Following today's meeting, there will be a webinar provided by the International Association of Chiefs of Police and hosted by IBM at 1:00 p.m. The webinar will provide information on Tennessee Highway Patrol's analytic software, C.R.A.S.H. (Crash Reduction Analyzing Statistical History), which works to reduce traffic crashes and fatalities. The software incorporates multiple types of data, including weather patterns, historical data, and special events.

If interested in participating in the webinar, we will reconvene at 1:00 at the same location as the STRCC meeting.
