The Iowa DOT is requesting public input on the proposed improvements to U.S. 52/Iowa 3 from 0.7 mile north of Boy Scout Road to the east junction of Pfeiler Road near Rickardsville in Dubuque County.

The proposed improvements include the two-lane reconstruction of U.S. 52/Iowa 3 with the addition of 6-foot paved shoulders to allow for improved ride quality in addition to long-term maintenance and improved safety.

A public information meeting to discuss right of way needs and to display the final design will be held in early 2018, with construction anticipated in 2020. The Iowa DOT is currently accepting comments on the preliminary design, which is available online at www.iowadot.gov/ole/otherprojectinfo.html.

Comments or questions concerning the proposed project must be received by the Iowa DOT contact listed below by July 6, 2017.
