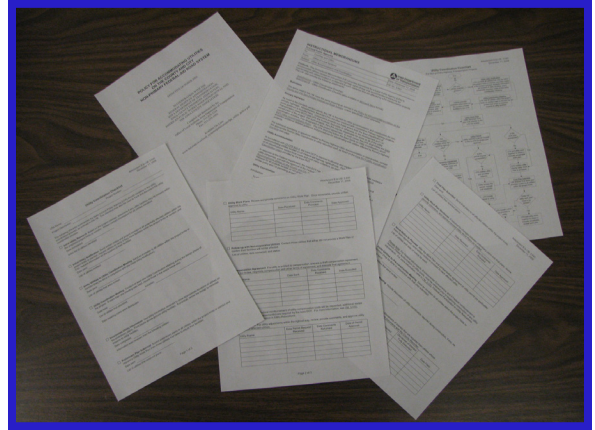

The course material currently contained in these classes will be reformatted into shorter, topic-based, non-certification courses. The Contract Administration task group is currently working on this project, and we hope to have some, if not most, of these classes available and scheduled to be held in March 2024. These courses will be added to the online TTCP Registration Book as they are finished and scheduled, so please check back periodically.

Since the certification aspect of this course material is going away, those certified technicians with Level II Contract Administration and/or Level III Contract Administration certificates expiring 12/31/2023 will no longer need to recertify in those certificates this training season. Level II Contract Administration and Level III Contract Administration recertification classes will not be offered.

If you have attended Contract Administration classes in the past, you will still have a record of completion in your transcript in IOWADOT U. This can also be printed from IOWADOT U.

CONTRACT ADMINISTRATION LEVEL III RECERTIFICATION

*Open only to consultants and government employees

TEST ONLY RECERTIFICATION

Introducing...an alternate way to recertify!

“Test-only day”

Do you have multiple certifications expiring this year, but a limited amount of time and travel budget? Are you an experienced technician who doesn't want to sit through a review session? If so, you may be interested in another recertification option.

There are “test-only” days scheduled when an eligible technician may come into a testing location and take as many different recertification exams as they wish, in any order they wish. Exams will begin at 9:00 am. No exams will be started after 3:00 pm. The exams will be proctored.

There will be no review given and no questions answered during the test only days!

Review Online

A free review is available online for the following certifications:

**Aggregate Sampler
Aggregate Technician
Erosion Control
HMA Sampler
Level I HMA
Level II HMA
Level I PCC
Level II PCC
Level III PCC
Ride Quality
Soils**

Review at your own pace on your own computer and come prepared to take the exam(s) on the date you enrolled in. Manuals will be available at the test site, but if you prefer to have them ahead of time they will be available at <https://iowadot.gov/training/ttcp-manuals> or at any Iowa DOT District Materials location and DMACC-Boone Campus.

What does it cost?

The cost for this option is significantly lower than for a regular re-certification class.
These prices are ONLY for exams given on the test-only dates listed below.

COURSE	TEST-ONLY COST	REGULAR RE-CERTIFICATION COST
Aggregate Sampler	\$40.00	\$60.00
Aggregate Technician	\$40.00	\$120.00
Erosion Control	\$40.00	\$120.00
HMA Sampler	\$40.00	\$60.00
HMA Level I	\$40.00	\$120.00
HMA Level II	\$40.00	\$120.00
PCC Level I	\$40.00	\$120.00
PCC Level II	\$40.00	\$120.00
PCC Level III	\$40.00	\$120.00
Prestress	\$40.00	\$120.00
Ride Quality	\$40.00	\$120.00
Soils	\$40.00	\$120.00

TEST ONLY DAYS

Start Date/Time	End Date/Time	Location
1/26/24 9:00 am	1/26/24 4:00 pm	DMACC - Boone
1/26/24 9:00 am	1/26/24 4:00 pm	District 2 Materials - Mason City
1/26/24 9:00 am	1/26/24 4:00 pm	District 3 Materials - Sioux City
1/26/24 9:00 am	1/26/24 4:00 pm	District 4 Lab - Atlantic
1/26/24 9:00 am	1/26/24 4:00 pm	District 5 Materials - Fairfield

How do I enroll in a Test Only Day?

To enroll, send an email to dot.ttcp@iowadot.us

Please be sure to include the following information in your email:

Your name

Company name

Type of payment you will be using (Check, CIT funds, DOT employee)

Date you will be attending

Location of where you will be taking the exams

What exams you will be taking

You do not need to do anything in IOWADOT U to enroll in a Test Only Day.

UPDATE CLASSES

Remember!

HMA I, PCC II and Erosion Control Updates

Level I HMA, Level II PCC and Erosion Control Updates will no longer be required for recertification. Update classes will continue to be offered online, but are for information only.

We strongly encourage taking update classes every year, if possible. Changes and important new information are presented that could affect how you do your job.

Updates will be offered through web-based training. If an individual plans on taking the PCC II or HMA I update via the web, they will need to go to <https://iowadot.gov/training/web-based-training>.

OTHER CLASSES

COURSE SUMMARY

Below is a list of supplies that are necessary for the courses:

- Pencils and paper
- Calculator

Cell Phones are to be shut-off or put on vibratory mode when entering the classroom.

Weather related cancellations

If the weather conditions cause a class delay or cancellation:

For all classes at DMACC - Boone: If DMACC cancels classes, the TTCP classes are also cancelled for that day. If DMACC classes are delayed, TTCP classes scheduled in Boone will also be delayed. The decision to cancel DMACC classes should be made by 7:00 am and a recording will be placed on Kelli Bennett's voice mail at 515-433-5232. You can also visit DMACC's website at www.dmacc.edu. Late starts, early closures and cancellations are listed at the top of the page.

For all other classes: Call the contact person for the location that your class is being held. Contact information is available at <https://iowadot.gov/training/ttcp/RegBook/Contacts.pdf>. If a large, weather event is forecasted and classes are cancelled for the following day, efforts will be made to contact you by telephone and email.

CONTRACT ADMINISTRATION FOR CONTRACTORS

***Open only to contractors**

Topics covered include:

- What are contract documents?
- Roles and responsibilities
- Record keeping
- Where to look for information
- Subcontractors

Prerequisite: None

Course Length: 3 days in person

Cost: \$360.00

Exam: There is no exam for this course

To enroll: Go to <https://iowadot.gov/training/ttcp/registration>

Date/Time	Location	Max #
12/4/23 thru 12/6/24 9:00 am - 4:00 pm each day	DMAcc-Boone	32

GRADING FIELD INSPECTION

Topics covered include:

- Soils classifications and properties.
- Soil compaction.
- Erosion and sediment control.
- Drainage.
- Stabilization methods.

Prerequisite: This course is only open to government agencies and consultants.

Course Length: 2 days (in person)

Cost: There is no fee for this course.

Exam: There is no exam for this course.

To enroll: Go to <https://iowadot.gov/training/ttcp/registration>

3/13/24 thru 3/14/24 9:00 am - 4:00 pm each day	US HWY 30 Garage Training Room	32

OTHER TRAINING SESSIONS AND SEMINARS AVAILABLE

APAI Workshop

Information and registration are available through the APAI.

March 6-8, 2024

ICPA Workshop

Information and registration are available through the ICPA.

February 7-9, 2024

IRMCA Workshop

Information and registration are available through the IRMCA.

March 4-5, 2024

Work Zone Safety Workshops

This course introduces the principles and conveys the importance of using proper methods for safe and efficient traffic control at work sites. It examines some specific applications relevant to situations normally encountered by city, county, utility, contractor, and Iowa DOT crews. This course is for all workers whose duties place them within or near the traveled-portion of the roadway, and their supervisors. Each day-long workshop is divided into a general session for all participants and breakout sessions according to specific types of work zone activity: city, county, utility, Iowa DOT construction, and Iowa DOT maintenance. For information on this workshop DOT employees should contact **Steven Schroder at 515-239-1623 and non-DOT employees should contact Keith Knapp at 515-294-8817.**

Civil Engineering Technology

Des Moines Area Community College (DMACC), Boone Campus, offers a Civil Engineering Technology Program. This program prepares the student for a career as a technician in the areas of design, construction, and inspection. Upon completion of the program, graduates will have a working knowledge of surveying equipment, industry-based computer software, and laboratory testing instruments. When an individual completes this program and passes the certification tests administered by the Iowa DOT Technical Training and Certification Program, they will be certified in Aggregate Technician; Level I and Level II PCC; and Level I HMA, Soils Technician and Erosion Control Technician. Contact Renee White at DMACC, Boone at 515-433-5056 for more information on the program.

WEB-BASED TRAINING

Web-Based Training

Web-based training is available in a variety of subject areas. Visit the Iowa DOT training site to learn more at <https://iowadot.gov/training/web-based-training>. These courses are available at no-charge.
